

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, March 3, 2011 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (44 new fires)
New large fires:	6 (*)
Large fires contained:	4
Uncontained large fires: **	14
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 0 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires:	40
New large fires:	5
Uncontained large fires:	14

Iron Horse, Florida DOF. Thirteen miles northwest of Titusville, FL. Southern rough. Spotting. Numerous structures threatened. Interstate 95 temporarily closed.

Willow Creek South, Texas Forest Service. Started on private land 16 miles northeast of Amarillo, TX. Brush and grass. No further information received.

Mitchell County Complex (2 fires), Texas Forest Service. Started on private land 21 miles southeast of Big Spring, TX. Brush and grass. No further information received.

Shepard's Complex, Texas Forest Service. Started on private land six miles southwest of Scurry, TX. Timber. No further information received.

Crews Road, Georgia Forestry Commission. Five miles southeast of Hoboken, GA. Southern rough. Interior burning.

* **WF Texas Air Point Log**, McFaddin NWR. Jefferson County TX. Grass. Residences threatened. No further information received.

Tanglewood Complex, Texas Forest Service. Six miles south of Amarillo, TX. Brush and grass. No further information received.

Keller, Florida DOF. Fifteen miles southeast of Jacksonville, FL. Southern rough. Moderate fire activity. Residences threatened.

* **West**, Osage Agency, BIA. Five miles southeast of Pawhuska, OK. Hardwood litter. Moderate fire activity. Structures threatened.

Mind, Texas Forest Service. Started on private land ten miles southwest of Alpine, TX. Juniper, brush and grass. Active fire behavior.

Ferry 7, National Forests in Florida. Five miles northeast of Salt Springs, FL. Southern rough. Smoldering with single tree torching.

Gregory Mill, National Forests in Florida. Fifteen miles south of Bristol, FL. Southern rough. Smoldering in heavy fuels.

* **Pine Tree**, Oklahoma DOF. Five miles north of Counts, OK. Grass. No further information received.

* **Sulphur Draw**, Texas Forest Service. Started on private land ten miles west of Big Springs, TX. Brush and grass. Active fire behavior.

N5S – Capitan District, New Mexico State Forestry

Predictive Services Discussion: Critical fire weather conditions will continue in east central New Mexico on Thursday. Eastern New Mexico will experience low relative humidity and gusty winds, which will continue into Friday. Low relative humidity is expected in the Mid-Atlantic states on Thursday, but with light winds and cool temperatures.

**Today's discussion is from the
Weather / Fire Behavior Category.**

FREQUENT SPOT FIRES ACROSS THE LINE

There are few watch out situations that state more clearly how much potential your fire has for rapid, uncontrolled growth. Consider the following questions if you are getting spot fires across your line:

- Can you handle increased spotting? List some ways you can keep ahead of spot fires (gridding the green, lookouts, etc.)
- What is your probability of ignition doing? Is it increasing or decreasing?
- Do you have a plan for long-range spotting? In what fuel type and under what conditions will you likely have long-range spotting? What types of plans can you think of for handling long-range spotting?
- Is help available if necessary? What kinds of resources will you have in place or order to handle spot fires?
- If fire behavior increases, is your position still defensible? Discuss what type of action you might take if a spot fire takes off.
- Do you have more than one safety zone in case one gets cut off? Describe how you might have multiple safety zones.
- Do the primary lookouts have a good view of the situation? Discuss who might be acting as a lookout (e.g., crew member, air resources, etc.) and how you will get good information from that person. (Are you relying on an air attack that is busy with air tankers?)
- Where are you in the burning period? Talk about how your tactics may vary from finding spot fires early in the day to later into the evening. Review Probability of Ignition (PIG) and what it can tell you about spotting potential.
- To reduce the risk, be ready to retreat. Keep your guard up even if spotting has not occurred for a few hours. Review fires where you have had frequent spot fires and what you learned about controlling them.
