National Interagency Coordination Center Incident Management Situation Report Friday, April 16, 2010 – 0800 MT National Preparedness Level 1

National Fire Activity (Weekly Total)

Initial attack activity: Moderate (1,626 new fires)

New large fires: 37 (*)
Large fires contained: 45
Uncontained large fires : ** 8
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 1

Nationally, there are 0 large fires being managed with minimal or no resource commitment.

Link to Geographic Area daily reports.

Southern Area (PL 2)

New fires: 1,079
New large fires: 23
Uncontained large fires: 4

- * **Orphan Hill**, Texas Forest Service. Nine miles southwest of Balmorhea, TX. Juniper and brush. Torching and short-range spotting.
- * **Sandhill #5**, Kentucky DOF. Started on private land eight miles south of Mount Vernon, KY. Hardwood litter. Upslope runs with torching and spotting.
- * **Hunkerson Gap**, George Washington and Jefferson NF. Fifteen miles northwest of Broadway, VA. Hardwood litter. Smoldering.
- * West Sellers Mountain, Oklahoma DOF. Seven miles south of Tahlequah, OK. Hardwood litter. No further information received.

N4S - New Mexico State Forestry

Predictive Services Discussion: The main fire weather concerns over the next few days are 1) windy and low humidity conditions over portions of Minnesota, Wisconsin and Michigan today and Saturday 2) dry, windy weather over portions of Virginia and North Carolina today and Saturday and 3) low humidity and gusty winds at times over southern Arizona through the weekend.

Link to Predictive Services Outlook products.

Today's discussion is from the Weather / Fire Behavior Category

UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

- Ask questions of local experts! What kinds of questions would you ask?
- Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?
- Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?
- Is there any other way to obtain information? List common sources of information on weather and local factors (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)
- To reduce risks:
 - Base all actions on current and expected fire behavior.
 - Post lookouts.
 - Establish escape routes and safety zones.
 - Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things—southeast or Alaska).
 - Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking
