Salt Lick, Bridger-Teton NF. IMT 2 (Suwyn). Twenty-five miles north of Pinedale, WY. Timber. Creeping fire with isolated torching. Structures threatened. Road closures in effect. Precipitation occurred over the fire area yesterday.

Milford Flat, Southwest Area, Utah State Division of Forestry Fire \& State Lands. IMT 1 (Muir). Three miles north of Milford, UT. Grass and brush. Isolated torching and creeping.

Black Pine 2, Sawtooth NF. IMT 2 (Grant). Started on private land eleven miles southeast of Malta, ID. Grass, brush and juniper. Backing fire with short crown runs and torching. Structures remain threatened.

Tongue Complex (three fires), Boise District, BLM. IMT 2 (Johnson). IMT also managing the Boulder Creek fire. Forty-five miles south of Silver City, ID. Brush, grass and juniper. Extreme fire behavior. Structures remain threatened.

Greenville, Cedar City Field Office, BLM. Six miles southwest of Beaver, UT. Brush, slash and juniper. Creeping with isolated torching. Structures and Interstate 15 remain threatened.

Boulder Creek, Boise District, BLM. Eight miles south of Silver City, ID. Grass, brush and juniper. Minimal fire behavior. Structures remain threatened.

East Zone Complex (two fires), Payette NF. IMT 2 (Heintz). Twenty-five miles northeast of McCall, ID. Includes previously reported Zena fire. Timber and grass. Active fire behavior. Structures threatened.

Neola North, Uintah and Ouray Agency, BIA. Three miles north of Neola, UT. Brush and timber. Creeping with isolated torching.

Bohannon, Idaho Falls District, BLM. FUMT (Ourada/Soper). Ten miles northeast of Salmon, ID. Timber litter. Creeping fire.

Goat, Payette NF. Twelve miles northeast of Yellowpine, ID. Timber. Sustained crown runs. Last narrative report unless significant activity occurs.

## Northwest Area (PL 4)

New fires:
53
New large fires: 6

Uncontained large fires: 10
Type 1 IMTs committed:
1
Type 2 IMTs committed:3

Egley Complex (six fires), Burns Fire Zone, Malheur NF. IMT 1 (Pendleton). Transfer of West Zone command from IMT 2 (Paul) to the IMT 1 today. Ten miles north of Riley, OR. Timber litter. Active fire behavior. Numerous structures remain threatened.

Calamity Complex (six fires), Malheur NF. Transfer of command from IMT 2 (West) back to local unit on 7/16. Sixteen miles southeast of Seneca, OR. Timber and grass. Running, spotting, and torching.

Ball Point, Mt. Hood NF. Twenty-three miles southwest of The Dalles, OR. Hardwood litter. No new information.

WSA Lightning Complex (twenty-seven fires), Warm Springs Agency, BIA. Twenty-one miles southwest of Warm Springs, OR. Timber, grass and brush. Extreme fire behavior.

Horse Heaven Complex (four fires), Southeast Washington, DNR. Washington IMT 2 (LaFave). Thirty miles southwest of Prosser, WA. Grass and sage. Running fire.

Fossil Creek, Prineville District, BLM. Forty miles northwest of John Day, OR. Grass and sage. Active fire behavior. Structures threatened.

Juniper Reservoir, Vale District, BLM. Five miles west of Vale, OR. Brush and slash. Running, backing, and torching. Several residences threatened. Road closures in effect.

Overlook / SR 24, McNary National Wildlife Refuge, FWS. Eighteen miles east of Mattawa, WA. Grass and brush. Moderate fire behavior.

Black Rock, Prineville District, BLM. Ten miles southeast of Clarno, OR. Grass and sage. Running and backing fire.

Juniper Canyon, Vale District, BLM. Nineteen miles east of Umatilla, OR. Brush. No further information.

Predictive Services Discussion: Thunderstorm activity will shift eastward today. Thunderstorm activity will be focused today across northern Idaho, western Montana, Wyoming, and the Four Corner states. Isolated drier storms are possible in the southern Great Basin, northwest Arizona, the southern Sierra Nevada Mountains and the deserts of southern California. Winds will increase across the Sierra Nevada Mountains of California, Nevada and portions of the Northwest. Alaska will continue to see cool conditions with showers and thunderstorms.

## TRANSFER OF COMMAND

Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. There is a high potential for fatalities, serious injuries, or incidents with potential during transfer of command periods (some have occurred in the past). Be proactive in mitigating the risks by proper implementation of LCES-Lookout, Communications, Escape Routes, and Safety Zones.

Factors for increased risks to fireline personnel during transition periods include:

- No, or poor, briefing of incoming personnel
- Lack of fire weather and behavior information, both forecast and observed
- Communications: face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system.
- Initial attack resources may not have checked-in and the Incident Commander may not be aware of the number, type and location of all resources.
- Location of safety zones and escape routes may not be known and communicated to all resources.

## Mitigation actions to take:

- Lookouts: Post and maintain your own lookouts.
- Communications: Maintain existing communications with your own and adjacent resources, as well as your original supervisor, while you are developing communications with incoming adjacent resources and your new supervisor.
- Escape routes and safety zones: Identify escape routes and assure that incoming resources are aware of their locations; be aware that your original escape routes and safety zones may no longer be accessible due to changing fire behavior or your increased distance from them.
