National Interagency Coordination Center Incident Management Situation Report Friday, March 23, 2007 - 1000 MDT National Preparedness Level 1

National Fire Activity (Weekly Total)

Initial attack activity:Heavy (2,536 new fires)New large fires:28 (*)Large fires contained:21Uncontained large fires:9Area Command Teams:9Type 1 IMTs committed:7Type 2 IMTs committed:5Fire Use Teams:**** Uncontained large fires do not include WFU or confine/contain incidents.**

<u>Southern Area (PL 2)</u>	
New fires:	2,374
New large fires:	25
Uncontained large fires:	9

Cowhouse 07-1, Okefenokee NWR. Five miles southeast of Waycross, GA. Southern rough. Running and spotting. Recreation facility and structures threatened. Line improvement and burnout operations ongoing.

Bass Lake, Big Cypress National Preserve. Two miles northeast of Ochopee, FL. Southern rough and cypress. Monitor.

Keener Point, Daniel Boone NF. Eight miles northeast of McKee, KY. Hardwood litter. Wind driven runs.

Ben Smith Hollow, Oklahoma DOF. Two miles northeast of Kenwood, OK. Timber. Running, spotting and torching. Municipal watershed threatened. Burnout operations ongoing.

Brantley Cabin, Oklahoma DOF. Thirteen miles north of Eagletown, OK. Grass and timber understory. Burnout operations ongoing.

Horseshoe, Oklahoma DOF. Five miles north of Hulbert, OK. Timber. Running and short range spotting. Burnout operations ongoing.

McCurtain Turkey, Oklahoma DOF. Three miles southeast of McCurtain, OK. Hardwood litter. No further information.

Blair Mountain, Oklahoma Department of Forestry. Thirteen miles southeast of Tahlequah, OK. Hardwood litter. No new information.

Dry Creek, Oklahoma Department of Forestry. Hardwood timber. No new information.

Predictive Services Discussion: Dry conditions will persist over Florida and much of the southeastern states. A brief, weak high pressure ridge will build over southern California through the weekend with above normal temperatures and lowering humidity ahead of the next low pressure trough. Strong winds are expected over the Southwest and southern Plains mid next week, however current and expected rainfall ahead of the winds should limit fire potential.

DOWNHILL FIRELINE CONSTRUCTION CHECKLIST

Downhill fireline construction is hazardous in step terrain, fast-burning fuels, or rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative. When building downhill fireline, the following is required:

- Crew supervisor(s) and fireline overhead will discuss assignments prior to committing crew(s). Responsible overhead individual (TFLD or ICT4 qualified or better) will stay with job until completed.
- Decision will be made after proposed fireline has been scouted by supervisor(s) of involved crew(s).
- LCES will be coordinated for all personnel involved.
 - Crew supervisor(s) is in direct contact with lookout who can see the fire.
 - Communication is established between all crews.
 - Ensure rapid access to safety zone(s) in case fire crosses below crew(s).
- Direct attack will be used whenever possible; if not possible, the fireline should be completed between anchor points before being fired out.
- Fireline will not lie in or adjacent to a chute or chimney.
- Starting point will be anchored for crew(s) building fireline down from the top.
- Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.
