

**National Interagency Coordination Center  
Incident Management Situation Report  
Wednesday, May 18, 2011 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (89 new fires)
New large fires:	1 (*)
Large fires contained:	1
Uncontained large fires: **	9
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	6

Nationally, there are 3 large fires being managed to achieve multiple objectives.

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Southern Area (PL 4)**

New fires:	41
New large fires:	1
Uncontained large fires:	5
NIMOs committed:	1
Type 2 IMT committed:	4

NIMO (Gage) and Southern Area IMT 2 (Dueitt) are assigned to manage large fires and provide support to initial attack operations for the West Branch Operational Area in Texas. Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

**Honey Prairie**, Okefenokee NWR. Georgia IMT 2 (Kline). Five miles northeast of Fargo, GA. Southern rough. Moderate fire activity.

**Pains Bay**, Alligator River NWR. North Carolina IMT 2 (Smith). Nineteen miles south of Manns Harbor, NC. Brush. Minimal fire activity.

**Iron Mountain**, Texas Forest Service. Ten miles northwest of Alpine, TX. Brush and grass. Minimal fire activity.

**Schwartz**, Texas Forest Service. Twenty miles east of Marathon, TX. Hardwood slash, brush and grass. Minimal fire activity.

**Jarhead**, Big Cypress National Preserve. Seven miles north of Oasis, FL. Southern rough. Minimal fire activity.

\* **Price**, Texas Forest Service. Fifteen miles west of Sterling City, TX. Brush and grass. Active fire behavior. Structures threatened.

### **Southwest (PL 4)**

New fires: 1  
New large fires: 0  
Uncontained large fires: 3  
Type 1 IMT committed: 1  
Type 2 IMT committed: 2

**Horseshoe 2**, Coronado NF. IMT 1 (Reinarz). Fifty miles northeast of Bisbee, AZ. Timber and grass. Active fire behavior. Residences threatened. Evacuations in effect.

**Miller**, Gila NF. IMT 2 (Templin). Twenty-five miles north of Silver City, NM. Timber and grass. Moderate fire activity. Residences threatened.

**Mayhill**, Capitan District, New Mexico State Forestry. Transfer of command from IMT 2 (Pierson) back to local unit occurred yesterday. Two miles west of Mayhill, NM. Hardwood slash, brush and grass. Minimal fire activity.

**Tivis**, Capitan District, New Mexico State Forestry. Three miles west of Floyd, NM. Grass. No new information. Last report unless new information is received.

**Rio**, Santa Fe NF. Fourteen miles southeast of Cuba, NM. Timber, brush and grass. Minimal fire activity. Structures threatened. Reduction in acreage due to more accurate mapping.

**Predictive Services Discussion:** Critical fire weather conditions associated with strong, gusty winds of 25 to 40 mph and relative humidity below 15 percent will persist across eastern New Mexico and west Texas. A deep trough over the western US will produce scattered showers, thunderstorms and snow at higher elevations across much of the West Coast, Intermountain region and the central Plains. A slow moving low over the East Coast will keep scattered showers and thunderstorms over the Ohio Valley, New England and the mid-Atlantic states.

[Link](#) to Predictive Services Outlook products.

Today's discussion is from the Environmental Factors Category.

## THUNDERSTORM SAFETY

Thunderstorms cause significant hazards for wildland firefighters, including downbursts that can cause extreme fire behavior and lightning. When thunderstorm development is likely, lookouts should be posted and aware of signs of a developing storm. A sudden reversal in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature may note the mature stage of a storm. Heavy rain, hail and lightning occur only in the mature stage of a thunderstorm. During a storm, use the following guidelines:

- Do not lie down.
  - The best position is sitting on the pack or crouching with feet close together.
  - Avoid sitting directly on the ground, if possible; but, if necessary, keep feet and butt close together.
  - Avoid grouping together. Keep a minimum of 15 feet between people when possible.
  - Removing caulk boots will not provide safety if stocking covered or bare feet are then in contact with the ground--don't bother!
  
- "Stay out of dry creek beds" is correct for flash floods, but has nothing to do with lightning.
- Handheld radios (with short rubber antennas) or cell phones are safe to use. Communication is vital to crew safety. Do not use land line radios or radios with elevated antennas.
- Wide, open spaces are better than trees or clumps of trees in the vicinity. Ridge tops, etc., should be avoided.
- If you feel the hair on your arms or head "stand up," there is a high probability of a strike in the vicinity. Crouch or sit on a pack.
- Put down all tools.
- Take shelter in vehicles if possible.
