National Interagency Coordination Center Incident Management Situation Report Monday, June 8, 2009 – 0530 MDT National Preparedness Level 1

National Fire Activity

Initial attack activity: Light (76 new fires)

New large fires: 4 (*)
Large fires contained: 0
Uncontained large fires: 3
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 1

Link to Geographic Area daily reports.

Southwest Area (PL 2)

New fires:	12
New large fires:	3
Uncontained large fires:	1
Type 2 IMTs committed:	1

Pioneer, Tonto NF. IMT 2 (Sciacca). Eight miles south of Globe, AZ. Hardwood litter and chaparral. Backing and flanking fire.

Ruby, Kaibab, NF. Previously reported confine / contain incident. Twelve miles southeast of Grand Canyon Village, AZ. Timber litter and understory. Moderate fire activity. Last narrative report unless significant activity occurs.

Mesa, Socorro District, BLM. Confine / contain management strategy. Fifteen miles north of Bingham, NM. Grass. Moderate fire activity. Last narrative report unless significant activity occurs.

Point, Coconino, NF. Confine / contain management strategy. One mile northeast of Pine, AZ. Hardwood litter. No further information received. Last narrative report unless significant activity occurs.

Game Reserve, Grand Canyon NP. Confine / contain management strategy. Nine miles southeast of Grand Canyon Village, AZ. Pine litter and grass. Moderate fire activity. Last narrative report unless significant activity occurs.

Retardant Drop Safety

Having retardant dropped on a fire should be a routine event. However, there are risks associated with retardant drops that can pose serious threats to personnel and equipment. Consider the following for all drops:

- Be aware of the location of lead planes and airtankers during retardant drop operations.
- Be sure you have positive contact with the lead plane or airtanker before the drop.
- Personnel can be injured by the impact of retardant drops. Clear personnel out of the target area when the drop is conducted. If an individual is unable to retreat to a safe place, the best method for minimizing injury from the drop is to:
 - Hold your hand tool away from your body.
 - Lie face down with hardhat in place and head toward the oncoming aircraft.
 - Grasp something firm to prevent being carried or rolled about by the retardant.
 - Do not run unless escape is ensured.
 - Get clear of dead snags and tops.
 - Be aware of rolling debris below the drop site in steep terrain.
- Working in an area covered by retardant should be done with caution due to slippery surfaces.
- If possible, wash the retardant off your skin to prevent irritation.
