

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, OCTOBER 21, 2005 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationally with 114 fires reported. No new large fires were reported. One large fire was contained in the Southern Area. Very high to extreme fire indices were reported in Arizona, California, Nebraska and Wyoming.

A Presidential Disaster Declaration was issued for Hurricanes Katrina and Rita in Mississippi, Alabama, Louisiana and Texas. An Area Command Team (Williams-Rhodes) is coordinating relief operations in Louisiana and Texas (FEMA Region VI) and in Mississippi for (FEMA Region IV). The Marietta Mobilization Center in Marietta, GA continues to house and in-brief resources prior to assignment.

Resources are being mobilized to the Southern Area in preparation for Hurricane Wilma.

A link to a map with resources mobilized for hurricane response is located at http://gacc.nifc.gov/sacc/predictive/intelligence/Resource_Map.pdf.

SOUTHERN AREA INCIDENTS / LARGE FIRES:

HURRICANES KATRINA AND RITA SUPPORT, Federal Emergency Management Agency. Emergency Support Function (ESF) #4 at the state Emergency Operations Centers in Jackson, MS and Baton Rouge, LA are staffed.

Seven Type 2 Incident Management Teams (Johnson, Goheen, Stewart, Floyd, Carlson, LaFave and Brunner) are assigned.

Johnson: managing base camps at Gulfport and Vancleave, MS.

Goheen: managing a mobilization center and base camp at Camp Beauregard, near Pineville, LA.

Stewart: assessing timber damage and assisting with wildfire suppression at Hammond, LA.

Floyd: managing a receiving and distribution center and supporting a mobilization center at Bossier City, LA.

Carlson: managing the Jackson Support Base in the New Orleans French Quarter and supporting several satellite camps in southern Louisiana.

LaFave: managing distribution sites in Hancock County from a base camp at Stennis Space Center, MS.

Brunner: supporting distribution centers and several emergency operations centers in three counties and managing a base camp at Ford Park Arena, Beaumont, TX.

HURRICANE WILMA SUPPORT, Federal Emergency Management Agency. The Regional Response Coordination Center is currently staffed in Atlanta, GA. An Emergency Operations Center is staffed in Tallahassee, FL.

Three Type 1 Incident Management Teams (Pincha-Tulley, Gelobter and Wilcock) have been ordered.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
SALT CREEK	TX	TXS	200	100	---	4	0	0	0	0	NR	PRI

TXS – Texas Forest Service

OUTLOOK:

Weather Discussion: High pressure will bring dry weather to most of the West. The South will also be dry except for rain over the southern Appalachians and Florida. Hurricane Wilma is projected to make landfall late Sunday along the west coast of Florida.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southern California Morning low clouds and fog in the coastal areas, otherwise mostly sunny.	Mountains: 65 to 75. Valleys: 75 to 85. Upper deserts: 70 to 80. Lower deserts: 80 to 90.	20 to 40%.	Variable to 10 mph.

HAZARD MITIGATION THROUGH RISK MANAGEMENT

“Risk management doesn’t get in the way of doing the mission – it is the way we do the mission.” The Risk Management Process assists in ensuring that critical factors and risks of the fireline work environment are considered during decision making. Good risk management utilizes a five-step process:

● Step 1—Situational Awareness:

- Obtain information.
- Scout the fire.
- Identify hazards—those likely to result in a negative impact.
- Consider all aspects of current and future situations.
- Consider known historical problem areas (Apply information from the Fire Danger Pocket Card.).
- Recognize the need for action.
- Demonstrate ongoing awareness of fire assignment status.
- Note deviations.
- Attempt to determine why discrepancies exist with information before proceeding.

● Step 2—Hazard Assessment:

- Assess hazards to determine risks (e.g., fire behavior, snags, unburned fuels, work/rest).
- Use the Look Up, Down, and Around; and the Tactical Watch Outs (both located in the Incident Response Pocket Guide) to identify high-risk tactical hazards.
- Assess the impact of each hazard in terms of potential loss, cost, and mission/operational degradation based on probability and severity (probability—how likely an event will occur; severity—consequences if the event occurs). Keep in mind that increased exposure time increases probability.

● Step 3—Hazard Control:

- Determine the best approach to mitigate or control the risk from the hazards assessed.
- Establish controls (e.g., anchor point, LCES, utilize downhill checklist, limit exposure time).
- As control measures are developed, reevaluate each risk until it is reduced to a level where benefits outweigh potential costs.
