

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, March 7, 2011 – 0800 MT  
National Preparedness Level 1**

**National Fire Activity**

Initial attack activity: Light (20 new fires)  
 New large fires: 1 (\*)  
 Large fires contained: 2  
 Uncontained large fires: \*\* 3  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 0  
 Type 2 IMTs committed: 0

Nationally, there are 1 large fires being managed to achieve multiple objectives.

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Southern Area (PL 3)**

New fires: 15  
 New large fires: 1  
 Uncontained large fires: 3

**Ferry 7**, National Forests in Florida. Five miles northeast of Salt Springs, FL. Southern rough. Smoldering with single tree torching.

\* **Woods**, Oklahoma DOF. Seven miles northeast of Stringtown, OK. Timber. No further information received.

**West**, Osage Agency, BIA. Five miles southeast of Pawhuska, OK. Hardwood litter. No new information. Last report unless new information is received.

FLS – Florida DOF

**Predictive Services Discussion:** A large area of low relative humidity and gusty southwest to west winds is expected from the desert southwest to central Texas. The most critical situation on Monday, relative humidity 7-15% and winds 15-30 mph or more, will coincide with long-term drought conditions from southeast Arizona to western Texas. These conditions will shift east on Tuesday from eastern New Mexico to central Texas. Also, on Monday, portions of interior Florida will see relative humidity drop to 25-35% and temperatures in the 70's, but with winds generally below 10 mph.

**Today's discussion is from the  
Miscellaneous Category.**

### **RESPONDING TO VEHICLE FIRES**

Suppression of vehicle fires is extremely dangerous and poses many health hazards to firefighters. The following procedures are recommended:

- Secure the scene and provide or request assistance for traffic control.
- Provide for your escape route at the scene.
- Do not use road flares if fuel is leaking from the vehicle or if wildland fuel is nearby.
- Vehicle fires are considered a hazardous materials scene. Suppression action should only be taken if the crew is trained, equipped, and authorized in the use of Self-Contained Breathing Apparatus (SCBA).
- If taking suppression action on wildland fuels, firefighters should ensure that they are a safe distance from the burning vehicle (100-foot minimum), and avoid contact with vehicle fire smoke or fumes.
- Check vehicle for hazmat placard
- Vehicle fires in remote areas are often associated with illegal drug manufacturing – request and wait for law enforcement
