INCIDENT MANAGEMENT SITUATION REPORT MONDAY AUGUST 23, 2004 – 0530 MDT NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was light nationally with 127 new fires reported. Four large fires were contained, two each in the Northwest and Eastern Great Basin Areas. Very high to extreme fire indices were reported in Alaska, California, Montana, Nevada, Oregon, South Dakota, Washington and Wyoming.

Hurricane Charley, Florida. A Presidential Disaster Declaration was issued on 8/13. A Type 1 Incident Management Team (Ferguson) is assigned to provide logistical and resource support. The team will work jointly with the GSA, FEMA, the U.S. Army and Air Force, Army Corps of Engineers, Florida Division of Forestry, Florida State Emergency Response Team, Florida National Guard, Central Florida Regional Planning Council, Lakeland Airport Authority, the Salvation Army and state and local law enforcement agencies. Four Florida State Type 2 Incident Management Teams (Beauchamp, Jones, Crow and Koehler) are assigned in Charlotte, Hardee and DeSoto Counties, and the city of Lakeland. The Teams are managing supply distribution centers, disaster recovery and two 300 person camps.

NORTHWEST AREA LARGE FIRES:

BLAND MOUNTAIN #2, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Mair) is assigned. This fire is located ten miles east of Canyonville, OR in timber and grass. Precipitation limited fire activity to slow moving ground fire. Reduction in acreage is due to more accurate mapping.

FISCHER, Okanogan-Wenatchee National Forest. A Type 1 Incident Management Team (Anderson) is assigned. This fire is four miles southeast of Leavenworth, WA in grass, brush and timber. Precipitation limited fire behavior to smoldering and creeping. Mandatory evacuations have been lifted for Olalla, Hay, Nahahum, Jude and Spring Canyons.

WILLIAMS BUTTE COMPLEX, Okanogan-Wenatchee National Forest. A Type 1 Incident Management Team (Lohrey) is assigned. This complex, consisting of the Williams Butte and Crescent fires, is located 15 miles southwest of Winthrop, WA in timber. Creeping with isolated single tree torching was observed. Lohrey's Incident Management Team will also manage the Freezout Complex.

POT PEAK/SISI RIDGE COMPLEX, Okanogan-Wenatchee National Forest. A Washington State Interagency Incident Management Team (Jennings/Perry) is assigned. This complex, comprised of the Pot Peak, SiSi Ridge and Deep Harbor fires, is 15 miles northwest of Chelan, WA in timber. Fire behavior throughout the complex was characterized by smoldering, creeping, and backing fire. Voluntary evacuation notifications remain in effect. FREEZEOUT COMPLEX, Okanogan-Wenatchee National Forest. A transfer of command from a Fire Use Management Team (Cook) to a Type 1 Incident Management Team (Lohrey) will occur at 1800 PDT. This complex, located 65 miles northeast of Bellingham, WA in timber, is comprised of the Freezeout and Freezeout 2 suppression fires, and the Devil's Creek and Jack Wildland Fire Use (WFU) fires. Minimal fire activity was reported due to precipitation. Reduction in acreage is due to more accurate mapping.

EAGLE CAP COMPLEX, Wallowa-Whitman National Forest. A Fire Use Management Team (Hall) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, comprised of the Goat Mountain, Jim White Ridge and Hazel Mountain 2 fires, located ten miles east of Cove, OR in timber, is being managed to accomplish resource objectives. No new information was reported.

SWIFT CREEK, Mt. Baker-Snoqualmie National Forest. This fire is ten miles north of Concrete, WA in timber. No further information was received. This will be the last report unless new information is received.

DOWNEY CREEK, Mt. Baker-Snoqualmie National Forest. This fire is 16 miles north of Darrington, WA in timber. No further information was received. This will be the last report unless new information is received.

SURVEY POINT, Mt. Baker-Snoqualmie National Forest. This fire is 12 miles northwest of Concrete, WA in timber. No further information was received. This will be the last report unless new information is received.

DIRTY FACE PEAK, Okanogan-Wenatchee National Forest. This fire is 20 miles north of Leavenworth, WA in timber. Smoldering and creeping were observed.

NES = Washington Department of Natural Resources, Northeast

CLP = Crater Lake National Park

ALASKA AREA LARGE FIRES:

CENTRAL COMPLEX, Bureau of Land Management, Upper Yukon Zone. A Type 1 Incident Management Team (Frye) is assigned. This complex, comprised of the Crazy, Bolgen Creek, Rock Creek, Preacher Creek, Middle Birch, Big Bluff and Takoma Bluff fires, is surrounding Central, AK in spruce and hardwoods. Fire behavior consisted of torching, crown runs and spotting in areas of heavier fuels.

TAYLOR HIGHWAY COMPLEX, Alaska Division of Forestry, Tok Area Forestry. A Type 2 Incident Management Team (Jandt) is assigned. This complex, comprised of the Billy Creek, Gardiner Creek, Chicken and Porcupine fires, is 35 miles northwest of Tok, AK in black spruce and tundra. Fire activity on the Porcupine, Chicken and Billy Creek was characterized by ground fire and torching. Fire activity increased on the Gardiner Creek due to strong winds.

GLACIER CREEK, Alaska Division of Forestry, Kenai-Kodiak Area. This fire is 31 miles southeast of Soldotna, AK in timber. Wind-driven fire behavior was reported.

OUTLOOK:

Fire Weather Watches: For strong northeast winds for northern interior of Alaska, and Tuesday for strong northeast winds for the central and southern interior of Alaska. For southwest Utah for strong winds and low relative humidity.

Weather Discussion: A low pressure trough will bring cool weather and scattered showers and thunderstorms to the Pacific Northwest and Northern Rockies. Meanwhile, a drier southwest flow should prevail across the southern Sierra and the southern Great Basin. In Alaska, a slow cooling trend continues as high pressure weakens and begins to move out of the state. A dry cold front is expected to usher in gusty winds and cooler temperatures to the northern interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
NORTHWEST AREA	Temperatures	indinaty	
East of the Cascades: Rain near Cascades early, otherwise showers and isolated thunderstorms. West of the Cascades: Rain.	50s mountains. 60s elsewhere.	East of the Cascades: 50 to 65%. West of the Cascades: 70 to 80%.	West to southwest 20 to 30 mph over the Cascades and across southeast Oregon. South to southwest 10 to 20 mph elsewhere.
ALASKA Eastern Interior: Mostly sunny and smoky.	Eastern Interior: 70s.	Eastern Interior: 28 to 40%.	Eastern Interior: East to northeast increasing to 15 to 25 mph in the north.
EASTERN GREAT BASIN AREA Idaho, Bridger-Teton: Mostly cloudy, breezy and much cooler with scattered showers or thunderstorms. Utah, Arizona Strip: Mostly sunny in southwest Utah and the Arizona Strip with windy conditions and low relative humidity. Otherwise partly to mostly cloudy and breezy with scattered showers and thunderstorms.	Idaho, Bridger-Teton: 46 to 59 mountains. 60 to 74 valleys. Utah and Arizona Strip: 59 to 77 northwest Utah. 68 to 83 mountains. 84 to 99 valleys. 96 to 104 Lake Mead area.	Idaho, Bridger-Teton: 36 to 85% mountains. 32 to 59% valleys. Utah, Arizona Strip: 23 to 47% northwest Utah. 18 to 40% mountains. 11 to 30% valleys.	Idaho, Bridger-Teton: Southwest or west 10 to 20 mph. Utah, Arizona Strip: Southwest or northwest 15 to 30 mph.
WESTERN GREAT BASIN AREA Mostly cloudy north with isolated showers and thunderstorms; partly sunny south.	70 to 82 north valleys. 80 to 91 south valleys. 60 to 75 mountains.	20 to 30% north valleys. 11 to 20% south valleys. 25 to 40% mountains.	Southwest to west at 10 to 20 mph with gusts to 30 mph.
SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog into the coastal valleys. Otherwise partly cloudy.	65 to 75 coastal areas. 70 to 85 mountains. 80 to 90 valleys. 85 to 95 upper deserts. 95 to 105 lower deserts.	30 to 45% valleys. 15 to 30% mountains. 10 to 20% deserts.	Southwest to northwest 10 to 20 mph.
NORTHERN CALIFORNIA AREA Partly cloudy to cloudy with showers and light rain in the north.	50s to low 60s higher elevations. Upper 60s to near 80 lower elevations.	25 to 40%.	Southwest to west 8 to 14 mph; gusts 25 to 35 mph over the higher elevations.
ROCKY MOUNTAIN AREA Isolated afternoon thunderstorms across Wyoming, South Dakota and eastern plains. Isolated dry lightning western South Dakota.	70s to 80s. 90s central plains and southern Front Range. 65 to 75 mountains.	Less than 20% over eastern Wyoming, western South Dakota, western and eastern Colorado.	Southeast 10 to 30 mph over eastern plains.

FREQUENT SPOT FIRES ACROSS THE LINE

There are few watchout situations that state more clearly how much potential your fire has for rapid, uncontrolled growth. Consider the following questions if you are getting spot fires across your line:

- Can you handle increased spotting? List some ways you can keep ahead of spot fires (gridding the green, lookouts, etc.)
- Do you have a plan for long-range spotting? In what fuel type and under what conditions will you likely have long-range spotting? What types of plans can you think of for handling longrange spotting?
- Is help available if necessary? What kinds of resources will you have in place or order to handle spot fires?
- If fire behavior increases, is your position still defensible? Discuss what type of action you might take if a spot fire takes off.
- Do you have more than one safety zone in case one gets cut off? Describe how you might have multiple safety zones.
- Do the primary lookouts have a good view of the situation? Discuss who might be acting as a lookout (e.g., crew member, air resources, etc.) and how you will get good information from that person. (Are you relying on an air attack who is busy with airtankers?)
- Is the primary burning period ending? Talk about how your tactics may vary from finding spot fires early in the day to later into the evening. Review Probability of Ignition (PIG) and what it can tell you about spotting potential.
- To reduce the risk, be ready to retreat. Keep your guard up even if spotting has not occurred for a few hours. Review fires where you have had frequent spot fires and what you learned about controlling them.
