National Interagency Coordination Center Incident Management Situation Report Saturday, August 7, 2010 – 0530 MDT National Preparedness Level 2

National Fire Activity

Initial attack activity: Light (188 new fires)

New large fires: 12 (*)
Large fires contained: 5
Uncontained large fires: ** 18
Area Command Teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 2

Nationally, there are 50 large fires being managed to achieve multiple objectives.

Link to Geographic Area daily reports.

Interagency personnel are assigned to a number of locations in the Gulf of Mexico to assess and mitigate impacts resulting from the Deepwater Horizon oil spill.

- Support to the Fish and Wildlife Service includes these areas: Bayou Savage NWR (LA), Big Branch Marsh NWR (LA), Breton NWR (LA), Delta NWR (LA), Shell Key NWR (LA), Bon Secour NWR (AL), Grand Bay NWR (AL), St. Vincent NWR (FL), and McFaddin NWR (TX).
- Support to the National Park Service includes these areas: Gulf Islands National Seashore (FL), Jean Lafitte Park and Preserve (LA), Everglades National Park (FL), Dry Tortugas (FL), Biscayne National Park (FL), De Soto National Memorial (FL) and Big Cypress National Preserve (FL).

Northwest Area (PL 2)

New fires:	12
New large fires:	1
Uncontained large fires:	5
Type 2 IMTs committed:	1

Rooster Rock, Deschutes NF. IMT 2 (Rapp). Six miles south of Sisters, OR. Timber, brush and grass. Creeping and smoldering. Residences threatened.

* **Eureka,** Washington DNR. Twenty-five miles northwest of Walla Walla, WA. Brush and grass. Active fire behavior. Residences threatened.

Rainbow Bridge, North Cascades National Park. Two miles north of Stehekin, WA. Timber and brush. No new information.

Poker Jim Ridge, Sheldon-Hart Mountain NWR. Forty-two miles northeast of Lakeview, OR. Brush and grass. Minimal fire activity.

^{**} Uncontained large fires include only fires being managed under a full suppression strategy. **

Leahy Junction, Washington DNR. Previously reported incident. Fourteen miles southeast of Bridgeport, WA. Brush and grass. Minimal fire activity.

N5S - Capitan District, New Mexico State Forestry

Predictive Services Discussion: Significant fire potential is expected today in northern California due to lightning activity and in southwest Wyoming for wind. Thunderstorms are expected in southeast Oregon, the Great Basin, Wyoming and the Northern Rockies. Besides Wyoming, gusty winds are also on tap for the Northwest, Northern Rockies, southern California, southern Great Basin and northwest Arizona.

Link to Predictive Services Outlook products.

Today's discussion is from the Fireline Safety Category.

Roadside Incident Response

Nationally, the number of injuries and fatalities among emergency responders who are responding to roadside incidents is increasing at an increasing rate. Although most wildland fires occur in remote areas, there are situations where wildland fire personnel are responding to fires along rural country roads, jeep roads, or major highways; the risk still exists for our firefighters. Below is a checklist of considerations that should be utilized when responding to fires and other incidents along roadsides:

Considerations

- Firefighter and public safety will always be the number one priority.
- Utilize L.C.E.S. in all incident activities.
- Personal Protective Equipment will be used on all incidents.

Upon Arrival at the Scene

Size up incident- see Incident Response Pocket Guide

- What has happened?
- What is happening?
- What will or could happen?
- Is this a HazMat situation?

Risk Management Process-

• Decision Point, Go No Go. See the Incident Response Pocket Guide, page 1

Tactical Considerations

- Anytime traffic flow is affected by the incident, contact the jurisdictional law enforcement agency for assistance.
- Conduct all operations as far from traffic lanes as possible to provide for crew and public safety.
- Park units on the same side of the roadway whenever possible to avoid traffic congestion.
- Personnel do not exit the fire apparatus until instructed to do so by the module leader.
- Exit the fire apparatus away from the roadway or where hazard exposure is minimized.
- Exit the fire apparatus with full personal protective equipment.
- Post a lookout to watch for and control oncoming traffic.
- Utilize forward and rear spotters when visibility is impaired or road conditions warrant.
- Utilize and place road flares or other traffic warning signs whenever possible
- If equipment needs to be removed from the traffic side of the apparatus, one person will retrieve the equipment and a lookout will watch for oncoming traffic.
- Engine operators will operate pumps from the non-traffic side or from the cab of the apparatus when
 possible. Keep all hose, fire tools, and equipment out of traffic lanes when possible.
- During night operations utilize reflective clothing, vests and other safety equipment as necessary.
- All emergency responses on roadways will be concluded as quickly as possible to reduce personnel exposure.
- Cancel or demob unnecessary apparatus as soon as possible.
- ** Each agency emergency vehicle operator will follow their particular state laws and agency policies governing the operations of emergency vehicles.
