# National Interagency Coordination Center Incident Management Situation Report Monday, August 30, 2010 - 0530 MT <br> National Preparedness Level 2 

## National Fire Activity

Initial attack activity:
New large fires:
Large fires contained:
Uncontained large fires: **
Area Command Teams committed: 0
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (115 new fires)
5 (*)
52601311

Nationally, there are 55 large fires being managed to achieve multiple objectives.
** Uncontained large fires include only fires being managed under a full suppression strategy. **
Link to Geographic Area daily reports.

Interagency personnel are assigned to a number of locations in the Gulf of Mexico to assess and mitigate impacts resulting from the Deepwater Horizon oil spill.

- Support to the Fish and Wildlife Service includes these areas: Bayou Savage NWR (LA), Big Branch Marsh NWR (LA), Breton NWR (LA), Delta NWR (LA), Shell Key NWR (LA), Bon Secour NWR (AL), Grand Bay NWR (AL), St. Vincent NWR (FL), and McFaddin NWR (TX).
- Support to the National Park Service includes these areas: Gulf Islands National Seashore (FL), Jean Lafitte Park and Preserve (LA), Everglades National Park (FL), Dry Tortugas (FL), Biscayne National Park (FL), De Soto National Memorial (FL) and Big Cypress National Preserve (FL).

## Eastern Great Basin Area (PL 4)

New fires: 13
New large fires: 0
Uncontained large fires: 10
NIMOs committed: 1
Type 2 IMTs committed: 5
Whitehawk Mountain, Boise NF. Nimo (Gage) and IMT 2 (Wilde). NIMO and IMT are also managing the Casner and Frazier fires. Fourteen miles northeast of Lowman, ID. Timber. Minimal fire activity. Precipitation occurred over the fire area yesterday.

Casner, Boise NF. Fifteen miles northeast of Lowman, ID. Timber. Minimal fire activity. Precipitation occurred over the fire area yesterday.

Harris Complex (4 fires), Southwest Area Office, Idaho Dept. of Lands. IMT 2 (Heintz). Includes previously reported Cottonwood incident. Started on private land five miles southeast of Horseshoe Bend, ID. Timber. Minimal fire activity. Precipitation occurred over the fire area yesterday.

Hot Tea, Boise District, BLM. IMT 2 (Swartzlander). Ten miles northeast of Mountain Home, ID. Timber, brush and grass. Smoldering.

Hurd, Boise NF. IMT 2 (Kidd). Eight miles northwest of Cascade, ID. Timber. Smoldering. Numerous structures threatened. Precipitation occurred over the fire area yesterday.

Frazier, Boise NF. Three miles west of Crouch, ID. Timber. Smoldering. Numerous structures threatened.
North Bliss, Twin Falls District, BLM. Transfer of command from IMT 2 (Whalen) back to local unit will occur today. IMT is also managing the Long Butte fire. Eight miles northeast of Bliss, ID. Brush and grass. Minimal fire activity.

Long Butte, Twin Falls District, BLM. Thirty-five miles south of Glenns Ferry, ID. Brush and grass. Minimal fire activity.

Predictive Services Discussion: Windy conditions are on tap for northern Arizona, southern Utah, Colorado and Wyoming. Cool and wet weather is expected over portions of the Northwest, Idaho, Montana and Wyoming. Wet thunderstorms will be scattered across the Rockies and the Southwest.

Link to Predictive Services Outlook products.

## Today's discussion is from the Fireline Safety Category.

## FIRE NOT SCOUTED AND SIZED UP

Watchout Situation \#1 comes up during initial attack and every time resources arrive at a fire.

Before taking action on the fire, the following considerations must be addressed:

- Can you personally observe the fire or must you use scouts? Describe ways you can scout and size up a fire.
- Do you know the location of the fire perimeter? Discuss situations in which the fire perimeter may not be obvious. (Spotty fires, etc.)
- Do you know the direction of fire spread? When isn't the direction of fire spread obvious? (Wind shifts, spotty fires, etc.)
- Does the direction of fire spread increase risk? Talk about situations where you may have to approach the head of the fire. (Hiking down from a helispot, approaching from an existing road, switching winds, etc.)
- Do you know the fuels and their condition? What kind of information will you assume from what you already know about fuel types? (Spot fires in fir, extreme fire potential in flashy fuels, etc.)
- Are there aerial resources that can act as lookouts?

## - Continued...

- Do topographic hazards exist? What can you assume from what kind of terrain the fire covers? (Slope, chimneys, aspect, etc.)
- Does enough information exist to establish a plan of attack? When do you have enough information to begin fighting fire? What do you need to know?
- Do other dangers exist? Have you talked about factors specific to the area you are working in? (Hunters in the woods, drought, snag patches, etc.)
- To reduce the risks:
- Post lookouts until the fire is sized up and escape routes and safety zones are established.
- Retreat if the situation is too complex. Review fires where you had to wait until the area in which you were assigned to work was scouted and sized up before you were allowed onto the fireline.
