#### National Interagency Coordination Center Incident Management Situation Report Friday, January 25, 2008 – 1000 MST National Preparedness Level 1

## National Fire Activity (Weekly Total)

Initial attack activity:	Light (159 new fires)
New large fires:	2 (*)
Large fires contained:	3
Uncontained large fires:	0
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Fire Use Teams committed:	0
** Uncontained large fires do not include WEI	Lor confine/contain incidents

\*\* Uncontained large fires do not include WFU or confine/contain incidents. \*\*

<u>Southern Area (PL 2)</u>	
New fires:	143
New large fires:	0
Uncontained large fires:	0

N5S – New Mexico State

**Predictive Services Discussion:** Cold temperatures will continue across the eastern half of the country through the weekend. Low relative humidity will be present today across the Southeast and Florida. Dry and windy conditions will develop in eastern New Mexico and northwest Texas early next week, and possibly again mid to late next week.

#### **AVIATION MISHAP RESPONSE ACTIONS**

Having a written mishap response action posted and accessible to all employees is an important first step. Having a list of actions to follow will ensure that nothing is missed in a stressful, time-critical period.

- Immediate, positive action is necessary. Any delay may affect someone's chances of survival.
- Conduct rescue operations keeping the following priorities in mind:
  - Preserve life.
  - Do whatever is necessary to extricate injured occupants and to extinguish fires, keeping in mind the necessity of protecting and preserving evidence.
  - Document and/or photograph the location of any debris that must be distubed in order to carry out rescues and/or fire suppression activities.
  - Secure the area. Treat the crash site as a crime scene. Arrange for security at the accident scene if necessary. Determine if hazardous materials were on the aircraft. Deny access except to credentialed officials and escorted media.
- Be aware that crash sites can be dangerous due to hazardous cargo, flammable and toxic fluids, sharp objects, disease, adverse terrain, hot/cold weather conditions, and fire.
- Exercise good judgment, utilize available protective devices and clothing, and use extreme caution when working near the wreckage site.
- Do not exceed your physical limitations.
