

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, May 18, 2008 – 0800 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (109 new fires)
 New large fires: 1 (*)
 Large fires contained: 1
 Uncontained large fires: 8
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2
 Fire Use Teams committed: 0

** Uncontained large fires does not include WFU or confine/contain incidents. **

Southern Area (PL 2)

New fires: 13
 New large fires: 0
 Uncontained large fires: 5
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 1

Mustang Corner, Everglades NP. IMT 1 (Quesinberry). Fifteen miles southwest of Kendall, FL. Grass. Wind-driven fire behavior with spotting.

Brevard Complex (6 fires), Florida DOF. Florida IMT 2 (Beauchamp). Brevard County, FL. Southern rough. Moderate activity within interior and smoldering. Numerous residences threatened. Reduction in acreage due to more accurate mapping.

Myakka Cut, Florida DOF. Five miles north of Clewiston, FL. Grass. Moderate fire activity. Residences threatened.

Mud Swamp New River, National Forests in Florida. Five miles northeast of Sumatra, FL. Southern rough. Minimal fire activity.

LPGA, Florida DOF. Six miles west of Daytona Beach, FL. Southern rough. No further information received.

LNU - Sonoma-Lake Napa Unit, CAL FIRE

Predictive Services Discussion: Hot and dry across California and Arizona, with near record high temperatures in southern California. Significantly drier and warmer across New Mexico and Texas. Chances for showers and thunderstorm will increase across the southern Appalachians along a southward moving cold front. A slight chance for showers and thunderstorms will continue for the northern half of Florida.

Radio Narrowbanding

The ability to have positive, reliable communication is one of the most important safety considerations we have in Wildland fire. As we are forced to adapt to technological changes, maintaining good radio communications becomes more complex and requires a heightened level of skill and awareness from all firefighters. The following are some facts and suggestions that may make radio communications easier

- Federal Agencies are under a congressional mandate to narrowband their frequencies by January 1, 2005. State and municipal agencies will not have to follow suit until the year 2013. For firefighters trying to determine if a frequency will be narrowbanded or not, this means that it is probably a good bet that Federal frequencies (those frequencies between 162.0000 and 174.0000 Mhz) are.
- Operating your radio in the wideband mode while working in a narrowband environment may cause radio communication problems for everyone working on that channel. The symptoms may range from distorted transmissions to no transmission at all.
- Before we were mandated to work in narrowband, frequencies were listed with just three digits past the decimal point. It is imperative that we now convey frequencies with four digits past the decimal point, for example 168.xxxx
- Some firefighters mistakenly believe that if they simply punch in four numbers past the decimal point, the channel will then be narrowbanded. This is not true! Each channel must be programmed specifically to operate in wideband or narrowband. Narrowband programming instructions for most handheld radios can be found at www.radios.nifc.gov
- Check your frequency guides, plans and maps to see which mode the frequencies are supposed to be operating on. If these don't have the information you need, find it and make pen and ink notes for yourself.
- If available, have a radio technician check your radio to ensure you are operating in the proper mode on the assigned frequencies.
- Discuss the narrow/wide band concept with all firefighters, managers and pilots.
