National Interagency Coordination Center Incident Management Situation Report Friday, March 12, 2010 – 0800 MT National Preparedness Level 1

National Fire Activity (Weekly Total)

Initial attack activity: Moderate (1,736 new fires)

New large fires: 29 (*)
Large fires contained: 24
Uncontained large fires: ** 5
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 0

Nationally, there are 0 large fires being managed with minimal or no resource commitment.

Link to Geographic Area daily reports.

All incident management specialists assigned to assist the State of Victoria in Australia are being released.

Southern Area (PL 1)

New fires:1,665New large fires:21Uncontained large fires:5

Osage-Miami Complex, Osage Agency, BIA. One mile south of Pawhuska, OK. Grass. Active fire behavior. Residences threatened.

Owl Creek, Oklahoma DOF. Five miles southeast of McCurtain, OK. Grass. No further information received. Last report unless new information is received.

ORV, Oklahoma DOF. Four miles north of Braggs, OK. Hardwood litter. No further information received. Last report unless new information is received.

Fire Hollow, Oklahoma DOF. Seven miles southeast of Stilwell, OK. Hardwood litter. No further information received. Last report unless new information is received.

Fork Handle, Oklahoma DOF. Fifteen miles north of Muldrow, OK. Hardwood litter. No further information received. Last report unless new information is received.

Predictive Services Discussion: Most of the Southeast will have showers today with dry weather on tap for Friday and through the weekend. The Southwest will be dry today. A storm over the weekend will bring rain and mountain snow mainly to the north half of the Southwest Area. It will be dry and windy from eastern Colorado south to the Texas Panhandle today, with lighter winds on Saturday.

Link to Predictive Services Outlook products.

Today's discussion is from the Fireline Safety Category.

Taking a Nap Near the Fireline

Firefighting is often exhausting work and firefighters can find themselves needing to sleep while on the fireline. Before pausing to rest, firefighters must weigh the following considerations:

- Are lookouts posted? Discuss who that lookout can be. Can the lookout on the knob across the draw watch over you or does it need to be your partner on the fireline alternating rest times?
- Is the area free of hazards? (Falling snags or rolling materials) Discuss what you need to do to create a safe resting area.
- Are you still within agency work and rest guidelines? Review what these guidelines are.
- Does your crew need a break? Have they been pushed too hard? Talk about situations where you need to simply take yourself and/or your crew off the fire for uninterrupted rest.
- To reduce risks:
 - Keep lookouts posted; rotate lookouts.
 - Communicate crew conditions and status to supervisor or chain-of-command contact. Have firefighters discuss
 ways that they find to rest on the fireline and suggestions for methods to alternate shifts for more effective
 firefighting.
