# National Interagency Coordination Center Incident Management Situation Report Thursday, July 12, 2007-0530 MDT <br> National Preparedness Level 4 

| National Fire Activity |  |
| :--- | :---: |
| Initial attack activity: | Heavy (336 new fires) |
| New large fires: | 9 (*) |
| Large fires contained: | 8 |
| Uncontained large fires: | 39 |
| Area Command Teams committed: |  |
| NIMOs committed: | 1 |
| Type 1 IMTs committed: | 6 |
| Type 2 IMTs committed: | 15 |
| Fire Use Teams committed: | 0 |
| ** Uncontained large fires do not include WFU or confine/contain incidents. ** |  |

## Eastern Great Basin Area (PL 5)

New fires: 18
New large fires: 3
Uncontained large fires: 12
Type 1 IMTs committed: 2
Type 2 IMTs committed: 4
Salt Lick, Bridger-Teton NF. Twenty-five miles north of Pinedale, WY. Timber. Extreme fire behavior with crown runs and long range spotting. Structures threatened. Evacuations in effect.

Zena Creek, Payette NF. Twenty-five miles northeast of McCall, ID. Timber litter. Short runs with single tree torching. Structures threatened.

Basin, Salmon-Challis NF. Seven miles northeast of Stanley, ID. Grass, brush, and timber. Creeping with interior torching.

Greenville, Cedar City Field Office, BLM. Six miles southeast of Beaver, UT. Brush, slash and juniper. Isolated torching. Interstate 15 remains threatened.

Mathis, Southeast Area, Utah State Division of Forestry Fire \& State Lands. IMT 2 (Harvey). Nine miles north of Price, UT. Grass, juniper and timber. Active fire behavior with internal runs and torching. Coal mines, methane gas wells, and numerous residences remain threatened.

Milford Flat, Southwest Area, Utah State Division of Forestry Fire \& State Lands. IMT 1 (Muir). Three miles north of Milford, UT. Grass and brush. Wind-driven fire. Structures, natural gas pipeline and geo-thermal power plant remain threatened.

Black Pine 2, Sawtooth NF. IMT 2 (Grant). Started on private land eleven miles southeast of Malta, ID. Grass, brush and juniper. Running fire activity. Structures remain threatened.

Black Rock Gulch, Arizona Strip Field Office, BLM. IMT 2 (Lund). Thirty miles south of St. George, UT. Grass, brush, juniper and timber. Moderate fire behavior. Scattered showers occurred over the fire area. Structures remain threatened.

Tongue Complex (three fires), Boise District, BLM. IMT 2 (Johnson). IMT also managing the Boulder Creek fire. Forty-five miles south of Silver City, ID. Brush, grass and juniper. Active fire behavior. Structures remain threatened.

Boulder Creek, Boise District, BLM. Eight miles south of Silver City, ID. Grass, brush and juniper. Moderate fire behavior. Structures remain threatened. Reduction in acreage due to more accurate mapping.

Neola North, Uintah and Ouray Agency, BIA. Transfer of command from IMT 1 (Martin) back to the local unit today. Three miles north of Neola, UT. Brush and timber. Active burning in pockets otherwise minimal fire behavior.

Jungle, Manti-Lasal NF. Thirteen miles west of Ferron, UT. Timber litter and spruce. Isolated interior torching.
Bohannon, Idaho Falls District, BLM. FUMT ordered. Ten miles northeast of Salmon, ID. Timber. Isolated torching.

## Northwest Area (PL 3)

New fires:
New large fires:
Uncontained large fires:
Type 1 IMTs committed 1
Type 2 IMTs committed:
Egley Complex (six fires), Burns Fire Zone, Malheur NF. IMT 1 (Pendleton) and IMT 2 (Paul). Ten miles north of Riley, OR. Timber litter. Moderate fire behavior. Numerous structures remain threatened. Evacuations and periodic road closures remain in effect.

Ironside Mtn. Complex (five fires), Vale District, BLM. IMT 2 (Batten). Ten miles southwest of Ironside, OR. Timber litter. Minimal fire behavior with occasional torching.

Calamity Complex (six fires), Malheur NF. IMT 2 (West). Sixteen miles southeast of Seneca, OR. Timber and grass. Running, torching and short range spotting. Structures remain threatened.

Little Chopaka, Northeast Washington, DNR. Washington IMT 2 (Holloway). Started on BLM land five miles west of Oroville, WA. Brush and grass. Moderate fire behavior.

Bartlett Mountain, Burns District, BLM. Thirty-seven miles northeast of Burns, OR. Brush and grass. Minimal fire behavior with interior creeping and occasional torching. Structures remain threatened.

Millican East, Prineville District, BLM. Twenty-four miles south of Prineville, OR. Grass. Moderate fire activity with torching. No new information.

Predictive Services Discussion: Scattered thunderstorms and hot weather continue in the West. Thunderstorms, some with dry lightning, will spread further north today into the Pacific Northwest, Idaho, western Montana and western Wyoming. Elsewhere, scattered thunderstorms will persist over portions of northern California, Great Basin and the Southwest. Hot weather will continue over much of the West. In Alaska, the interior should see scattered showers and thunderstorms today.

## BACKFIRING OR BURNOUT OPERATIONS

Backfiring or burnout operations are often critical operations in the fire management job. If planned and executed correctly, they can speed control of a fire and greatly reduce suppression costs. Conversely, if done incorrectly, they can endanger personnel, extend control time and increase cost. Safety considerations must always be given first priority. No backfiring or burnout action, regardless of strategic importance or other critical factors, is worth risking one human life!

- Backfiring or burnout operations must not jeopardize the safety of personnel or equipment or compromise suppression actions on adjacent portions of the fireline.
- One qualified individual must be responsible for controlling and directing the firing operation.
- Before beginning backfiring or burnout operations, assure that:
- Lookouts are posted.
- Communications are established with both fireing and holding teams.
- Escape routes and safety zones are established, known to all resources, and will not be compromised by the firing operations.
- If it is necessary, and time allows, concentrations of fuel adjacent to and inside the control line should be removed.
- Fuel outside the control line may be removed; concentrations of fuel may be scattered, covered with foam or wet down, or treated by ground or aerial retardant applications.
- Critical points such as hooks in the fireline, saddles or canyon may require extra holding forces.
