National Interagency Coordination Center Incident Management Situation Report Friday, January 1, 2010 – 0800 MT National Preparedness Level 1

National Fire Activity (Weekly Total)

Initial attack activity: Light (58 new fires)

New large fires: 0 (*)
Large fires contained: 0
Uncontained large fires : ** 0
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 0

Nationally, there are 0 large fires being managed with minimal or no resource commitment that are not shown on today's report.

Link to Geographic Area daily reports.

Predictive Services Discussion: Showers are expected over Florida today. Otherwise, colder and drier air will be spreading into the Southeast this weekend. Low humidity is on tap for portions of Florida and Georgia Saturday through Monday. Oklahoma and the Texas Panhandle will see dry weather through Monday.

<u>Link</u> to Predictive Services Outlook products.

^{**} Uncontained large fires do not include confine/contain and resource benefit incidents.

Today's discussion is from the Weather / Fire Behavior Category

Unfamiliar With Weather And Local Factors Influencing Fire Behavior

- Ask questions of local experts! What kinds of questions would you ask?
- Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?
- Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?
- Is there any other way to obtain information? List common sources of information on weather and local factors (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)
- To reduce risks:
 - Base all actions on current and expected fire behavior.
 - Post lookouts.
 - Establish escape routes and safety zones.
 - Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things—southeast or Alaska).
 - Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking
