National Interagency Coordination Center Incident Management Situation Report Saturday, May 30, 2009 – 0530 MDT National Preparedness Level 1

National Fire Activity

Initial attack activity: Light (144 new fires)

New large fires: 3 (*)
Large fires contained: 1
Uncontained large fires: 5
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 1

Link to Geographic Area daily reports.

Alaska Area (PL 2)

New fires: 1
New large fires: 0
Uncontained large fires: 1
Type 2 IMTs committed: 1

Broken Snowshoe, Southwest Area, Alaska DOF. IMT 2 (Doty). Ten miles north of McGrath, AK. Timber. Active fire behavior. Residences threatened.

Predictive Services Discussion: Mostly wet thunderstorms will be scattered across the West today. Isolated dry thunderstorms are possible at lower elevations across portions of the Great Basin, California and Oregon. A large low pressure system will continue cool and moist conditions across much of Alaska.

Link to Predictive Services Outlook products.

Initiate All Actions Based On Current and Expected Fire Behavior

- Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing?
- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- To reduce risk, initiate the following:
 - Post lookouts.
 - · Check communications.
 - Retreat if you have doubts about your escape routes or safety zones or it the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.
