

**INCIDENT MANAGEMENT SITUATION REPORT  
TUESDAY, OCTOBER 18, 2005 – 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 153 fires reported. One new large fire was reported in the Eastern Area. Three large fires were contained, one each in the Eastern Great Basin, Western Great Basin and Eastern Areas. Very high to extreme fire indices were reported in Arizona, California, Montana, Nebraska, South Dakota, and Wyoming.

A Presidential Disaster Declaration was issued for Hurricanes Katrina and Rita in Mississippi, Alabama, Louisiana and Texas. Williams-Rhodes Area Command Team is coordinating relief operations in Louisiana and Texas (FEMA Region VI) and in Mississippi for (FEMA Region IV). Ribar's Area Command Team has been released. The Marietta Mobilization Center in Marietta, GA continues to house and in-brief resources prior to assignment.

A link to a map with resources mobilized for hurricane response is located at [http://gacc.nifc.gov/sacc/predictive/intelligence/Resource\\_Map.pdf](http://gacc.nifc.gov/sacc/predictive/intelligence/Resource_Map.pdf).

**SOUTHERN AREA INCIDENTS / LARGE FIRES:**

HURRICANES KATRINA AND RITA SUPPORT, Federal Emergency Management Agency. Emergency Support Function (ESF) #4 at the state Emergency Operations Centers in Jackson, MS and Baton Rouge, LA are staffed.

Six Type 2 Incident Management Teams (Johnson, Goheen, Stewart, Floyd, Carlson, and LaFave) are assigned.

Johnson: managing base camps at Gulfport and Vancleave, MS.

Goheen: managing a mobilization center and base camp at Camp Beauregard, near Pineville, LA.

Stewart: assessing timber damage and coordinating wildfire presuppression and initial attack planning at Hammond, LA.

Floyd: managing a receiving and distribution center and supporting a mobilization center at Bossier City, LA.

Carlson: managing the Jackson Support Base in the New Orleans French Quarter and supporting several satellite camps in southern Louisiana.

LaFave: managing distribution sites in Hancock County from a base camp at Stennis Space Center, MS.

Brunner: supporting distribution centers and several emergency operations centers in three counties and managing a base camp at Ford Park Arena, Beaumont, TX in support of Hurricane Rita.

### EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
SURRUP	ID	BOD	900	100	---	0	0	0	0	0	NR	BLM

BOD – Boise District, Bureau of Land Management

### WESTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
PRUNTY RANCH	NV	EKD	1,000	100	---	0	1	0	0	0	NR	PRI

EKD – Elko Field Office, Bureau of Land Management

### EASTERN AREA INCIDENTS / LARGE FIRES:

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
NORLAND	MN	MNS	350	100	---	20	0	5	0	0	2K	ST

MNS – Minnesota Department of Natural Resources

### OUTLOOK:

**Red Flag Warning:** For the western Florida panhandle for low relative humidity.

**Fire Weather Watch:** For inland areas of the Florida big bend and the eastern panhandle for low relative humidity and warm temperatures.

**Weather Discussion:** The upper low which has been off the southern California coast the past couple of days will begin to move inland today. High pressure will continue to bring warm, dry weather to most of the Southern Area.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Southern California</b> Partly to mostly cloudy with scattered showers and thunderstorms.	Mountains: 50 to 65. Valleys: 60 to 75. Upper deserts: 60 to 70. Lower deserts: 70 to 80.	Central California: 30 to 50%. Southern California: 50 to 70%.	Southwest to northwest 10 to 20 mph.

### **FIRE NOT SCOUTED AND SIZED UP**

Watchout Situation #1 comes up during initial attack and every time resources arrive at a fire.

● Before taking action on the fire, the following considerations must be addressed:

- Can you personally observe the fire or must you use scouts? Describe ways you can scout and size up a fire.
- Do you know the location of the fire perimeter? Discuss situations in which the fire perimeter may not be obvious. (Spotty fires, etc.)
- Do you know the direction of fire spread? When isn't the direction of fire spread obvious? (Wind shifts, spotty fires, etc.)
- Does the direction of fire spread increase risk? Talk about situations where you may have to approach the head of the fire. (Hiking down from a helispot, approaching from an existing road, switching winds, etc.)
- Do you know the fuels and their condition? What kind of information will you assume from what you already know about fuel types? (Spot fires in fir, extreme fire potential in flashy fuels, etc.)

● Continued from above...

- Do topographic hazards exist? What can you assume from what kind of terrain the fire covers? (Slope, chimneys, aspect, etc.)
- Does enough information exist to establish a plan of attack? When do you have enough information to begin fighting fire? What do you need to know?
- Do other dangers exist? Have you talked about factors specific to the area you are working in? (Hunters in the woods, drought, snag patches, etc.)

● To reduce the risks:

- Post lookouts until the fire is sized up and escape routes and safety zones are established.
- Retreat if the situation is too complex. Review fires where you had to wait until the area in which you were assigned to work was scouted and sized up before you were allowed onto the fireline.
