Predictive Services Discussion: Very hot and dry weather will continue over most of northern and central California today with a chance of mostly dry thunderstorms over the Sierras. Onshore flow is expected from southwest Oregon down to the mid-California coast. Southern California will see increased humidity along with widely scattered wet thunderstorms. The southern Great Basin will see a mixture of wet and dry thunderstorms with thundershowers for the Southwest, Southeast and Alaska Areas. Winds should decrease over the Northwest and western Montana.
