## **INCIDENT MANAGEMENT SITUATION REPORT** FRIDAY, APRIL 22, 2005 - 1000 MDT NATIONAL PREPAREDNESS LEVEL 1

## **CURRENT SITUATION:**

Initial attack activity was moderate in the Southern, Eastern, and the Southwest Areas and light elsewhere. Nationally, 2,609 new fires were reported for the week. Twenty new large fires were reported, eight in the Southern Area, six in the Eastern Area, three in the Southwest Area, two in the Rocky Mountain Area and one in the Northern Rockies Area. Twenty large fires were contained, seven in the Southern Area, six in the Eastern Area, four in the Southwest Area, two in the Rocky Mountain Area and one in the Northern Rockies Area. Very high to extreme fire indices were reported in California, Texas, Montana, South Dakota, Minnesota, Wisconsin, Michigan, Ohio, Illinois, Pennsylvania, Maine, Maryland, New York, Vermont, New Hampshire, Massachusetts, and Connecticut.

On April 20, three pilots were fatally injured when their Aero Union Corporation P3 Orion air tanker crashed during a non-contract training flight on the Lassen National Forest in California. The firefighting community extends condolences to the family and friends of the deceased.

## SOUTHERN AREA INCIDENTS / LARGE FIRES:

TWO SET, Florida Division of Forestry. This fire is five miles southeast of Florida City, FL in Sawgrass. Smoldering was reported in interior pockets.

FRAKES, Kentucky Division of Forestry. This fire is 25 miles southwest of Pineville, KY in timber. No further information was reported.

## OUTLOOK:

**Weather Discussion:** A strong cold front will pass through the region east of the Mississippi River today and Saturday. Windy weather is expected today and Saturday over portions of the Plains and Great Lakes with dry, gusty winds reaching Florida and the Southeast on the weekend. Another front will move out of the Southern Plains Monday and pass through the Southeast Tuesday and Wednesday. Dry weather will prevail Thursday across the South. The Northeast should see generally unsettled weather today through Thursday. In the Southwest, dry weather today will give way to scattered rain and snow showers over the weekend, mainly over the northern sections. Warmer and drier will return next week.

Geographic Area	High	Minimum Relative	Wind
Weather	Temperatures	Humidity	
<b>Southern California</b> Areas of morning low clouds and fog into the coastal valleys, otherwise increasing clouds.	55 to 70 mountains. 75 to 85 valleys. 70 to 80 upper deserts. 85 to 95 lower deserts.	10 to 20%.	Southeast to southwest 10 to 20 mph with higher gusts.

#### ENTRAPMENT AVOIDANCE (cont...)

Avoiding situations where firefighters become entrapped is the first concern when devising strategy and tactics. The following discussion points are among the things that should be considered.

- Discuss the three types of safety zones and describe examples.
  - The burn
  - Natural features
  - Constructed sites
- Discuss the guidelines for distance separation to avoid radiant heat injury.
  - Four times the maximum flame height (20 feet-flame height x 4 = 80 feet radius from firefighters)
- Discuss heat impact factors that will affect the guidelines for distance separation.
  - Convection heat from wind and terrain features
  - Location relative to fire spread
  - Reburn potential of fuel in safety zone
- Discuss that firefighters have a right to know the location of their escape routes and safety zones at all times.
- Discuss that firefighter have a right to ask for clarification when faced with unclear instructions or fear of the unknown.

Describe a basic procedure for identification of effective escape routes and safety zones.

- Observe
- Visualize
- Identify
- Time
- Inform
- Evaluate
