

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, October 13, 2009 – 0530 MDT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (20 new fires)
 New large fires: 2 (*)
 Large fires contained: 1
 Uncontained large fires : ** 3
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

Nationally, there are 60 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents.

Northern California Area (PL 2)

New fires: 9
 New large fires: 0
 Uncontained large fires: 1

Mill Creek #4, Hoopa Valley Tribe. Transfer of command from IMT2 (Swarzlander) back to local unit will occur today. Seven miles northeast of Hoopa, CA. Timber. Moderate fire activity. Road closures in effect. Smoke impacting the communities of Hoopa and Orleans.

Predictive Services Discussion: Low pressure drifting west out of Canada has combined with the remains of Typhoon Melor in the Pacific to form one powerful low pressure system off the coast of British Columbia. The extensive frontal system is advancing on the west coast today, and will bring widespread rains and strong south to southwest winds to the entire region. The brunt of the energy from this rejuvenated low is aimed at northern and central California where heavy rains are expected; 4 to 8 inches are forecast in areas of higher terrain, with 1 to 4 inches in lower areas. The heaviest precipitation will work its way inland this afternoon and into Wednesday. Rain is expected to stretch well north of Seattle, and as far south as San Diego, though very little is expected to reach extreme southern California or inland to Arizona and New Mexico.

Today's discussion is from the
Miscellaneous Category.

SAFENET

SAFENET is a form and process that provides a method for reporting unsafe situations on or off the fireline. The information provided on the form will help collect important, safety-related data to determine long-term trends and problem areas. A SAFENET may be filled out at any time to report a valid concern about unsafe situations in fire operations, as well as document corrective action.

- Discuss the methods for filing a SAFENET.
 - Electronically by accessing the SAFENET website at safenet.nifc.gov or linking to it through the NIFC website.
 - By hardcopy via US Mail. SAFENET paper forms are stamped, self-addressed, sealable forms that can be mailed from any US postal drop.
- Discuss advantages of filing a SAFENET through your supervisor versus sending it yourself.
 - Increase the chances of finding an immediate solution.
 - Keeps supervisor "in the loop."
- Discuss using SAFENET in situations other than fire.
 - Prescribed fire
 - All-risk
 - Training
- Where does a SAFENET go, and what response can you expect?
 - SAFENETs are received and stored in a database in Boise. After a SAFENET is received, the names are removed. . The SAFENET doesn't get posted to the web until 48 hours after it has been forwarded to the affected agencies for corrective action.
 - Every new SAFENET is then forwarded to the affected agency's designated list of contacts, which usually includes the National or Regional Safety Officer.
 - It is each agency's responsibility to ensure that corrective actions are taken.
- Corrective actions can be filed by anyone at any time. They are automatically attached to the individual SAFENET on the database. This statement could probably use a little work. We sometimes get "arm-chair quarterbacks" who weren't remotely involved with the incident submitting corrective actions. One example read something like, "This squad boss should be given a stern talking to by their supervisor and told „Get it right or get out of fire,“" We don't want folks who weren't involved or in the chain of command making guess-work corrective actions. A corrective action is also sanitized to remove names or identifying information, and only goes public when the SAFENET does.
- Discuss using SAFENET to monitor safety issues other firefighters may be having.
