# INCIDENT MANAGEMENT SITUATION REPORT MONDAY, AUGUST 7, 2006 - 0530 MDT <br> NATIONAL PREPAREDNESS LEVEL 5 

## CURRENT SITUATION:

Initial attack activity was light nationally with 181 new fires reported. Three new large fires (*) were reported, two in the Eastern Great Basin Area, and one in the Southern California Area. Eight large fires were contained, three in the Northern Rockies Area, two in the Eastern Great Basin Area, and one each in the Southern Area, Rocky Mountain and Northern California Areas. Very high to extreme fire indices were reported in Arkansas, Arizona, California, Idaho, Minnesota, Montana, Nebraska, Nevada, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Washington and Wyoming.

Two MAFFS C-130 aircraft and support personnel from the $153^{\text {rd }}$ Airlift Wing ANG, Cheyenne, Wyoming are deployed to Klamath Falls, Oregon. Lt. Col. Michael Exstrom is the Mission Commander. Two MAFFS C-130 aircraft and support personnel from the $146{ }^{\text {th }}$ Airlift Wing ANG, Channel Islands, California are deployed to Boise, Idaho. Maj. Glen Bourne is the Mission Commander.

## NORTHWEST AREA INCIDENTS/LARGE FIRES:

An Area Command Team (Loach) is assigned to manage the Tripod Complex, Flick Creek, and Tin Pan fires.

TRIPOD COMPLEX, Okanogan-Wenatchee National Forest. A Type 1 Incident Management Team (Custer) and a Washington Interagency Type 2 Incident Management Team (LaFave) are assigned. This complex, comprised of the Spur Peak and Tripod fires, is seven miles northeast of Winthrop, WA in beetle-killed timber and heavy ground fuels. Numerous residences and structures remain threatened. Group tree torching, crown runs and spotting were reported.

FLICK CREEK, North Cascades National Park. A Washington Interagency Type 2 Incident Management Team (Jennings) is assigned. The Team is also managing the Tin Pan Wildland Fire Use incident. This fire is three miles southeast of Stehekin, WA in ponderosa pine, Douglas fir and grass. Smoldering and creeping were observed.

MAXWELL, Ochoco National Forest. A Washington Interagency Type 2 Incident Management Team (Reed) is assigned. This fire is six miles south of Mitchell, OR in heavy dead and down timber. A residence, communications equipment and the water pipeline for the city of Mitchell remain threatened. Steep terrain and limited access are hampering containment efforts. Burnout operations are ongoing. Moderate fire activity was observed.

BLACK CRATER, Deschutes National Forest. A Type 1 Incident Management Team (Quesinberry) is assigned. This fire is seven miles southwest of Sisters, OR in white fir and lodgepole pine. Fire activity was limited to the interior.

TIN PAN, Okanogan-Wenatchee National Forest. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning seven miles west
of Lucerne, WA in timber. Hiking trails within the fire area remain closed. Group torching, spotting, and moderate upslope runs were observed.

FOSTER GULCH COMPLEX, Wallowa-Whitman National Forest. A transfer of command from a Type 1 Incident Management Team (Anderson) back to the local unit occurred yesterday. This Complex, consisting of the McClean and Foster Gulch fires, started on Bureau of Land Management land six miles southeast of Halfway, OR in grass, brush and mixed conifers. Surface spread, smoldering and creeping were observed.

BEAR GULCH II, Olympic National Forest. This fire is 15 miles northwest of Hoodsport, WA in timber. Steep, rocky terrain is hampering containment efforts. A major access point to the Olympic National Park is closed. Perimeter growth on the east and west flanks was reported.

## NORTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:

ORLEANS COMPLEX, Six Rivers National Forest. A Type 2 Incident Management Team (Blume) is assigned. The Orleans complex, comprised of the Somes, and Buck fires, is four miles southwest of Orleans, CA in timber and dead and down fuels. Numerous structures, significant cultural and spiritual sites, and the municipal watershed for the community of Orleans remain threatened. Limited road access, steep terrain and snags are hindering containment efforts. Short uphill runs and spotting were observed.

BAR COMPLEX, Shasta-Trinity National Forest. A Type 1 Incident Management Team (PinchaTulley) is assigned. This complex, comprised of four fires, is 40 miles northwest of Redding, CA in timber and grass. Residences, outbuildings, power lines, municipal watersheds and wildlife habitat remain threatened. Difficult access is hampering containment efforts. Short uphill runs with isolated torching were reported.

UNCLES COMPLEX, Klamath National Forest. A Type 2 Incident Management Team (Sinclear) is assigned. This complex, comprised of the Uncles, Rush, and Hancock fires, is 18 miles northeast of Orleans, CA in brush and old growth forest. Residences and outbuildings remain threatened, and structure protection is in place. Steep terrain and difficult access is hampering containment efforts. Slow backing fire was reported.

HAPPY CAMP, Klamath National Forest. A Type 2 Incident Management Team (Bradley) is assigned. This complex, comprised of 11 lightning caused fires, is near Happy Camp, CA in grass and timber. Limited access is hampering containment efforts. Marble Mountain Wilderness is
under a closure order. Active fire with moderate rates of spread, individual torching, and uphill runs was reported.

HUNTER, Mendocino National Forest. A Type 2 Incident Management Team (Philbin) is assigned. This fire is 19 miles southeast of Covelo, CA in timber. Structures and wildlife habitat remain threatened. Short uphill runs with some torching and interior smoldering were observed.

PANTHER, Six Rivers National Forest. This fire is 14 miles west of Big Bar, CA in timber and brush. A watershed and historic cabin remain threatened. Remote access and steep slopes are hampering containment efforts. Minimal fire activity with occasional torching was reported.

NORTHERN ROCKIES AREA INCIDENTS/LARGE FIRES:
BIG CREEK, Central Land Office, Montana Department of Natural Resources and Conservation. A Type 2 Incident Management Team (Reid) is assigned. This fire started on private land 29 miles southwest of Livingston, MT in timber, grass, and sagebrush. Numerous residences remain threatened. Creeping and smoldering in heavy fuels with individual and group tree torching were observed.

RED EAGLE, Glacier National Park. A Type 1 Incident Management Team (Stanich) is assigned. This fire is one mile southwest of St. Mary, MT in spruce and fir. Short to moderate runs with torching and spotting in Divide and Red Eagle Creek drainages were observed.

GASH CREEK, Bitterroot National Forest. A Type 2 Incident Management Team (Turman) is assigned. This fire is six miles south of Victor, MT in timber. Residences remain threatened. Rough terrain and difficult access continue to hamper containment efforts. Creeping and smoldering with individual and group tree torching were reported.

KURBY, Craig Mountain Area Office, Idaho Department of Lands. The fire is six miles west of Lenore, ID in timber and farmland. Occasional tree torching was observed.

SOUTH PINE, Gallatin National Forest. This fire is 13 miles south of Livingston, MT in timber. Steep, rugged terrain continues to impede containment efforts. Isolated hotspots with occasional flare-ups and torching were observed.

MAGPIE, Yellowstone National Park. This previously reported lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning seven
miles west of Madison Junction, WY in lodgepole pine. No further information was received. This will be the last narrative report unless significant activity occurs.

## EASTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:

STONE 2, Caribou-Targhee National Forest. This fire is five miles southwest of Holbrook, ID in grass, pinyon pine and juniper. Thunderstorm downdrafts contributed to extreme fire behavior.

OZONE, Idaho Falls District, Bureau of Land Management. The fire started on private land 12 miles southeast of Idaho Falls, ID in timber, grass, and brush. Extreme fire behavior was reported. Commercial property and a wind farm are threatened.

POTATO, Salmon-Challis National Forest. A Type 1 Incident Management Team (Broyles) is assigned. This fire is seven miles north of Stanley, ID in grass and timber. Structures, fisheries, power lines and recreation sites remain threatened. Short upslope runs, group torching and backing fire were observed.

BURNT, Boise National Forest. A Type 2 Incident Management Team (Saleen) is assigned. This fire is 24 miles northeast of Cascade, ID in subalpine fire and lodgepole pine. Steep terrain and heavy dead and down timber continues to impede containment efforts. Isolated tree torching and short range spotting were observed.

LICK CREEK, Payette National Forest. A Fire Use Incident Management Team (Bonefeld) is assigned. The Team is also managing the Dunce and Rainbow incidents. This lightning caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 21 miles northwest of McCall, ID in timber. Smoldering and creeping were reported.

DUNCE, Payette National Forest. This lightning caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 31 miles east of Edwardsburg, ID in grass and timber. Structure protection measures remain in place in Cabin Creek drainage. Minimal fire activity was observed.

RAINBOW, Payette National Forest. This lightning caused incident is being managed under a confine/contain strategy. The fire is burning 13 miles east of McCall, ID in subalpine fir. Creeping and smoldering fire activity was observed.

INTERCHANGE, Richfield Field Office, Bureau of Land Management. This fire is one mile south of Cove Fort, UT in grass and sagebrush. Interstate 15 was temporarily closed. Running fire activity was reported.

## ROCKY MOUNTAIN AREA INCIDENTS/LARGE FIRES:

LITTLE CANYON CREEK, Wyoming State Forestry. The fire is 22 miles south of Ten Sleep, WY in juniper, sage and grass. Cabins and residences are threatened. Rugged and steep terrain are hampering control efforts. Running, crowning and spotting were observed.

BULL CREEK COMPLEX, Cheyenne River Agency, Bureau of Indian Affairs. This fire is five miles north of Takini, SD in grass and open timber. The community of Red Scaffold is threatened. Smoldering was observed.

WHITE OWL, South Dakota Division of Forestry. This fire is four miles east of White Owl, SD in grass, cedar and juniper. Isolated spot fires and smoldering were reported.

SIOUX COUNTY COMPLEX, Nebraska Department of Forestry. This complex, comprised of the Thayer, Old Aker and Rudloff fires, is three miles northeast of Harrison, NE in timber and grass. Smoldering fire activity was observed.

## OUTLOOK:

Red Flag Warning: For Monday afternoon and evening across parts of central Nevada for gusty winds and low relative humidity. Issued for lightning in dry fuels in northeast Oregon mountains.

Fire Weather Watches: In effect Monday afternoon through Tuesday evening across western Montana and north central Idaho for lightning from dry and wet thunderstorms after a prolonged dry period. During the afternoon and evening across southwest and south central North Dakota, northwest South Dakota and southeast Montana for gusty south winds and low relative humidities. Issued for Monday afternoon and evening across parts of northern and southern Nevada for gusty winds and low relative humidity. For Monday afternoon and evening for winds and dry relative humidity in northeast Wyoming and central/western South Dakota. For the west central Idaho mountains for gusty south winds and low relative humidity. For lightning and dry fuels in the Oregon Cascades. For southwest and south central Oregon for lightning and dry fuels. For Monday evening for lightning and dry fuels in the Columbia Basin and northeast Washington mountains.

Weather Discussion: The upper low off the California coast will move inland today over northern California and the Pacific Northwest. This will bring a significant increase in thunderstorm activity to northern California, the Pacific Northwest, Idaho and western Montana. In addition, gusty winds are expected over Nevada.

| Geographic Area <br> Weather | High <br> Temperatures | Minimum Relative <br> Humidity | Wind |
| :--- | :--- | :--- | :--- |
| Northwest Area <br> High Risk for Large <br> Fires...Thunderstorms <br> spreading northward along <br> the Cascades and eastern <br> Oregon into parts of <br> eastern Washington <br> overnight. | Mostly 80s and 90s locally <br> to 100. Upper 70s higher <br> mountains and coastal <br> areas. | West of Cascades: <br> Generally 35\% to 55\%. <br> East of Cascades: mostly <br> 10 to 20 except 20 to 35 in <br> south central Oregon. | Variable 5 to 12 mph. |

| Eastern Great Basin Area Idaho, Bridger-Teton: <br> Partly cloudy with isolated afternoon mountain thunderstorms, gusty ridgetop winds in the west central mountains. <br> Northern Utah: <br> Partly cloudy with scattered showers and thunderstorms. <br> Southern Utah, Arizona Strip: <br> Partly cloudy with isolated valley and scattered mountain showers and thunderstorms. | Idaho, Bridger-Teton: 76 to 88 mountains, $89 t$ o100 valleys. Northern Utah: 75 to 87 mountains, 88 to 97 valleys. Southern Utah, Arizona Strip: <br> 72 to 85 mountains, 85 to 100 valleys, 100 to 106 low valleys. | Idaho, Bridger-Teton: 20 to 30 mountains, 8 to $19 \%$ valleys. Northern Utah: 25 to 40 mountains, 15 to 25 valleys. <br> Southern Utah, Arizona Strip: <br> 25 to 40 mountains, 14 to 24 valleys, 8 to 16 low valleys. | Idaho, Bridger-Teton: South/southeast 8 to 10 mph , with higher gusts along west central mountain ridgetops. <br> Northern Utah: <br> South 15 mph in the west, upslope/upvalley in the east. Southern Utah, AZ Strip: <br> South/southwest 15 mph . |
| :---: | :---: | :---: | :---: |
| Rocky Mountain Area Scattered afternoon thunderstorms in southern/central Colorado, Kansas, and Nebraska. Isolated thunderstorms extending into southeast Wyoming and western South Dakota. | Mid to upper 80s in Colorado, southern Wyoming and Nebraska; near 90 in northern Wyoming and South Dakota, and near 100 in Kansas. | 10 to 20 in the lower elevations of Wyoming and central South Dakota, with higher values elsewhere. | The strongest winds are anticipated from 15 to 25 mph out of the southeast in western South Dakota into northeast Wyoming. |
| Eastern Area <br> Showers and thunderstorms likely across southern lowa, and northern portions of Missouri, Illinois, and Indiana. A chance of showers and storms over the Northeast and MidAtlantic states. Fair elsewhere. | 74 to 82 across the Great Lakes as well as the Northeast states. 93 to 99 over Missouri and southern parts of Illinois and Indiana. 82 to 92 elsewhere. | 32 to 37 across northern Minnesota and southern Missouri. Greater than 37 elsewhere. | Southwest winds at 10 to 20 mph across the Northeast states becoming northwest late Monday and into the evening. Light to moderate winds elsewhere. |
| Western Great Basin Area <br> Partly to mostly sunny and breezy with isolated thunderstorms across parts of northwestern Nevada and possibly far eastern Elko county. Some of the storms will produce dry lightning. | Northern Valleys: 80 to 98 Southern Valleys: 90 to 112 <br> Northern Mountains: 69 to 95 <br> Southern Mountains: 76 to 86. | Northern Valleys: 3 to 17 <br> Southern Valleys: 7 to 15 <br> Northern Mountains: 7 to 26 <br> Southern Mountains: 10 to 20. | South to west at 5 to 20 mph with gusts of 30 to 40 mph in the watch/warning areas. |

## Wildland Urban Interface Hazards

Firefighters in the wildland urban interface may encounter hazards other than the fire itself, such as hazardous materials, utility lines and poor access.

- Hazardous Materials
- Common chemicals used around the home may be a direct hazard to firefighters from flammability, explosion potential and/or vapors or off-gassing. Such chemicals include paint, varnish and other flammable liquids; fertilizer; pesticides; cleansers; aerosol cans, fireworks, batteries and ammunition. In addition, some common household products such as plastics may give off very toxic fumes when they burn. Stay OUT of the smoke from burning structures and any unknown sources such as trash piles.

Illicit Activities

- Marijuana plantations or drug production labs may be found in wildland urban interface areas. Extremely hazardous materials such as propane tanks and flammable/toxic chemicals may be encountered, as well as booby traps.

Propane tanks

- Both large (household size) and small (gas grill size) liquefied propane gas (LPG) tanks can present hazards to firefighters, including explosion. See the "LPG Tank Hazards" discussion for details.

Utility lines

- Utility lines may be located above and below ground and may be cut or damaged by tools or equipment. Don't spray water on utility lines or boxes.

Septic tanks and fields

- Below-ground structures may not be readily apparent and may not support the weight of engines or other apparatus.

New construction materials

- Many new construction materials have comparatively low melting points and may "offgas" extremely hazardous vapors. Plastic decking materials that resemble wood are becoming more common and may begin softening and losing structural strength at $180^{\circ} \mathrm{F}$, though they normally do not sustain combustion once direct flame is removed. However, if they continue to burn they exhibit the characteristics of flammable liquids.

Pets and livestock

- Pets and livestock may be left when residents evacuate and will likely be highly stressed, making them more inclined to bite and kick. Firefighters should not put themselves at risk to rescue pets or livestock.

## Evacuation occurring

- Firefighters may be taking structural protection actions while evacuations of residents are occurring. Be very cautious of people driving erratically. Distraught residents may refuse to leave their property, and firefighters may need to disengage from fighting fire to contact law enforcement officers for assistance. In most jurisdictions firefighters do not have the authority to force evacuations. Firefighters should not put themselves at risk trying to protect someone who will not evacuate!

Limited access

- Narrow one-lane roads with no turn-around room, inadequate or poorly maintained bridges and culverts are frequently found in wildland urban interface areas. Access should be sized-up and an evacuation plan for all emergency personnel should be developed.
