

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY OCTOBER 6, 2004 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally with 102 new fires reported. One new large fire was reported and one large fire was contained in the Eastern Great Basin Area. Very high to extreme fire indices were reported in California, Nebraska and Wyoming.

Presidential Disaster Declarations have been issued for Hurricane Frances in Florida on 9/4; for Hurricane Ivan in Alabama, Florida, Louisiana and Mississippi on 9/16; and for Hurricane Jeanne in Florida on 9/26. An Area Command Team (Zimmerman) is assigned to the Florida Disaster Field Office, Orlando, FL. Numerous resources have been mobilized as part of the relief effort, including aviation assets, mobile caterers and showers, national buying teams, crews and miscellaneous overhead personnel.

SOUTHERN AREA INCIDENTS:

HURRICANE FRANCES / IVAN RESPONSE, Federal Emergency Management Agency (FEMA). A Type 1 Incident Management Team (Hart) is managing a base camp at Saufley Field Naval Air Station in Pensacola, FL. A Type 2 Incident Management Team (Mullenix) is managing a base camp in Brewton, AL, supporting the receiving and distribution of supplies and debris removal in central Alabama.

HURRICANE JEANNE RESPONSE, Federal Emergency Management Agency (FEMA). A Type 1 Incident Management Team (Kearney) is managing a base camp in Martin County, FL. A transfer of command from a Type 1 Incident Management Team (Frye) to a Type 3 organization will occur today.

HURRICANE IVAN RECOVERY, Gulf Islands National Seashore. A National Park Service All-Risk Incident Management Team (Wissinger) is assigned. The Team is managing clean-up and recovery efforts.

HURRICANE JEANNE RECOVERY, State of Florida. A Florida Division of Forestry Type 2 Incident Management Team (Jones) is managing the distribution of relief supplies in Polk County, FL.

EASTERN GREAT BASIN LARGE FIRES:

LINE CREEK, Sawtooth National Forest. This fire is 18 miles northwest of Fairfield, ID in grass, sagebrush, aspen and Douglas fir. Hunting and sheep camps near the fire area are a concern. Terrain driven running and torching were observed.

REFUSING RISK (“TURNDOWN” PROTOCOL)

Every firefighter has the right and obligation to report safety problems and contribute ideas regarding their safety. Supervisors are expected to give these concerns and ideas serious consideration. When an individual feels an assignment is unsafe, they also have the obligation to identify, to the degree possible, safe alternatives for completing that assignment. Turning down an assignment is one possible outcome of managing risk.

- A “turndown” is a situation where an individual has determined an assignment cannot be undertaken as given, and they are unable to negotiate an alternative solution.
- A “turndown” must be based on an assessment of risks and the ability of an individual or organization to control those risks.
- A situation may be a candidate for a “turndown” if:
 - There is a violation of safe work practices.
 - Environmental conditions make the work unsafe.
 - The forces lack the necessary qualifications or experience.
 - Defective equipment is being used.
- The following steps will be used when turning down an assignment:
 - The individual will directly inform their supervisor that they are turning down the assignment as given. (Document using criteria outlined in the risk management process.)
 - Supervisor will notify the Safety Officer immediately upon being informed. In the absence of a Safety Officer, the appropriate Section Chief or Incident Commander will be notified. This step provides accountability for decisions and initiates communication of safety concerns.
 - If the supervisor requests another resource to perform the assignment, he/she is responsible for informing that resource that the assignment has previously been refused and the reason(s) why.
 - The safety hazard should be documented by the submission of a SAFENET or SAFECOM.
- These actions do not stop an operation from being carried out. This protocol is integral to the effective management of risk as it provides timely identification of hazards to the chain of command, raises risk awareness for both leaders and subordinates, and promotes accountability.
