# National Interagency Coordination Center Incident Management Situation Report <br> Sunday, July 6, 2008 - 0530 MDT <br> National Preparedness Level 5 

| National Fire Activity |  |
| :--- | :---: |
| Initial attack activity: | Heavy (302 new fires) |
| New large fires: | $4\left(^{*}\right)$ |
| Large fires contained: | 5 |
| Uncontained large fires: | 72 |
| Area Command Teams committed: | 2 |
| NIMOs committed: | 2 |
| Type 1 IMTs committed: | 15 |
| Type 2 IMTs committed: | 15 |
| Fire Use Teams committed: | 1 |

Fire Use Teams committed: 1
** Uncontained large fires do not include WFU or confine/contain incidents. **
Link to Geographic Area daily reports.

A NIMO Team (Custer) is assigned as a planning and operational group in support of the National Multi-Agency Coordinating Group at Boise, ID.

Eight MAFFS C-130 air tankers are supporting the State of California. All aircraft are based at McClellan Airport in Sacramento California. The Mission Commander is LTC Roger Williams, 145th Air Wing Air National Guard, North Carolina. Three aircraft are provided by the 145th Airlift Wing, Charlotte, North Carolina, three from the 302nd Airlift Wing, Colorado Springs, CO and two from the 153rd Airlift Wing, Cheyenne, Wyoming.

## Northern California Area (PL 5)

New fires: 37

New large fires: 0
Uncontained large fires: 54
Area Command Teams committed: 2
NIMOs committed: 1
Type 1 IMTs committed: 10
Type 2 IMTs committed: 9
Zimmerman's Area Command Team is providing planning and incident management support to the Shasta-Trinity National Forest. Lohrey's Area Command Team is managing large fire complexes on the Lassen National Forest. Gage's NIMO Team is supporting the ONCC Multi-Agency Coordinating Group.

SHU Lightning Complex (3 fires), Shasta-Trinity Unit, Cal Fire. Cal Fire IMT 1 (Kerschen). Shasta and Trinity counties, CA. Timber, brush and grass. Moderate fire behavior with short-range spotting. Residences and power generation system threatened.

Whiskeytown Complex, Whiskeytown National Recreation Area, NPS. IMT 2 (McNitt). Twelve miles west of Redding, CA. Timber and brush. Active fire with uphill runs. Structures threatened.

BTU Lightning Complex (11 fires), Butte Unit, Cal Fire. Cal Fire IMT 1 (Lewin). Twenty-seven miles north of Yuba City, CA. Timber, brush and logging slash. Increased activity. Power transmission lines, numerous residences and structures threatened. Precautionary evacuation in effect for several communities. Highway 70 closed.

Lime Complex (38 fires), Shasta-Trinity NF. Transfer of command from IMT 1 (Opliger) to IMT 1 (Wilcock) tomorrow. Fourteen miles west of Hayfork, CA. Timber. Active backing and flanking fire with short uphill runs and short-range spotting. Communities, ranches and youth camps threatened. Traffic control on Highway 36 in effect.

Iron Complex (6 fires), Shasta-Trinity NF. IMT 1 (Broyles). One mile north of Junction City, CA. Heavy timber, brush and grass. Terrain-driven surface fire with single and group tree torching. Communities of Big Bar and Big Flat threatened. Evacuations in effect. Temporary road closures and restricted traffic flow on Highway 299.

Alps Complex (8 fires), Shasta-Trinity NF. IMT 2 (Soper). Twenty miles northwest of Junction City, CA. Timber and brush. Smoldering, creeping and backing fire with torching and short crown runs.

MEU Lightning Complex (45 fires), Mendocino Unit, Cal Fire. Cal Fire IMT 1 (Waterman). Mendocino County, CA. Timber and grass. Active fire behavior. Four communities threatened. Evacuations in effect.

Canyon Complex (7 fires), Plumas NF. IMT 1 (Pincha-Tulley). Sixteen miles northeast of Paradise, CA. Timber. Moderate fire behavior with uphill runs. Residences and archeological sites threatened. Highway 70 closed. Evacuations in effect.

American River Complex (2 fires), Tahoe NF. IMT 1 (Summerfelt). Eleven miles northeast of Foresthill, CA. Timber, brush and chaparral. Backing fire and short active crown runs with long-range spotting. Watershed, power lines and residences threatened.

Cub Complex (2 fires), Lassen NF. IMT 1 (Ruggiero). Sixteen miles southwest of Chester, CA. Timber. Surface fire with creeping and smoldering. Structures threatened. Highway 32 closed.

Hell's Half Complex (2 fires), Six Rivers NF. IMT 2 (Secrest). Eight miles southwest of Burnt Ranch, CA. Timber. Surface fire. Residences threatened.

Soda Complex (2 fires), Mendocino NF. IMT 2 (Heintz). Fifteen miles northwest of Upper Lake, CA. Timber. Moderate surface fire with single tree torching and short uphill runs. Residences threatened.

Yolla Bolly Complex (7 fires), Mendocino NF. IMT 2 (Harvey). Twenty-four miles southwest of Chico, CA. Chaparral, timber and grass. Active backing fire with short uphill runs. Structures threatened.

Ukonom Complex (4 fires), Six Rivers NF. IMT 2 (Lund and Svalberg). Ten miles east of Orleans, CA. Timber. Surface fire with torching and spotting. Structures threatened.

Siskiyou Complex (3 fires), Klamath NF. Transfer of command from IMT 2 (Paul) to IMT 2 (Swartzlander) yesterday. Eighteen miles southwest of Happy Camp, CA. Conifer and hardwood overstory with heavy timber litter. Backing fire with occasional torching and short uphill runs. Historic and cultural resources threatened.

Corral, Lassen-Modoc Unit, Cal Fire. IMT 1 (Larsen). Twenty-three miles west of Termo, CA. Timber. Smoldering and creeping.

Yuba River Complex, Tahoe NF. Thirteen miles northeast of Nevada City, CA. Timber and brush. Backing fire. Several communities, hydroelectric facilities and recreation sites threatened.

Mad Complex, (3 fires), Six Rivers NF. Twenty-three miles east of Redcrest, CA. Timber, brush and grass. Moderate fire activity with creeping. Residences threatened.

Humboldt Complex, Humboldt-Del Norte Unit, Cal Fire. Humboldt County, CA. Timber, slash and grass. Isolated flare-ups. Residences threatened.

Predictive Services Discussion: Local gusty winds should continue today over Santa Barbara and Ventura counties in southern California. Otherwise, a strong warming and drying trend is on tap for most of the West. Isolated thunderstorms are forecast for the Southwest, Great Basin and western Colorado. Scattered showers are expected over the Southeast.

Link to Predictive Services Outlook products.

## Heat Disorders

Heat becomes a problem when humidity, air temperature, and radiant heat combine with hard work to raise body temperature beyond safe limits. Sweat is your main defense. Everyone on the fireline must understand the importance of drinking water often.

- High heat stress can produce three forms of heat related illness;
- Heat cramps
- Heat exhaustion
- Heat stroke

The mildest is heat cramps. Heat cramps can progress to heat exhaustion and eventually heat stroke.

- Heat cramps are involuntary muscle contractions, typically in the large muscle groups, caused by failure to replace fluids or electrolytes, such as sodium and potassium.
- Cramps can be relieved with stretching and by replacing fluids and electrolytes.
- Heat cramps can be prevented by maintaining an adequate intake of water, electrolyte replacement drinks and by eating fresh fruits and vegetables.

Heat exhaustion is characterized by:

- Weakness
- Extreme fatigue
- Nausea
- Headaches
- Wet, clammy skin
- Heat exhaustion results when the body produces more heat that it can dissipate. Inadequate fluid intake is a major contributing factor. Treat heat exhaustion by resting in a cool environment, by removing clothing so that one's sweat can evaporate, and by replacing fluids and electrolytes.
- Heat stroke is caused by failure of the body's heat controls. Sweating stops and the body temperature rises.
- Although classic teaching describes a heat stroke patient as "hot and dry", recent studies have shown that over 50\% of heat stroke patients are sweating heavily. Typically, on the fireline we do not have medical thermometers. Therefore, the hallmark of heat stroke is altered mental status. You should suspect heat stroke if a firefighter is hot, fatigued, and shows some altered mental status, such as inability to remember the day or the current situation. They may ask, "Where am I?"
Heat stroke is characterized by:
- Hot, often dry skin
- Body temperature above 105.8 degrees Fahrenheit
- Mental confusion
- Loss of consciousness, convulsions, or even coma
- Heat stroke is a medical emergency. Brain damage and death may result if treatment is delayed. Begin rapid cooling with ice or cold water, fanning the victim to promote evaporation. For rapid cooling, partially submerge the victim's body in cool water. Treat for shock if necessary. Provide oxygen if it is available. Whereas heat cramps and heat exhaustion may be treated locally, heat stroke patients should be medivaced off the line ASAP, by air if possible, as their condition may worsen suddenly.

You can prevent the serious consequences of heat disorders by improving your level of fitness and becoming acclimated to the heat. Maintaining a high level of aerobic fitness is one of the best ways to protect against heat stress. The fit worker has a well-developed circulatory system and increased blood volume. Both are important to regulate body temperature. Fit workers start to sweat sooner, so they work with a lower heart rate and body temperature. They adjust to the heat twice as fast as the unfit worker.
