

**National Interagency Coordination Center
Incident Management Situation Report
Friday, July 31, 2009 – 0530 MDT
National Preparedness Level 3**

National Fire Activity

Initial attack activity: Moderate (206 new fires)
 New large fires: 9 (*)
 Large fires contained: 4
 Uncontained large fires : ** 20
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 8

Nationally, there are 63 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents. **

Northwest Area (PL 3)

New fires: 52
 New large fires: 2
 Uncontained large fires: 5
 Type 2 IMTs committed: 4

Cougar Creek, Malheur NF. IMT2 (Batten). Ten miles south of John Day, OR. Juniper, brush and grass. Moderate fire activity. Multiple structures threatened.

Union Valley, Southeast Washington DNR. Washington IMT2 (Lafave). One mile north of Chelan, WA. Timber, brush and grass. Smoldering.

Williams Creek, Umpqua NF. IMT2 (Paul). Fifteen miles east of Glide, OR. Timber. Active fire behavior with group torching. Community of Moorehill and numerous residences threatened. Hwy 138 has been closed.

* **Discovery**, Okanogan/Wenatchee NF. Washington IMT2 (Gormely). Timber. Thirty miles west of Yakima, WA. Active fire behavior with isolated torching and spotting.

* **Long Prong**, Wallowa-Whitman NF. Thirty-five miles northeast of Enterprise, OR. Timber and grass. Active fire behavior with torching and spotting. Structures threatened.

Alaska Area (PL 3)

New fires: 4
 New large fires: 6
 Uncontained large fires: 4
 Type 2 IMTs committed 2

Railbelt Complex (2 fires), Fairbanks Area, Alaska DOF. IMT2 (Doty). Twelve miles southwest of Nenana, AK. Black spruce and tussock with mixed hardwood litter. Active fire behavior. Numerous structures threatened.

* **Bluff Creek**, Upper Yukon Zone, BLM. IMT2 ordered. Ten miles west of Circle, AK. Mixed spruce and tundra. Active fire behavior. Community of Circle and numerous structures are threatened.

Rock Slough, Upper Yukon Zone, BLM. Started on FWS land, forty-seven miles northeast of Fort Yukon, AK. Black spruce, brush and tundra. Active fire behavior. Numerous structures threatened.

Little Black One, Upper Yukon Zone, BLM. Previously reported incident. Started on FWS land fifty-three miles southeast of Fort Yukon, AK. Black Spruce and tundra. No further information received. Last report unless significant activity occurs.

* **Titna River**, Tanana Zone, BLM. Confine/contain management strategy. Thirty miles northwest of Lake Minchumina, AK. Black Spruce. No further information received. Last report unless significant activity occurs.

* **Kantishna River**, Tanana Zone, BLM. Incident is being managed for resource benefit objectives. Forty miles southwest of Nenana, AK. Black spruce, brush and hardwood slash. No further information received. Last report unless significant activity occurs.

* **Senatis Mountain**, Tanana Zone, BLM. Incident is being managed for resource benefit objectives. Twenty-eight miles northeast of Tanana, AK. Brush and grass. No further information received. Last report unless significant activity occurs.

* **South Boney**, Tanana Zone, BLM. Incident is being managed for resource benefit objectives. Twenty miles southwest of Tanana, AK. Black spruce and tundra. No further information received. Last report unless significant activity occurs.

* **Puzzle Gulch**, Upper Yukon Zone, BLM. Incident is being managed for resource benefit objectives. Thirty miles south of Circle City, AK. Timber. Active fire behavior with running and torching. Last report unless significant activity occurs.

Predictive Services Discussion: Hot, dry and unstable conditions will be found east of the Cascades today. Thunderstorms are expected across portions of northern California, the Pacific Northwest and Northern Rockies. Widely scattered thunderstorms will continue over the southern Sierras, Great Basin, western Colorado and the Southwest. The Alaska interior will see cooler temperatures along with a few showers.

Wildland Urban Interface Hazards

Firefighters in the wildland urban interface may encounter hazards other than the fire itself, such as hazardous materials, utility lines and poor access.

- Hazardous Materials
 - Common chemicals used around the home may be a direct hazard to firefighters from flammability, explosion potential and/or vapors or off-gassing. Such chemicals include paint, varnish and other flammable liquids; fertilizer; pesticides; cleansers; aerosol cans, fireworks, batteries and ammunition. In addition, some common household products such as plastics may give off very toxic fumes when they burn. Stay OUT of the smoke from burning structures and any unknown sources such as trash piles.
- Illicit Activities
 - Marijuana plantations or drug production labs may be found in wildland urban interface areas. Extremely hazardous materials such as propane tanks and flammable/toxic chemicals may be encountered, as well as booby traps.
- Propane tanks
 - Both large (household size) and small (gas grill size) liquefied propane gas (LPG) tanks can present hazards to firefighters, including explosion. See the "LPG Tank Hazards" discussion for details.
- Utility lines
 - Utility lines may be located above and below ground and may be cut or damaged by tools or equipment. Don't spray water on utility lines or boxes.
- Septic tanks and fields
 - Below-ground structures may not be readily apparent and may not support the weight of engines or other apparatus.
- New construction materials
 - Many new construction materials have comparatively low melting points and may "off-gas" extremely hazardous vapors. Plastic decking materials that resemble wood are becoming more common and may begin softening and losing structural strength at 180° F, though they normally do not sustain combustion once direct flame is removed. However, if they continue to burn they exhibit the characteristics of flammable liquids.
- Pets and livestock
 - Pets and livestock may be left when residents evacuate and will likely be highly stressed, making them more inclined to bite and kick. Firefighters should not put themselves at risk to rescue pets or livestock.
- Evacuation occurring
 - Firefighters may be taking structural protection actions while evacuations of residents are occurring. Be very cautious of people driving erratically. Distraught residents may refuse to leave their property, and firefighters may need to disengage from fighting fire to contact law enforcement officers for assistance. In most jurisdictions firefighters do not have the authority to force evacuations. Firefighters should not put themselves at risk trying to protect someone who will not evacuate!
- Limited access
 - Narrow one-lane roads with no turn-around room, inadequate or poorly maintained bridges and culverts are frequently found in wildland urban interface areas. Access should be sized-up and an evacuation plan for all emergency personnel should be developed.
