### INCIDENT MANAGEMENT SITUATION REPORT SATURDAY OCTOBER 16, 2004 – 0800 MDT NATIONAL PREPAREDNESS LEVEL 1

## **CURRENT SITUATION:**

Initial attack activity was light nationally with 49 new fires reported. Very high to extreme fire indices were reported in California, Nebraska, Utah and Wyoming.

## NORTHERN CALIFORNIA AREA LARGE FIRES:

RUMSEY, California Department of Forestry & Fire Protection (CDF), Sonoma-Lake Napa Unit. A CDF Type 1 Incident Management Team (Streblow) is assigned. This fire is 18 miles south of Williams, CA in brush. Fire activity was limited to interior islands of fuel.

POWER, Eldorado National Forest. Unified Command between a Type 1 Incident Management Team (McCombs) and the California Department of Forestry and Fire Protection (Winton) is in place. This fire is 17 miles east of Pioneer, CA in brush and timber. Moderate fire behavior with occasional torching and spotting was observed. Crews are continuing burnout operations on the north flank.

FREDS, Eldorado National Forest. A Type 2 Incident Management Team (Szczepanik) is assigned. This fire is ten miles east of Kyburz, CA in heavy timber and brush. High intensity burning in heavy fuels and short range spotting were reported. Residents are being allowed back into the communities of Kyburz and Silverfork. Highway 50 remains closed in both directions.

## OUTLOOK:

**Weather Discussion:** A low pressure system approaching the Pacific Northwest coast will spread cooler temperatures and higher humidity to much of California. In addition, gusty winds are expected over the Sierras. Elsewhere, rain will move into the Pacific Northwest and Northern Rockies, spreading into California late Saturday and Sunday.

#### HAZARD MITIGATION THROUGH RISK MANAGEMENT

"Risk management doesn't get in the way of doing the mission – it is the way we do the mission." The Risk Management Process assists in ensuring that critical factors and risks of the fireline work environment are considered during decision making. Good risk management utilizes a five-step process:

- Step 1—Situational Awareness:
  - Obtain information.
  - Scout the fire.
  - Identify hazards—those likely to result in a negative impact.
  - Consider all aspects of current and future situations.
  - Consider known historical problem areas (Apply information from the Fire Danger Pocket Card.).
  - Recognize the need for action.
  - Demonstrate ongoing awareness of fire assignment status.
  - Note deviations.
  - Attempt to determine why discrepancies exist with information before proceeding.

Step 2—Hazard Assessment:

- Assess hazards to determine risks (e.g., fire behavior, snags, unburned fuels, work/rest).
- Use the Look Up, Down, and Around; and the Tactical Watch Outs (both located in the Incident Response Pocket Guide) to identify high-risk tactical hazards.
- Assess the impact of each hazard in terms of potential loss, cost, and mission/operational degradation based on probability and severity (probability—how likely an event will occur; severity—consequences if the event occurs). Keep in mind that increased exposure time increases probability.

Step 3—Hazard Control:

- Determine the best approach to mitigate or control the risk from the hazards assessed.
- Establish controls (e.g., anchor point, LCES, utilize downhill checklist, and limit exposure time).
- As control measures are developed, reevaluate each risk until it is reduced to a level where benefits outweigh potential costs.
