# National Interagency Coordination Center Incident Management Situation Report <br> Sunday, July 8, 2007-0800 MDT <br> National Preparedness Level 3 

National Fire Activity

Initial attack activity:
New large fires:
Large fires contained:
Uncontained large fires:

Heavy (419 new fires)
24 (*)
13
55
Area Command Teams committed:
NIMOs committed:
Type 1 IMTs committed: 6
Type 2 IMTs committed: 13
Fire Use Teams committed: 3
** Uncontained large fires do not include WFU or confine/contain incidents. **

## Eastern Great Basin Area (PL 5)

New fires: 72
New large fires: 4
Uncontained large fires: 14
Type 1 IMTs committed: 2
Type 2 IMTs committed: 2
Fire Use Teams committed: 1

Mathis, Southeast Area, Utah State Division of Forestry Fire \& State Lands. IMT 2 (Harvey). Nine miles north of Price, UT. Grass, juniper and timber. Extreme fire behavior. Numerous residences and a coal mine threatened. Evacuations in effect.

Milford Flat, Southwest Area, Utah State Division of Forestry Fire \& State Lands. IMT 1 (Muir). Three miles north of Milford, UT. Grass. Extreme fire behavior. Numerous structures, a natural gas pipeline and geo-thermal power plant threatened. Evacuations in effect. Interstate 15 closure in effect.

Jungle, Manti-Lasal NF. FUMT (Ourada/Soper). Thirteen miles west of Ferron, UT. Timber litter. Isolated torching and spotting. Residences remain threatened.

Neola North, Uintah and Ouray Agency, BIA. IMT 1 (Martin). Three miles north of Neola, UT. Brush and timber. Torching and spotting. Municipal watershed remains threatened. Minimal fire behavior.

Black Pine 2, Sawtooth NF. Eleven miles southeast of Malta, ID. Grass and brush. Rapid rates of spread. Structures threatened.

Red Bridge, Twin Falls District, BLM. Ten miles south of Shoshone, ID. Minimal fire activity.
Black Rock Gulch, Arizona Strip Field Office, BLM. IMT 2 (Lund). Thirty miles south of St. George, UT. Timber litter and grass. Active fire behavior with torching and short runs. Communications site and structures remain threatened.

Warm Springs, Payette NF. Four miles north of Weiser, ID. Running. Structures threatened. Evacuations in effect.

Spring, Payette NF. Four miles north of Weiser, ID. Grass. Running. Structures threatened.
Boulder Creek, Boise District, BLM. Forty-eight miles south of Silver City, ID. Grass, brush and juniper. Running.
Jim Sage, Twin Falls District, BLM. Eight miles southwest of Malta, ID. Grass and brush. Active fire behavior.
Bald Mountain, Boise District, BLM. Forty-five miles south of Silver City, ID. Grass and brush. Active burning.
Crutcher, Boise District, BLM. Forty-nine miles south of Silver City, ID. Grass and brush. Active burning.
Red Canyon, Boise District, BLM. Forty-five miles south of Silver City, ID. Grass and brush. Active burning.

Predictive Services Discussion: Cooler conditions continue across the West today as the high pressure ridge weakens. The potential for thunderstorms continues over the northern Sierra, southern Great Basin, and western Rocky Mountain areas; however, coverage of storms will be less than in previous days. Gusty winds will continue over the interior of southern California across the extreme southern Great Basin and northwest Arizona. The northern and central interior of Alaska will see continued warm weather with very low humidity along with widespread thunderstorms. The Southeast will have scattered thundershowers today.

## NFDRS Pocket Cards

An aid to identifying local fuels conditions that might contribute to severe fire behavior is the NFDRS Pocket Card. The Pocket Card displays a general assessment of the fire potential compared to local fire occurrence and historical fire danger. It is a tool that can be used to track daily outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season for a local area.

- The Pocket Card provides:
- A general indicator of the potential for exteme fire behavior and difficulty of control.
- A graph to show the trend and status of the current year's fire season.
- A comparison of current year's conditions to historical worst and average conditions.
- Fire danger values related to past large fires.
- Locally significant values for temperature, humidity, wind speed, and more.

Discuss the following ways to use the Pocket Card:

- Use it primarily before fires occur, before arriving to a fire, and during initial stages of fire events, such as initial fire size-up, initial attack, and extended attack.
- Use the Pocket Card to track local fire danger and in so doing increase the safety of your firefighters through increased awareness of fire danger conditions. NOTE: If fire danger is running at or above seasonal highs, be alert to those weather conditions that can lead to extreme fire behavior; e.g., low RH, 1-hour fuel moisture less than $5 \%$, high temperatures, moderate to high winds.
- Use it to track daily fire dangers so that there are no surprises when extreme fire behavior occurs.
- Use it to supplement local experience.
- Use the Pocket Card as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive your fire assignment outside your local area, visit the National Pocket Card website at http://famweb.nwcg.gov/pocketcards/. Click on the map and locate a Pocket Card for the area to which you are going.
- Put the Card in the Pocket of all your firefighters and keep a copy in your fire vehicle.
- Post the card in dispatch. Use them in briefings. Provide them to incoming crews.
- Do not use the PocketCard for site specific fire behavior predictions and fireline actions.
