

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, April 12, 2011 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Heavy (324 new fires)
New large fires:	7 (*)
Large fires contained:	6
Uncontained large fires: **	19
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	0

Nationally, there are no large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Southern Area (PL 3)

New fires:	173
New large fires:	4
Uncontained large fires:	12
Type 1 IMT committed	1

Rock House, Texas Forest Service. IMT1 (Quesinberry). IMT also managing the Roper fire. Fort Davis, TX. Grass. Extreme fire behavior. Residences threatened.

* **Roper**, Texas forest Service. One mile northeast of Alpine, TX. Grass. Extreme fire behavior. Residences threatened.

Swenson, Texas Forest Service. Three miles north of Swenson, TX. Brush and grass. Minimal fire activity.

Killough, Texas Forest Service. Six miles north of Post, TX. Mesquite and grass. Moderate fire activity. Reduction in acreage due to more accurate mapping.

Hickman, Texas Forest Service. Started on private land in Midland, TX. Grass. Minimal fire activity.

* **Encino**, Texas Forest Service. Thirteen miles west of San Angelo, TX. Grass. Active fire behavior. Residences threatened. Evacuations in effect.

* **Cooper Mountain Ranch**, Texas Forest Service. Fifteen miles northeast of Sterling City, TX. Grass. No further information received.

Elim Church Rd., Georgia Forestry Commission. One mile northeast of Ludiwici, GA. Southern rough. Minimal fire activity.

Camp Bowie, Texas Forest Service. Started on private land six miles southeast of Brownwood, TX. Oak, cedar and grass. Minimal fire activity.

* **Wildcat**, Texas Forest Service. Nineteen miles southwest of Bronte, TX. Grass. No further information received.

Washita Creek, Oklahoma DOF. Seven miles east of Fletcher, OK. Hardwood litter. No new information. Last report unless new information is received.

Jackpot, Big Cypress National Preserve. Five miles southeast of Ochopee, FL. Southern rough and grass. No new information. Last report unless new information is received.

Predictive Services Discussion: Windy, dry, and unstable conditions will occur over the eastern portions of Colorado and New Mexico, eastward into western Kansas, Oklahoma and Texas. Cool and wet weather can be expected over Utah, Wyoming and Montana. Showers and thunderstorms will be possible over the Mid-Atlantic region northward into New England, while warm and dry weather will dominate the southern tier of the United States.

[Link](#) to Predictive Services Outlook products.

Today's discussion is from the
Wildland / Urban Interface Category.

WILDLAND/URBAN INTERFACE -- STRUCTURE PROTECTION

The primary consideration of any operation is to assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structure.

● Factors that may make an attempt to save a structure hopeless or too dangerous include:

- The fire is making a sustained run and there is little or no clearance between the structure and the fuel.
- The fire behavior is extreme; spot fires are numerous and the spread is outpacing containment.
- Water supply will not last as long as the threat of the fire.
- The fire intensity dictates that you leave the fire area immediately.
- The structure is constructed of wood and has a wood, shake roof.
- The roof of the structure is more than one-quarter involved.
- There is fire inside of the structure or windows are broken and there is no way to quickly repair them.
- You can safely remain at the structure because your escape route could become unusable.

● When implementing a plan to protect structures, consider the following:

- Don't enter a burning structure unless you are trained, equipped, and authorized. Firefighter safety and survival is the number one priority.
- Always stay mobile and wear all of your PPE.
- Back in equipment to allow for a quick escape.
- Coil a short, charged line with fog nozzle on your engine for safety and quick knock down capability.
- Don't make long hose lays. Keep at least 100 gallons of water reserve in your tank.
- Check the road system before the fire approaches. Know bridge limits, alternate access routes, and turnarounds for your vehicle and other support vehicles.
- Determine if residents are home. Leave on the inside and outside lights, regardless of the time of day. Close the garage door.
- Place the owners' ladder at a corner of the home on the side with the least fire threat.
- Coil and charge garden hoses.
- Check and mark hazmat; e.g., LPG, pesticides, and paint storage.
