

**National Interagency Coordination Center
Incident Management Situation Report
Monday, May 23, 2011 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (92 new fires)
 New large fires: 5 (*)
 Large fires contained: 3
 Uncontained large fires: ** 11
 Area Command Teams committed: 0
 NIMOs committed: 1
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 6

Nationally, there area 3 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Geographic Area daily reports: <http://www.nifc.gov/nicc/predictive/statelinks.htm>

Southern Area (PL 4)

New fires: 25
 New large fires: 1
 Uncontained large fires: 5
 NIMOs committed: 1
 Type 2 IMTs committed: 4

NIMO (Gage) and IMT 2 (Dueitt) are assigned to manage large fires and provide support to initial attack operations for the West Branch Operational Area in Texas. Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Honey Prairie, Okefenokee NWR. Florida IMT 2 (Leneave). Five miles northeast of Fargo, GA. Southern rough. Moderate fire activity.

Pains Bay, Alligator River NWR. North Carolina IMT 2 (Smith). Nineteen miles south of Manns Harbor, NC. Timber and brush. Minimal fire activity.

Jarhead, Big Cypress National Preserve. Seven miles north of Oasis, FL. Southern rough. No new information.

Tison, Sabine NWR. Seventeen miles southwest of Hackberry, LA. Grass. Moderate fire activity.

* **Wolf**, Texas Forest Service. Ten miles southwest of Archer City, TX. Grass. Moderate fire activity.

Ho Bo, Mississippi Forestry Commission. Seventeen miles northwest of Gulfport, MS. Timber. No new information. Last report unless new information is received.

Predictive Services Discussion: Critical fire weather conditions associated with strong, gusty winds of 20 to 35 mph and low relative humidity of 5 to 13 percent will affect eastern Arizona, much of New Mexico and west Texas. A deepening trough over the western US will create windy and dry conditions across the Southwest while rain and a few thunderstorms will develop over much of the Northwest, northern and central Rockies and the Great Basin. A slow-moving frontal system in the East will produce showers and thunderstorms from New England, across the Ohio Valley to north Texas. In Alaska, scattered showers will develop over the central Interior and southwest Coastal regions.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
Fireline Safety Category.

INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Every firefighter will be giving and receive briefings at some point on the job. Briefings are an effective way to disseminate information that can make the firefighter's job safer and easier. When giving a briefing, it is important to keep the following questions in mind and remain perceptive to how the audience is receiving the information:

- Did you use the National Incident Response Pocket Guide standards briefing checklist?
- Did they ask questions? Talk about what it is like giving a briefing. Do you get empty stares? What feedback are you looking for to ensure they understand you?
- Did they take notes? What kind of information would you like to see people write down?
- Did they repeat information back? What other ways can you identify that your briefing is registering?
- Did you give all the necessary information? How will you ensure that you covered everything necessary?
 - Task
 - Location
 - Communications
 - Hazards
 - Who, when, etc.
- It is also important for the firefighter who is receiving instructions to be mindful of the following during the briefing:
 - Did you really listen? What do you do to make yourself pay attention to everything being said?
 - Did you understand the assignment, location, and the nature and location of hazards? Do you expect to figure it out for yourself when you get out there or do you step forward and ask questions?
- You must know the location of the assignment and:
 - What is to be done?
 - Who you are to report to and how often to report.
 - When you are expected to complete the assignment.
 - Hazards.
 - Communication plan frequencies.
 - Weather and fire behavior.
 - Status of adjoining forces.
