

**INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, JULY 20, 2006 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4**

CURRENT SITUATION:

Initial attack activity was heavy nationally with 314 new fires reported. Seventeen new large fires (*) were reported, five in the Eastern Great Basin Area, four in the Northern Rockies and Rocky Mountain Areas, two in the Southern Area and one each in the Southwest and Western Great Basin Areas. Eight large fires were contained, two in the Rocky Mountain and Western Great Basin Areas, and one each in the Northern California, Southwest, Eastern Great Basin and Southern Areas. Very high to extreme fire indices were reported in Arizona, New Mexico, California, Colorado, Minnesota, Montana, Nebraska, Nevada, North Dakota, Oregon, South Dakota, Wisconsin, Idaho and Wyoming.

Two MAFFS C-130 aircraft and support personnel from the 145th Airlift Wing, Charlotte, North Carolina have been deployed to Klamath Falls, Oregon. Major Dan Cloninger, NCANG is the Mission Commander.

NORTHERN ROCKIES AREA INCIDENTS/LARGE FIRES:

PACKER GULCH, Southwestern Land Office, Montana Department of Natural Resources and Conservation. A Type 2 Incident Management Team (Kusicko) is assigned. This fire is 11 miles northwest of Drummond, MT in timber. Residences and other structures remain threatened. Moderate fire behavior with torching and spotting was observed.

BLACK PULASKI COMPLEX, Miles City Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Stanich) is assigned. This complex, consisting of the Black Pulaski, Lodgepole, Hill Coulee, Lost Creek, Square Butte, Soda Creek and Chalk Butte fires, is 25 miles north of Jordan, MT in ponderosa pine, grass, juniper and sagebrush. Several residences, structures, grazing lands and irrigation structures are threatened. Steep terrain, weather and dry fuels continue to impede containment efforts. Active fire behavior with torching and short runs was observed.

FLAT TIRE COMPLEX, Charles M. Russell National Wildlife Refuge. A Type 2 Incident Management Team (Turman) is assigned. This fire is 12 miles south of Glasgow, MT in pinyon pine, juniper and sagebrush. Isolated interior smokes were observed. Significant progress was made due to favorable weather conditions.

SOUTH PINE, Gallatin National Forest. A Fire Use Management Team (Hall) has been ordered. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning eleven miles northeast of Pray, MT in timber. Active burning with short-range spotting was reported.

MAJERUS, Southern Land Office, Montana Department of Natural Resources and Conservation. A Type 2 Incident Management Team (McNitt) is assigned. The Team is also managing the Bundy Railroad fire. This fire is 10 miles south of Roundup, MT in timber and grass. Minimal fire behavior with moderate to low rates of spread was reported.

WATT DRAW, Miles City Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Reid) is assigned. The Team is also managing the Sagebrush fire. This fire is 13 miles southeast of Ashland, MT in grass, timber and sagebrush. Residences and outbuildings remain threatened. Limited road access is hampering containment efforts. Smoldering, creeping, and occasional torching were observed.

SAGEBRUSH, Northern Cheyenne Agency, Bureau of Indian Affairs. This fire is two miles northwest of Ashland, MT in timber, grass and understory. Minimal fire behavior was observed.

BUNDY RAILROAD, Billings District, Bureau of Land Management. This fire is eight miles northeast of Worden, MT in timber, grass and sagebrush. Good progress was made on improving and holding the fireline. Isolated smoldering in heavy fuels was reported.

UL BEND, Charles M. Russell National Wildlife Refuge. A Type 2 Incident Management Team (Turman) is assigned. This fire is 60 miles northwest of Winnett, MT. Minimal fire behavior was observed.

BAR CREEK, Clearwater National Forest. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 26 miles northeast of Pierce, ID. This will be the last narrative report unless significant activity is reported.

MAGPIE, Yellowstone National Park. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning eighteen miles east of West Yellowstone, MT in lodgepole pine. Crowning, short-range spotting, and intense burning were observed. This will be the last narrative unless significant activity is reported.

BIRTHDAY 2, Crow Agency, Bureau of Indian Affairs. This fire is ten miles south of St. Xavier, MT in timber. Some hot spots within the perimeter were reported.

ROCKY MOUNTAIN AREA INCIDENTS/LARGE FIRES:

SAWMILL, Natrona County. A Type 2 Incident Management Team has been ordered. This fire is 10 miles east of Edgerton, WY in sagebrush, ponderosa pine, and juniper. Four residences, oil wells, telecommunications towers, and powerlines are threatened. Extreme fire behavior with major running, spotting and torching was observed.

STANDING ROCK COMPLEX, Standing Rock Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Mullenix) has been ordered. This fire is nine miles west of Fort Yates, ND in grass and down timber. Several residences, schools, and tribal resources are threatened. Evacuations have occurred. Very active fire behavior with short runs and crowning was observed.

LITTLE VENUS, Shoshone National Forest. A Type 2 Incident Management Team has been ordered. The fire is 30 miles west of Meeteetse, WY in bug-killed spruce with heavy down fuels. Structures remain threatened. Progress was made on containing the northeast side of the fire. Extreme fire behavior was reported.

TWENTY MILE, Casper Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Blume) is assigned. This fire is 20 miles northeast of Douglas, WY in grass, sagebrush, juniper and ponderosa pine. Several residences, buildings, and a natural gas well are threatened. Minimal fire behavior with interior torching and surface spread was observed.

BUFFALO CREEK COMPLEX, A Type 2 Incident Management Team (Reid) is assigned. This fire is three miles north of Leiter, WY in grass and sagebrush. Residences, natural gas wells, and powerlines are threatened. Moderate fire behavior with creeping, smoldering, and isolated short runs in light fuels were observed.

WEAVER, Ute Mountain Agency, Bureau of Indian Affairs. This fire is 10 miles southwest of Red Mesa, CO in pinyon pine, juniper, and sagebrush. Difficult terrain is hindering containment efforts. No further information was received.

VALENTINE, Nebraska Department of Forestry. This fire is north of Valentine, NE in timber. Approaching weather is a concern. No further information was received.

BLACK HORSE CREEK, South Dakota Wildland Fire Suppression Area. This fire is 20 miles east of Bison, SD in grass. Several residences and buildings are threatened. Very active fire behavior with 10 foot flame lengths was reported.

BOMBER BASIN – WFU, Shoshone National Forest. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. A Fire Use Management Team has been ordered. The fire is burning 15 miles south of Dubois, WY in timber. Single tree and group torching was observed.

EASTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:

QUARTZ CREEK, Payette National Forest. A Type 2 Incident Management Team has been ordered. This fire is six miles north of Yellowpine, ID in timber. Steep, rugged terrain is hindering containment efforts. Running crown fire in heavy timber with 50 foot flame lengths was observed.

TRAILHEAD, Sawtooth National Forest. This fire is 10 miles west-southwest of Stanley, ID in timber. Commercial property is threatened. Steep and rugged terrain is impeding containment efforts. Trails and backcountry closures are in effect. Active fire behavior with torching, spotting and running was reported.

DOG VALLEY, Fish Lake National Forest. A Type 2 Incident Management Team (Lund) is assigned. This fire is three miles east of Cove Fort, UT in grass, sagebrush, pinyon pine, juniper and oak. Four residences, the community of Cove Fort, Interstates 15 and 70, a natural gas pipeline, utility infrastructure and a historical site are threatened. Steep, rugged terrain and limited access are hindering containment. Moderate fire behavior was observed.

RANCH, Southwest Area, Utah State Division of Forestry Fire & State Lands. A Type 2 Incident Management Team (Brunner) is assigned. This fire is nine miles northeast of Leeds, UT in cheatgrass, brush, pinyon pine and juniper. Several residences remain threatened. Difficult access is impeding containment efforts. Moderate fire behavior with flame lengths up to eight feet was observed.

OAK CITY CANYON, South Central Area, Utah State Division of Forestry Fire & State Lands. A Type 2 Incident Management Team (Thomas) is assigned. This fire is two miles southeast of Oak City, UT in pinyon pine, juniper, grass, sagebrush and oak brush. Numerous residences and a campground remain threatened. Structure protection is in place. Steep terrain and dry fuels are impeding containment efforts. Creeping and short uphill fire runs were reported.

TWIN PEAKS, Richfield Field Office. This fire is 10 miles west of Kanosh, UT in grass, sagebrush, pinyon pine, and juniper. A ranch and powerlines are threatened. Winds from passing thunderstorms produced extreme fire behavior.

SOUTH, Salt Lake Field Office, Bureau of Land Management. This fire is twelve miles west of Grantsville, UT in cheatgrass and juniper. Inaccessible, rough and remote terrain is hindering containment efforts. Cultural resources are threatened. Smoldering and creeping with some isolated torching was observed.

GOOSEBERRY, Fishlake National Forest. This fire is ten miles southeast of Salina, UT in mountain mahogany, brush, pinyon pine and juniper. Heavy fuel loading is impeding containment efforts. Isolated torching and smoldering was reported.

LICK CREEK, Payette National Forest. A Fire Use Management Team (Hahnenberg) is assigned. The Team is also managing the Dunce WFU. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 25 miles northwest of McCall, ID in timber. Grazing allotments, the towns of Secesh, Warren and critical fishery habitat are threatened. Backing fire and occasional torching were reported.

KILN COMPLEX, Arizona Strip Field Office, Bureau of Land Management. This fire is 30 miles southwest of St. George, UT in brush and cheatgrass. The complex includes the Kiln, Lime, and White Rock Fires. Lime Kiln and Cabin Canyon Roads are closed. Creeping, smoldering and surface spread were reported.

SPRINGS, Moab District, Bureau of Land Management. This fire is seven miles north of Woodside, UT in timber. No new information was reported.

ST. JOHN, Wasatch Front Area, Utah State Division of Forestry Fire & State Lands. This fire is one mile north of St. John, UT in short grass and dormant brush. Interior torching and smoldering were observed. The fire received some precipitation.

DUNCE, Payette National Forest. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 31 miles east of Edwardsburg, ID in cheatgrass. A structure protection plan is in place for Taylor Ranch. Creeping and backing fire with short uphill runs were observed. The Lick Creek and Dunce fires will be combined into the Payette Complex.

JIM CREEK, Bridger Teton National Forest. A Fire Use Management Team (Weldon) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 24 miles north of Pinedale, WY in subalpine fir, spruce and pine. Minimal fire behavior with creeping ground fire and occasional torching was observed.

SOUTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:

HEART, San Bernardino National Forest. A Type 1 Incident Command Team (Molumby) is assigned. This fire is eight miles southwest of Big Bear Lake, CA in timber and brush. Steep terrain and thunderstorm down drafts are impeding containment efforts. Smoldering and some backing fire were reported. The Heart and Millard Complex will be combined into the Heart-Millard fire.

MILLARD COMPLEX, San Bernardino National Forest. A Unified Command between a Type 2 Incident Management Team (Walker), the California Department of Forestry and Fire Protection (CDF), the Forest Service, and the Riverside County Fire Department is in place. A transfer of command to a Type 1 Incident Management Team (Molumby) will occur today. This complex, comprised of the State, Jump Off, For Sure and Millard fires, is seven miles north of Cabazon, CA in chaparral and conifer. Residences and a repeater site, remain threatened. Minimal fire behavior was observed. Increase in acreage is primarily due to continuing burn out operations.

WESTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:

JACKASS, Humbolt-Toiyabe National Forest. A Type 1 Incident Management Team (Broyles) is assigned. This fire is 80 miles southeast of Reno, NV and eight miles northeast of Walker, CA in hardwood litter, pinyon pine and juniper. Winds from passing thunderstorms, rough terrain, and heavy fuel loading are hampering containment. Numerous residences remain threatened. Very active fire behavior with wind-driven runs was reported.

TROY PEAK, Humbolt-Toiyabe National Forest. This fire is eight miles north of Adaven, NV in timber. Steep, rocky terrain and inaccessibility are hindering containment efforts. Backing fire and smoldering were observed.

SOUTHWEST AREA INCIDENTS/LARGE FIRES:

CIBOLA, Cibola National Wildlife Refuge. A Type 2 Incident Management Team (Reinarz) has been ordered. This fire is 42 miles southwest of Yuma, AZ in chaparral and salt cedar. Numerous residences remain threatened. Interior torching was observed.

STONE, Fort Apache Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Philbin) is assigned. This fire is 16 miles northwest of Whiteriver, AZ in timber and chaparral. Steep, rugged terrain is hampering containment efforts. Creeping and smoldering and some individual torching within the perimeter were reported. Some precipitation was reported over the fire area.

RIM, Truxton Canon Agency. This fire is 15 miles south of the Grand Canyon Resort, on the Hualapai Reservation in sagebrush, grass, pinyon pine and juniper. Moderate fire behavior was reported.

THUMB, Truxton Canon Agency. This fire is 13 miles northeast of Supai, AZ in pinyon pine, juniper and grass. The fire is being monitored from the air. No further information was received.

POCKET, Kaibab National Forest. This fire is 18 miles southwest Jacob Lake, AZ in mixed conifer. Intermittent fire runs were reported.

NORTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:

CREEK, Lassen-Modoc Unit, California Department of Forestry and Fire Protection (CDF). This fire is five miles southwest of Susanville, CA in timber, brush and logging slash. Numerous residences are threatened. Difficult access, and steep terrain are hampering containment. Smoldering with some flare-ups was reported.

GREASE, Plumas National Forest. A Type 2 Incident Management Team (Sinclear) is assigned. This fire is 12 miles north of Beckwourth, CA in heavy brush and timber. No further information was received.

CARIBOU COMPLEX, Klamath National Forest. A Wildland Fire Use Management Team (Perkins) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning ten miles southeast of Cecilville, CA in timber. There are two fires in the complex, the Caribou and the Moraine. Trail closures are in effect for the Caribou Lakes area. Fire activity was minimal.

OUTLOOK:

Red Flag Warning: For the Big Horn Mountains for shifting winds, low relative humidity and increasing thunderstorms.

Fire Weather Watch: Thursday afternoon through the evening for all of northeast, south central and southeast Montana and portions of northwest South Dakota for isolated to scattered thunderstorms with erratic and gusty winds and wind shift associated with a frontal passage.

Weather Discussion: Isolated dry lightning is possible over portions of northern California, the northern Great Basin and eastern Montana with scattered wet storms across the Southwest. Gusty winds are expected over eastern Montana and the western Dakotas with cooler and drier weather across most of Minnesota. High pressure will strengthen over the western U.S. during the next few days with temperatures rising to near record levels across portions of the Pacific Northwest and Great Basin accompanied by some isolated dry lightning over the weekend.

| Geographic Area Weather | High Temperatures | Minimum Relative Humidity | Wind |
|---|---|--|--|
| Northern Rockies Area A shortwave trough will move across Montana into the western Dakotas providing variable cloudy skies, breezy and seasonal conditions. This piece of Pacific energy will provide some afternoon thunderstorm activity across eastern Montana and into western North Dakota by evening. Continued dry for areas west of the divide. | West of divide: 83 to 87. East of divide: 84 to 90. North Dakota: 82 to 88. | West of divide: 20 to 25%. East of divide: 25 to 35%. North Dakota: 28 to 35%. | West of divide: West 10 to 15 mph East of divide: Southeast 10 to 15mph shifting North 15 to 25 mph. North Dakota: Easterly 10 to 20 mph |

| | | | |
|---|---|---|--|
| <p>Rocky Mountain Area Scattered thunderstorms, mainly along and east of the divide.</p> | <p>90s to around 100. 80s in the mountains.</p> | <p>10 to 20% west of the divide, 20 to 30% east of the divide.</p> | <p>West 5 to 15 mph west of the divide. East to southeast 5 to 15 mph east of the divide.</p> |
| <p>Eastern Great Basin Area Idaho, Bridger-Teton: Partly cloudy. Isolated afternoon thunderstorms in western Wyoming. Northern Utah: Partly cloudy with isolated showers and thunderstorms in the west, scattered showers and thunderstorms in the east. Southern Utah, Arizona Strip: Partly cloudy with scattered showers and thunderstorms.</p> | <p>Idaho, Bridger-Teton: 70 to 85 mountains, 86 to 98 valleys. Northern Utah: 77 to 88 mountains, 89 to 100 valleys. Southern Utah, Arizona Strip: 75 to 86 mountains, 87 to 106 valleys, 107 to 115 low deserts.</p> | <p>Idaho, Bridger-Teton: 22 to 34% mountains, 11 to 21% valleys. Northern Utah: 21 to 31% mountains, 11 to 20% valleys. Southern Utah, Arizona Strip: 28 to 40 to % mountains, 14 to 27% valleys.</p> | <p>Idaho, Bridger-Teton: West/Northwest 8 to 13 mph. Northern Utah: Western portions: West 10 to 20 mph. Eastern portions: upslope/upvalley 5 to 10 mph. Southern Utah, AZ Strip: Western portions: upslope/upvalley 5 to 10 mph Eastern portions: Southwest 10 to 20 mph.</p> |
| <p>Southern California Area Patchy morning low clouds and fog coastal areas, otherwise mostly sunny, except becoming partly cloudy with a few thunderstorms over the mountains and deserts.</p> | <p>85 to 100 mountains. 95 to 105 valleys. 100 to 105 upper deserts. 110 to 115 lower deserts.</p> | <p>40 to 60% coastal areas 20 to 30% valleys 20 to 30% mountains 10 to 20% deserts</p> | <p>Southeast to southwest 5 to 15 mph.</p> |
| <p>Western Great Basin Area Partly to mostly sunny across the northwestern corner of the state with isolated to scattered thunderstorms elsewhere.</p> | <p>Northern valleys: 91 to 105. Southern valleys: 92 to 114. Northern mountains: 82 to 93. Southern mountains: 80 to 90.</p> | <p>Northern valleys: 11 to 22%. Southern valleys: 14 to 24%. Northern mountains: 15 to 30%. Southern mountains: 24 to 34%.</p> | <p>Southwest to northwest at 5 to 15 mph, stronger gusts near thunderstorms.</p> |
| <p>Southwest Area Partly cloudy most areas, except mostly sunny far eastern New Mexico and west Texas. Scattered showers and thunderstorms across central and eastern Arizona into western New Mexico. Elsewhere, isolated convective activity expected.</p> | <p>90 to near 113 lower elevations. 70 to 90 in the higher terrain.</p> | <p>15 to 25% most lower elevations, 20% to 35 higher elevations.</p> | <p>Light and variable across Arizona. South to southeast from 10 to 20 mph for New Mexico and west Texas. Erratic and gusty in and around thunderstorms.</p> |
| <p>Northern California Area Mostly sunny. Becoming partly cloudy near the mountains of the southern 2/3 of the Geographic Area in the afternoon with a 30% chance of thunderstorms. Dry lightning is possible with these storms.</p> | <p>60s and 70s coast, 80s and 90s mountains, to 107 warmest interior valleys.</p> | <p>12 to 20% east of the Cascade-Sierra crest and 15 to 25% elsewhere inland areas.</p> | <p>Coast: SW to NW 5 to 15 mph with afternoon gusts to 25 mph. Elsewhere, SE to SW 5 to 10 mph with afternoon gusts to 20 mph.</p> |

| | | | |
|--|--|---|--|
| Eastern Area Showers and thunderstorms likely across the northern 2/3 of Indiana, southeast Missouri, Illinois, the Lower Peninsula of Michigan, northern Ohio, far northwestern Pennsylvania, and western New York. Scattered showers and storms over the eastern Mid-Atlantic and far southeastern Northeast states. Fair elsewhere. | 77 to 82 over the northern Great Lakes and northern Northeast states. 100 to 104 across southern Missouri. 82 to 94 elsewhere. | 29 to 34% across southern Missouri. 35 to 42% over the western Great Lakes and Iowa. 40 to 55% elsewhere. | Northwest at 10 to 18 mph across the northwest and north central Great Lakes. Light to moderate winds elsewhere. |
| Northwest Area Sunny, dry and warmer. | West of Cascades: mid 80s to lower 90s. East of Cascades: mid 90s. | West of Cascades: 17 to 22% East of Cascades: 10 to 15% | Northwest 5 to 10 mph becoming upslope/upvalley in the afternoon. |
| Southern Area No information reported. | | | |

Radio Narrowbanding

The ability to have positive, reliable communication is one of the most important safety considerations we have in Wildland fire. As we are forced to adapt to technological changes, maintaining good radio communications becomes more complex and requires a heightened level of skill and awareness from all firefighters. The following are some facts and suggestions that may make radio communications easier

- Federal Agencies are under a congressional mandate to narrowband their frequencies by January 1, 2005. State and municipal agencies will not have to follow suit until the year 2013. For firefighters trying to determine if a frequency will be narrowbanded or not, this means that it is probably a good bet that Federal frequencies (those frequencies between 162.0000 and 174.0000 MHz) are.
- Operating your radio in the wideband mode while working in a narrowband environment may cause radio communication problems for everyone working on that channel. The symptoms may range from distorted transmissions to no transmission at all.
- Before we were mandated to work in narrowband, frequencies were listed with just three digits past the decimal point. It is imperative that we now convey frequencies with four digits past the decimal point, for example 168.xxxx
- Some firefighters mistakenly believe that if they simply punch in four numbers past the decimal point, the channel will then be narrowbanded. This is not true! Each channel must be programmed specifically to operate in wideband or narrowband. Narrowband programming instructions for most handheld radios can be found at www.radios.nifc.gov
- Check your frequency guides, plans and maps to see which mode the frequencies are supposed to be operating on. If these don't have the information you need, find it and make pen and ink notes for yourself.
- If available, have a radio technician check your radio to ensure you are operating in the proper mode on the assigned frequencies.
- Discuss the narrow/wide band concept with all firefighters, managers and pilots.
