National Interagency Coordination Center Incident Management Situation Report Tuesday, May 4, 2010 – 0530 MT National Preparedness Level 1

National Fire Activity

Initial attack activity:	Light (152 new fires)
New large fires:	0 (*)
Large fires contained:	0
Uncontained large fires : **	1
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
	1 20 2 2 1

Nationally, there are 2 large fires being managed with minimal or no resource commitment. ** Uncontained large fires do not include confine/contain and resource benefit incidents.**

Link to Geographic Area daily reports.

Eastern Area (PL 2)	
New fires:	52
New large fires:	0
Uncontained large fires:	1

Noud Lake, Huron-Manistee NF. Six miles north of Branch, MI. Hardwood litter and grass. No further information received.

Predictive Services Discussion: A storm system moving across the West today will bring areas of gusty winds and low humidity from New Mexico northward to the Dakotas and Minnesota. Rain is expected over northern Florida and the East Coast.

Link to Predictive Services Outlook products.

Today's discussion is from the Aviation Category.

AVIATION MISHAP RESPONSE ACTIONS

Having a written mishap response action posted and accessible to all employees is an important first step. Having a list of actions to follow will ensure that nothing is missed in a stressful, time-critical period. Response plans have to be briefed to all on the crew.

- Immediate, positive action is necessary. Any delay may affect someone's chances of survival.
- Conduct rescue operations keeping the following priorities in mind:
 - Preserve life. Rescuers first!!!
 - Do whatever is necessary to extricate injured occupants and to extinguish fires, keeping in mind the necessity of protecting and preserving evidence.
 - Document and/or photograph the location of any debris that must be disturbed in order to carry out rescues and/or fire suppression activities.
 - Secure the area. Treat the crash site as a crime scene. Arrange for security at the accident scene if necessary. Determine if hazardous materials were on the aircraft. Deny access except to credentialed officials and escorted media.
- Be aware that crash sites can be dangerous due to hazardous cargo, flammable and toxic fluids, sharp objects, disease, adverse terrain, hot/cold weather conditions, and fire.
- Exercise good judgment, utilize available protective devices and clothing, and use extreme caution when working near the wreckage site.
- Do not exceed your physical limitations.
- Activity: Review your unit's mishap response plan with the crew. Consider practicing with a crash rescue drill or scenario.
