National Interagency Coordination Center Incident Management Situation Report Monday, June 15, 2009 – 0530 MDT National Preparedness Level 1

National Fire Activity

Initial attack activity: Light (65 new fires)

New large fires: 2 (*)
Large fires contained: 0
Uncontained large fires: 9
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 1

Link to Geographic Area daily reports.

Southwest Area (PL 3)

New fires:	5
New large fires:	0
Uncontained large fires:	4
Type 2 IMTs committed:	1

Diamond, Gila NF. IMT 2 (McBratney). IMT also managing the Meason fire. Confine / contain management strategy. Forty-five miles northeast of Silver City, NM. Grass. Creeping. Significant precipitation occurred over the fire area yesterday.

Meason, Gila NF. Confine / contain management strategy. Twenty-six miles north of Mimbres, NM. Hardwood litter. Creeping. Significant precipitation occurred over the fire area yesterday.

Pasco, Socorro District, New Mexico State Forestry. Forty-two miles south of Animas, NM. Brush and grass. Moderate fire activity. Residences threatened.

Elk Horn, Tucson District, Arizona State Forestry. Twenty-six miles southwest of Three Points, AZ. Brush and grass. Active fire behavior. Residences threatened.

Pioneer, Tonto NF. Eight miles south of Globe, AZ. Chaparral. Moderate fire activity.

Tucker, Coconino NF. Previously reported confine / contain incident. Fifteen miles north of Pine, AZ. Slash and hardwood litter. Backing with torching and short-range spotting. Last report unless significant activity occurs.

Little Alamo, Coronado NF. Five miles west of Nogales, AZ. Grass. Minimal fire activity.

Predictive Services Discussion: The interior of Alaska will be warmer and drier today with decreasing thunderstorm activity. Breezy and much drier weather is on tap for eastern Arizona and New Mexico. A few thunderstorms are expected in west Texas. Scattered thundershowers will persist over the rest of the West.

Link to Predictive Services Outlook products.

Safenet

SAFENET is a form, and process, that provides a method for reporting unsafe situations on, or off, the fireline. The information provided on the form will help collect important, safety-related data to determine long-term trends and problem areas. A SAFENET may be filled out at any time to report a valid concern about unsafe situations in fire operations, as well as document corrective action.

- Discuss the methods for filing a SAFENET.
 - Electronically (Access site through NIFC web site)
 - By hardcopy (self-addressed, stamped forms available through the cache system).
 - By phone (1-800-670-3938)
- Discuss advantages of filing a SAFENET through your supervisor versus sending it yourself.
 - Increase the chances of finding an immediate solution.
 - Keeps supervisor "in the loop."
- Discuss using SAFENET in situations other than fire.
 - Prescribed fire
 - All-risk
 - Training
- Where does a SAFENET go, and what response can you expect?
 - SAFENETs are received and stored in a database in Boise. After a SAFENET is received, the names are removed. It is then given a document number and posted to the web.
 - Every new SAFENET is then forwarded to the affected agencies designated list of contacts, which usually includes the National or Regional Safety Officer.
 - It is each agency's responsibility to insure that corrective actions are taken.
- Corrective actions can be filed by anyone at any time. They are automatically attached to the individual SAFENET on the database.
- Discuss using SAFENET to monitor safety issues other firefighters may be having.
