INCIDENT MANAGEMENT SITUATION REPORT TUESDAY, JUNE 6, 2006 – 0530 MDT NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationally with 129 new fires reported. Six new large fires (*) were reported, four in the Southern Area, and one each in the Southwest and Western Great Basin Areas. Three large fires were contained, two in the Southern Area, and one in the Southern California Area. Very high to extreme fire indices were reported in Montana, Arizona, Oklahoma, Texas, Colorado, Wyoming, Nebraska, New Mexico, Utah, and Nevada.

SOUTHERN AREA INCIDENTS/LARGE FIRES:

HEAT, Florida Division of Forestry. This fire is 21 miles west of Tamarac, FL in saw grass. Highway 27 was periodically closed due to smoke. Difficult terrain is hampering containment efforts. Active fire with moderate to high rates of spread was reported.

CHEKIKA, Everglades National Park. This fire is 12 miles northwest of Homestead, FL in saw grass. Two structures are threatened. Rapid rates of spread were observed.

ROAD 19, Florida Division of Forestry. This fire is 14 miles north of Panama City, FL in litter and understory. Rapid rates of spread and spotting were observed.

MULTIPLE PILE, Florida Division of Forestry. This fire is in Collier County in southern rough. Slow rates of spread were reported.

MNF - National Forests in Mississippi

WESTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:

HUMBOLDT VOL. ASSIST #1, Winnemucca Field Office, Bureau of Land Management. This fire is 12 miles southwest of Winnemucca, NV in sage brush and grass. Windy conditions and low humidity resulted in short and medium range spotting. Road closures and voluntary evacuations were implemented.

SOUTHWEST AREA INCIDENTS/LARGE FIRES:

LA BARRANCA, Tucson office, Arizona State. A transfer of command from a Type 2 Incident Management Team (Reinarz) back to the local unit has occurred. This fire is six miles east of Sedona, AZ in brush and pinyon pine. Steep terrain is hindering mop up in some areas. No fire activity was observed around the fire perimeter.

CUERVO, Las Vegas District, New Mexico State Forestry. This fire is 12 miles north of Santa Rosa, NM in grass and juniper. Smoldering was reported. Reduction in acreage is due to more accurate mapping.

TWIN, El Malpais National Monument. This fire is 30 miles south of Grants, NM in grass and timber. Line construction is being hampered by lava fields and deep duff pockets. No significant fire activity was reported.

OUTLOOK:

Red Flag Warning: For strong southwest winds in central and eastern interior of Alaska.

Fire Weather Watch: For strong south winds along the Copper River in Alaska.

Weather Discussion: The large high pressure ridge over the West will move slightly eastward today, allowing for moisture to increase mainly west of the Continental Divide. Mainly dry thunderstorms are expected over much of the Southwest, Colorado, and portions of the Great Basin. Dry conditions will continue mainly across the western panhandle of Florida. In Alaska, showers and cool temperatures are expected as a storm system moves across the state.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Western Great Basin Area	Tomporataroo	liamaty	
Mostly sunny becoming partly cloudy with isolated dry thunderstorms and gusty outflow winds.	North valleys: 82 to 97. South valleys: 92 to 112. Northern mountains: 72 to 82.
