# National Interagency Coordination Center Incident Management Situation Report Tuesday, April 14, 2009 – 0800 MDT National Preparedness Level 1

# **National Fire Activity**

Initial attack activity: Light (103 new fires)

New large fires: 3 (\*)
Large fires contained: 7
Uncontained large fires: 21
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 1

Link to Geographic Area daily reports.

## Southern Area (PL 2)

| New fires:               | 157 |
|--------------------------|-----|
| New large fires:         | 1   |
| Uncontained large fires: | 19  |
| Type 2 IMTs committed:   | 1   |

**2009 Winter Initial Attack**, Texas Forest Service. Texas IMT 2 (Bennett). IMT is supporting multiple fires in west Texas. Acres reported are a cumulative total.

Loco / Healdton, Oklahoma DOF. Five miles east of Loco, OK. Grass. No new information.

**Cement Mountain Complex,** Texas Forest Service. Started on private land four miles northeast of Graham, TX. Brush and grass. Interior smoldering.

**Montague County Complex,** Texas Forest Service. Started on private land three miles south of St. Jo, TX. Brush and grass. Interior smoldering.

Ratliff City / Tatums, Oklahoma DOF. One mile northeast of Ratliff City, OK. Grass. No new information.

Cedar Mountain, Texas Forest Service. Started on private land five miles north of Cisco, TX. Interior smoldering.

**Roberts Branch,** Texas Forest Service. Started on private land 11 miles north of Jacksboro, TX. Brush and grass. Interior smoldering.

Mulhall / Payne County, Oklahoma DOF. Five miles northeast of Mulhall, OK. Grass. No new information.

Lindsay, Oklahoma DOF. Six miles west of Lindsay, OK. Grass. No new information.

**Fox Graham**, Chickasaw Agency, BIA. Two miles northeast of Fox, OK. Hardwood litter and grass. No new information.

**Choctaw**, Oklahoma DOF. One mile east of Midwest City, OK. Grass. No new information.

**Breckenridge,** Texas Forest Service. Started on private land one mile north of Breckenridge, TX. Grass. Interior smoldering.

Velma West, Oklahoma DOF. Five miles southwest of Velma, OK. Grass. No new information.

**Beard Mountain,** Texas Forest Service. Started on private land 45 miles west of Ft. Stockton, TX. Grass. Active fire behavior.

Arbuckle, Oklahoma DOF. Four miles southeast of Davis, OK. Grass. No new information.

Velma, Oklahoma DOF. Two miles southwest of Velma, OK. Grass. No new information.

**1148 Complex**, Texas Forest Service. Started on private land 10 miles north of Brad, TX. Brush and grass. Interior smoldering.

Wellston, Oklahoma DOF. Four miles southwest of Wellston, OK. Brush. No new information.

Velma East, Oklahoma DOF. Six miles southeast of Velma, OK. Grass. No new information.

**Predictive Services Discussion:** A large low pressure trough will move into the West today producing dry and windy conditions across portions of southern Nevada, southeast California, and the Southwest. Showers will spread across the northwest quarter of the country. The western Great Lakes and Northeast will continue to see low relative humidity.

Link to Predictive Services Outlook products.

#### Wildland Urban Interface Hazards

Firefighters in the wildland urban interface may encounter hazards other than the fire itself, such as hazardous materials, utility lines and poor access.

#### Hazardous Materials

Common chemicals used around the home may be a direct hazard to firefighters from flammability, explosion
potential and/or vapors or off-gassing. Such chemicals include paint, varnish and other flammable liquids;
fertilizer; pesticides; cleansers; aerosol cans, fireworks, batteries and ammunition. In addition, some common
household products such as plastics may give off very toxic fumes when they burn. Stay OUT of the smoke
from burning structures and any unknown sources such as trash piles.

#### Illicit Activities

Marijuana plantations or drug production labs may be found in wildland urban interface areas. Extremely
hazardous materials such as propane tanks and flammable/toxic chemicals may be encountered, as well as
booby traps.

#### Propane tanks

• Both large (household size) and small (gas grill size) liquefied propane gas (LPG) tanks can present hazards to firefighters, including explosion. See the "LPG Tank Hazards" discussion for details.

#### Utility lines

Utility lines may be located above and below ground and may be cut or damaged by tools or equipment.
 Don't spray water on utility lines or boxes.

#### Septic tanks and fields

Below-ground structures may not be readily apparent and may not support the weight of engines or other
apparatus.

#### New construction materials

Many new construction materials have comparatively low melting points and may "off-gas" extremely
hazardous vapors. Plastic decking materials that resemble wood are becoming more common and may begin
softening and losing structural strength at 180° F, though they normally do not sustain combustion once
direct flame is removed. However, if they continue to burn they exhibit the characteristics of flammable
liquids.

#### Pets and livestock

Pets and livestock may be left when residents evacuate and will likely be highly stressed, making them more
inclined to bite and kick. Firefighters should not put themselves at risk to rescue pets or livestock.

#### Evacuation occurring

Firefighters may be taking structural protection actions while evacuations of residents are occurring. Be very
cautious of people driving erratically. Distraught residents may refuse to leave their property, and firefighters
may need to disengage from fighting fire to contact law enforcement officers for assistance. In most
jurisdictions firefighters do not have the authority to force evacuations. Firefighters should not put
themselves at risk trying to protect someone who will not evacuate!

#### Limited access

Narrow one-lane roads with no turn-around room, inadequate or poorly maintained bridges and culverts are frequently found in wildland urban interface areas. Access should be sized-up and an evacuation plan for all emergency personnel should be developed.
