## In Country Not Seen In Daylight

Often firefighters arrive on a fire after dark. This is recognized as Watchout Situation \#2. Before safely fighting fire in country not seen in daylight, firefighters must be able to answer the following questions:

- Can the resources you are replacing give you a thorough briefing? Identify whom you might get information from. Can you meet up with the departing crew/engine leaders?
- Can you observe the area/use scouts? List ways you could observe the area you need to work.
- Have escape routes and safety zones been thoroughly scouted and marked for night use? Talk about what constitutes an escape route and a safety zone; who would identify them; and in what ways might they be marked.

Have potential dangers been located; can they be mitigated? What are the dangers associated with Watchout Situation \#2? How can they be worked around?
Reduce the risks by:

- Posting lookouts.
- Checking communications.
- Retreat if you have doubts about your escape routes or safety zones or the situation becomes too complex. Give examples of arriving on a fire after dark and what was done to allow you to fight fire safely in country not seen in daylight.
