National Interagency Coordination Center Incident Management Situation Report Sunday, June 1, 2008 – 0800 MDT National Preparedness Level 2

National Fire Activity

Initial attack activity: Light (99 new fires)

New large fires: 1 (*)
Large fires contained: 1
Uncontained large fires: 4
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 0
Fire Use Teams committed: 0

Link to Geographic Area daily reports.

Southern Area (PL 2)

New fires: 18
New large fires: 1
Uncontained large fires: 4

Tracy, National Forests in Florida. Three miles northeast of Paisley, FL. Pine and brush. Minimal fire activity in the Alexander Springs Wilderness Area with smoldering and occasional flare-ups.

Level, Florida DOF. Seventeen miles northeast of Naples, FL. Southern rough. Minimal fire activity. Structures threatened.

Mustang Corner, Everglades NP. Ten miles northwest of Homestead, FL. Grass. Creeping.

Mud Swamp New River, National Forests in Florida. Five miles northeast of Sumatra, FL. Southern rough. No new information.

AVIATION COMMUNICATIONS

Discuss the following information in terms of effective communication with aircraft.

- Establish an air-to-ground frequency on the fire, and make sure everyone knows what it is.
- Consider using national air-to-ground frequencies.
- Discuss Guard frequencies:
 - How they work.
 - What frequencies are established for aircraft in your area?
- Aviation communications should be clear, concise, short, and to the point.
- Use standard terminology that can be understood by all people you are talking to.
- Do not use local slang.
- Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission.
- Know what you want to say before you key the microphone.
- Identify who you want to talk to by the call sign and identify yourself in every transmission.
- If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.
- Give only meaningful information on the radio.
- Give accurate and descriptive ground information when describing a specific place on the ground.
- When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling.
- Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.
- When giving directions, always give them in relation to the pilot's perspective.
