National Interagency Coordination Center Incident Management Situation Report Friday, February 27, 2009 – 0800 MST National Preparedness Level 1

National Fire Activity (Weekly Total)

Initial attack activity: Light (1,051 new fires)

31 (*) New large fires: Large fires contained: 22 Uncontained large fires: 13 Area Command Teams committed: 0 NIMOs committed: 0 0 Type 1 IMTs committed: Type 2 IMTs committed: 1 Fire Use Teams committed: 0

Link to Geographic Area daily reports.

The U.S. has mobilized two Burned Area Emergency Response teams, one 20-person suppression crew and 15 fire specialists and managers to Australia.

Southern Area (PL 1)

| New fires: | 999 |
|--------------------------|-----|
| New large fires: | 27 |
| Uncontained large fires: | 13 |
| Type 2 IMTs committed: | 1 |

2009 Winter Initial Attack, Texas Forest Service. Texas IMT 2 (Bennett). IMT is supporting multiple fires in west Texas. Acres reported are a cumulative total.

West Fork, Texas Forest Service. Started on private land three miles south of Shannon, TX. Brush. Minimal fire activity.

40 Acre Turnaround, Oklahoma DOF. Five miles southeast of Hartshorne, OK. Timber. No further information received.

Kiowa One, Oklahoma DOF. Nine miles northwest of Kiowa, OK. Grass. No further information received.

Rub Board #2, Oklahoma DOF. Four miles south of Sulphur, OK. Hardwood and grass. No further information received.

Clyde, Texas Forest Service. Started on private land four miles northeast of Clyde, TX. Brush and grass. Minimal fire activity.

Mountain Home C24, Texas Forest Service. Thirty-eight miles east of Fredericksburg, TX. Brush and grass. No further information received.

Coke Ranch, Oklahoma DOF. Seven miles northeast of Daisey, OK. Grass. No further information received.

Ballinger, Texas Forest Service. Five miles northeast of Ballinger, TX. Brush and grass. Smoldering.

^{**} Uncontained large fires do not include WFU or confine/contain incidents. **

Chickasaw Trail, Oklahoma DOF. Four miles south of Sulphur, OK. Hardwood and grass. No further information received. No new information.

Guard Rail, Florida DOF. Eight miles east of Christmas, FL. Grass. No further information received. No new information.

Nail Ranch Complex, Texas Forest Service. Thirty-three miles northeast of Abilene, TX. Brush and grass. Active fire behavior.

Panther Ranch, Texas Forest Service. Twenty-seven miles southeast of Brady, TX. Brush and grass. Active fire behavior.

Predictive Services Discussion: Parts of central and eastern New Mexico along with portions of west Texas and Oklahoma will be dry and breezy with low humidity on Friday ahead of a cold frontal passage early Saturday. Breezy to windy and rather dry conditions are expected in the wake of the cold front across parts of east-central and south-central Texas on Saturday. Breezy and dry conditions with low humidity will arrive again to parts of eastern New Mexico and west Texas Monday and Tuesday, but will strengthen in the wake of a disturbance moving to the northeast later Wednesday and into Thursday. Another weather disturbance is expected to drop from the Great Basin into the Four Corners region leading to another round of breezy to windy and dry weather on Friday across central and eastern New Mexico into the Plains of Texas and Oklahoma. Cooler temperatures through the next seven days, along with areas of precipitation over the coming weekend will likely aid in preventing any significant fire weather issues across much of the southeastern U.S. over the next week.

Proper Use of Trigger Points

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of firefighters. Keeping an eye out for the 18-Watchout Situations and establishing operational / environmental limits ("trigger points") ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don't wait until you're in the wrong place at the wrong time---with no time.
- Trigger points should be based on measurable factors such as:
 - RH
 - Winds
 - Fire Behavior
 - Topographical boundaries
 - Time constraints/Time of day
 - Time/distance to safety zones
 - Loss of support resources (airtankers, helicopters, etc.)
 - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, etc.)
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is appropriate. (See the Incident Response Pocket Guide)
 - Gather information to assure good Situational Awareness
 - Assess hazards to anticipate serious risks
 - Establish hazard controls to mitigate serious risks
 - Make decisions based on your ability to mitigate those serious risks
 - Evaluate effectiveness of current actions
- Command/Leadership responsibilities when changing tactics
 - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
 - Account for all your people
 - Make sure everyone knows and follows the new plan
