# National Interagency Coordination Center Incident Management Situation Report Wednesday, June 17, 2009 – 0530 MDT National Preparedness Level 1

#### **National Fire Activity**

Initial attack activity: Light (68 new fires)

New large fires: 2 (\*)
Large fires contained: 1
Uncontained large fires: 6
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 1

Link to Geographic Area daily reports.

#### Southwest Area (PL 3)

New fires: 3
New large fires: 1
Uncontained large fires: 4
Type 2 IMTs committed: 1

**Diamond**, Gila NF. IMT 2 (McBratney). IMT also managing the Meason fire. Confine / contain management strategy. Forty-five miles northeast of Silver City, NM. Grass. Moderate fire activity.

**Meason,** Gila NF. Confine / contain management strategy. Twenty-six miles north of Mimbres, NM. Hardwood litter. Moderate fire activity.

**Pasco,** Socorro District, New Mexico State Forestry. Forty-two miles south of Animas, NM. Brush and grass. Moderate fire activity. Residence threatened. Reduction in acreage due to more accurate mapping.

**Elk Horn,** Tucson District, Arizona State Forestry. Twenty-six miles southwest of Three Points, AZ. Brush and grass. Moderate fire behavior.

Pioneer, Tonto NF. Eight miles south of Globe, AZ. Chaparral. Moderate fire activity.

**Little Alamo,** Coronado NF. Five miles west of Nogales, AZ. Grass. No new information. Last report unless new information is received.

**Joshua**, Gila NF. Confine / contain management strategy. Four miles north of Luna, NM. Hardwood litter and slash. Moderate fire activity. Last report unless significant activity occurs.

TXS – Texas Forest Service.

**Predictive Services Discussion:** The Alaska interior will see warmer and drier conditions today along with scattered thunderstorms. Scattered thunderstorms, some of them dry, are expected in southeast Arizona, southern New Mexico and Texas. Otherwise, scattered thundershowers are on tap again for much of the intermountain West.

Link to Predictive Services Outlook products.

#### **Serious Injury Procedures**

Dealing with serious injuries on the fireline can add even more stress to our hectic work environment. In the event a fireline accident occurs, adherence to the following principles is important to insure an adequate and appropriate response is made.

- Before entering the scene, determine whether it is safe to approach. Look for hazards as well as what may have happened. It may be necessary to move the patient or to make the area safe before doing an assessment.
- Provide first aid and assess the extent of the injuries.
- Make contact with your supervisor. Depending on the complexity of the fire, that could be your crew boss, the Division Supervisor, the IC, or even dispatch. If your fire has a medical plan, follow the plan.
- Provide them with accurate, concise information on the following
  - Number of people injured
  - Type of injuries
  - Severity of injuries (light, moderate, severe, life threatening)
  - Mechanism of injury
  - Vital signs (pulse, respirations, level of consciousness, etc)
- Determine the best method of evacuation. Depending on the severity of injury or availability of resources, this decision my already be made for you.
- Keep the radio frequency clear of non-emergency traffic, provide updates of the patients condition and await instructions.
- If evacuation is by helicopter, it may be necessary to construct a helispot. Document treatment provided in case it is necessary to send the information along with the patient in the aircraft.
- If the patient needs to be carried to a road, insure enough people are available to work in relays.
- Once the patient is clear, take a moment to write down witness statements, clean up notes and timelines, and document any other pertinent information.
