

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, March 18, 2011 – 0800 MT  
National Preparedness Level 1**

**National Fire Activity**

Initial attack activity: Light (133 new fires)  
 New large fires: 4 (\*)  
 Large fires contained: 4  
 Uncontained large fires: \*\* 5  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 0  
 Type 2 IMTs committed: 0

Nationally, there are 1 large fires being managed to achieve multiple objectives.

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Southwest Area (PL 2)**

New fires: 24  
 New large fires: 0  
 Uncontained large fires: 3

**Pena**, Coronado NF. Eleven miles west of Nogales, AZ. Grass. Smoldering.

**Eagle Draw**, Roswell Field Office, BLM. Twenty miles west of Artesia, NM. Grass. Moderate fire activity.

**Lambson**, Bernallio District, New Mexico State Forestry. Nine miles south of Ramah, NM. Grass. No new information.

**Predictive Services Discussion:** Warming and drying across North Carolina and central Florida will increase fire potential on Friday through the weekend. Precipitation decreases across the Intermountain West, with lingering showers moving through the Midwest. Another low pressure system will move into the Pacific Northwest, which will bring valley rain and mountain snow along the west coast.

Today's discussion is from the  
Hazard Tree Category.

## HAZARD TREE - RISK MANAGEMENT

### Situational Awareness/ Hazard Assessment

#### ● Environment:

- Existing winds and forecast
- Night operations
- Steep slopes
- Diseased or bug-kill areas
- Number, density, and height of hazard trees
- Anticipated burn-down time
- Potential for domino effect to surrounding trees
- Maintain situational awareness and continually reassess hazards

#### ● Hazard Tree Indicators:

- Trees burning for any period of time
- High risk tree species (rot and shallow roots)
- Numerous downed trees
- Dead, broken, or burning tops and limbs overhead
- Accumulation of downed limbs
- Absence of needles, bark or limbs
- Leaning or hung-up

● **Note:** In addition to suppression and mop-up operations, assess, control, and monitor hazard trees along roads and when selecting break areas or campsites.

#### ● Hazard Control:

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment
- Avoid hazards by designating "No Work Zones" (NWZ) – (flag, sign, and map)
- Modify suppression tactics or fireline location to avoid extreme/high risk rated area
- Post lookouts to help maintain secure area
- Fire proof potential hazard trees to prevent ignition
- Initiate road/traffic control and area closure
- Keep clear of bucket drops near trees/snags
- Establish trigger points for reposition to secure areas in response to high winds
