

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, August 6, 2009 – 0530 MDT  
National Preparedness Level 3**

**National Fire Activity**

Initial attack activity:	Moderate (267 new fires)
New large fires:	10 (*)
Large fires contained:	4
Uncontained large fires : **	36
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	15

Nationally, there are 79 large fires being managed with minimal or no resource commitment that are not shown on today's report.

\*\* Uncontained large fires do not include confine/contain and resource benefit incidents. \*\*

[Link](#) to Geographic Area daily reports.

**Northwest Area (PL 3)**

New fires:	68
New large fires:	1
Uncontained large fires:	9
Type 2 IMTs committed:	8

**Williams Creek**, Umpqua NF. IMT2 (Paul). Fifteen miles east of Glide, OR. Timber. Active fire behavior with group-tree torching. Structures threatened. Communities of Steamboat Inn and Moore Hill threatened. Power transmission lines and anadromous fisheries threatened. Hwy 138 has been closed. Evacuations in effect.

**Discovery**, Okanogan/Wenatchee NF. Washington IMT2 (Gormley). Timber. Thirty miles west of Yakima, WA. Active fire behavior with running, group torching and spotting. Structures threatened.

**Tiller Complex**, Umpqua NF. IMT2 (Ensley). Six miles northeast of Tiller, OR. Timber. Moderate fire activity with isolated torching.

**North Fork Complex** (2 fires), Umatilla NF. IMT2 (Batten). Fifteen miles southeast of Ukiah, Oregon. Timber, brush and grass. Moderate fire behavior with group-tree torching.

**Heatwave Complex** (3 fires), Olympic National Park, NPS. IMT2 (McBratney). Confine/contain management strategy. Fifteen miles west of Brinnon, WA. Timber with heavy dead and down fuels. Smoldering.

**Langille**, Gifford-Pinchot NF. IMT2 (Hutton). Confine/contain management strategy. Fifteen miles southwest of Randle, WA. Timber. Creeping and smoldering.

\* **Cougar Ridge Complex**, Wallowa-Whitman NF. IMT2 (Rapp). Twelve miles south of Wallowa, OR. Timber. Active fire behavior with group tree torching. Structures threatened.

**Gold Hill Complex**, Mt. Baker-Snoqualmie NF. Transfer of command from Washington IMT2 (Johnson) back to local unit will occur today. Confine/contain management strategy. Three miles southeast of Darrington, WA. Timber. Moderate fire activity. Road closures in effect.

**Box Canyon**, Warm Springs Agency, BIA. Ten miles southeast of Warm Springs, OR. Pine, juniper brush and grass. No further information received.

**Cougar Creek**, Malheur NF. Ten miles south of John Day, OR. Juniper, brush and grass. No new information. Last report unless new information is received.

**Long Prong**, Wallowa-Whitman NF. Thirty-five miles northeast of Enterprise, OR. Timber and grass. Interior creeping and smoldering. Structures threatened.

CCD - Carson City Field Office, BLM

**Predictive Services Discussion:** Cooler conditions, higher relative humidity, and thundershowers will move into the Northwest, Northern Rockies and Northern California today. Dry and windy conditions will develop across the Sierra Nevada, southern Great Basin, northern Arizona, southwest Wyoming, and western Colorado. Mixed wet and dry thunderstorms will continue across the southern Great Basin, Rocky Mountain and Southwest Areas. Alaska will continue to see hot and dry conditions.

### **Wildland Urban Interface Hazards**

Firefighters in the wildland urban interface may encounter hazards other than the fire itself, such as hazardous materials, utility lines and poor access.

#### ● Hazardous Materials

- Common chemicals used around the home may be a direct hazard to firefighters from flammability, explosion potential and/or vapors or off-gassing. Such chemicals include paint, varnish and other flammable liquids; fertilizer; pesticides; cleansers; aerosol cans, fireworks, batteries and ammunition. In addition, some common household products such as plastics may give off very toxic fumes when they burn. Stay OUT of the smoke from burning structures and any unknown sources such as trash piles.

#### ● Illicit Activities

- Marijuana plantations or drug production labs may be found in wildland urban interface areas. Extremely hazardous materials such as propane tanks and flammable/toxic chemicals may be encountered, as well as booby traps.

#### ● Propane tanks

- Both large (household size) and small (gas grill size) liquefied propane gas (LPG) tanks can present hazards to firefighters, including explosion. See the "LPG Tank Hazards" discussion for details.

#### ● Utility lines

- Utility lines may be located above and below ground and may be cut or damaged by tools or equipment. Don't spray water on utility lines or boxes.

#### ● Septic tanks and fields

- Below-ground structures may not be readily apparent and may not support the weight of engines or other apparatus.

#### ● New construction materials

- Many new construction materials have comparatively low melting points and may "off-gas" extremely hazardous vapors. Plastic decking materials that resemble wood are becoming more common and may begin softening and losing structural strength at 180° F, though they normally do not sustain combustion once direct flame is removed. However, if they continue to burn they exhibit the characteristics of flammable liquids.

#### ● Pets and livestock

- Pets and livestock may be left when residents evacuate and will likely be highly stressed, making them more inclined to bite and kick. Firefighters should not put themselves at risk to rescue pets or livestock.

#### ● Evacuation occurring

- Firefighters may be taking structural protection actions while evacuations of residents are occurring. Be very cautious of people driving erratically. Distraught residents may refuse to leave their property, and firefighters may need to disengage from fighting fire to contact law enforcement officers for assistance. In most jurisdictions firefighters do not have the authority to force evacuations. Firefighters should not put themselves at risk trying to protect someone who will not evacuate!

#### ● Limited access

- Narrow one-lane roads with no turn-around room, inadequate or poorly maintained bridges and culverts are frequently found in wildland urban interface areas. Access should be sized-up and an evacuation plan for all emergency personnel should be developed.
