OUTLOOK:

Fire Weather Watches: Sunday afternoon and evening for Nevada Zone 456 below 6000 feet due to strong south winds and low relative humilities.

Weather Discussion: A ridge of high pressure will push eastward into the plains in advance of a complex storm system and cold front moving into the Pacific Northwest and Great Basin. In Alaska, high pressure over the Bering Strait will bring drier and warmer conditions to much of western Alaska while a low pressure system moving westward from the Yukon Territory will bring an increase in moisture to parts of southern and eastern Alaska.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
