## Predictive Services Discussion

Windy conditions are expected over portions of the Northwest, California, Great Basin, Montana and Wyoming Saturday. A low pressure system moving across the Northwest this weekend will bring windy and cooler weather along with higher humidity. Thunderstorms should become wetter and shift eastward this weekend. Conditions for much of the West will moderate Sunday before warmer and drier weather returns early next week.

## ESCAPE ROUTES

An escape route is a preplanned and understood route to reach a safety zone.

- What are the primary concerns in choosing an escape route?
-     - Select the closest, least obstructed route.
- Plan for more than one escape route.
- Avoid an uphill escape.
- Scout and clearly mark the route for visibility (aids during smoky situations or night operational periods).
- Determine escape time--consider slowest person, fatigue, and temperature factors.
- Continuously reassess the situation with regard to work progress and additional resource arrivals.
- Assure all line personnel are familiar with escape routes.
