

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, June 9, 2011 – 0530 MT
National Preparedness Level 3**

National Fire Activity

| | |
|-------------------------------|--------------------------|
| Initial attack activity: | Moderate (232 new fires) |
| New large fires: | 8 (*) |
| Large fires contained: | 6 |
| Uncontained large fires: ** | 25 |
| Area Command Teams committed: | 1 |
| NIMOs committed: | 1 |
| Type 1 IMTs committed: | 6 |
| Type 2 IMTs committed: | 5 |

Nationally, there are 17 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires: 161
 New large fires: 7
 Uncontained large fires: 14
 NIMOs committed: 1
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2

NIMO (Gage) is assigned to manage large fires and provide support to initial attack operations for the West Branch Operational Area in Texas. Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Honey Prairie, Okefenokee NWR. IMT 1 (Wilder). IMT is also managing the Race Pond fire. Five miles northeast of Fargo, GA. Southern rough. Moderate fire activity.

Race Pond, Okefenokee NWR. Eleven miles south of Hoboken, GA. Southern rough. Minimal fire activity.

Pains Bay, Alligator River NWR. North Carolina IMT 2 (Hendricks). Nineteen miles south of Manns Harbor, NC. Timber and brush. Minimal fire activity. Structures threatened.

Prairie, Florida DOF. Five miles west of Doral Park, FL. Grass. Moderate fire activity.

* **Dos Amigos**, Texas Forest Service. Fifteen miles west of Robert Lee, TX. Brush and grass. Active fire behavior. Residences threatened.

* **Bad Land**, Florida DOF. Sixteen miles south of Bronson, FL. Southern rough. Minimal fire activity.

Impassable Bay, National Forests in Florida. Fifteen miles northeast of Lake City, FL. Southern rough. Moderate fire activity.

* **Espanola**, Florida DOF. Seven miles southeast of Bunnell, FL. Southern rough. Moderate fire activity.

Mud Creek, Alabama Forestry Commission. Three miles north of Adger, AL. Southern rough. Active fire behavior. Last report unless significant activity occurs.

***Honey Island**, Texas Forest Service. Five miles west of Kountze, TX. Timber. Active fire behavior.

Eula Mae, National Forests in Mississippi. Seventeen miles north of Wiggins, MS. Southern rough and slash. Minimal fire activity.

C-4, Texas Forest Service. Four miles southeast of Indian Pass, FL. Grass. Minimal fire activity. Structures threatened.

4A, National Forests in Florida. Four miles west of Tallahassee, FL. Southern rough. Minimal fire activity.

Olive, Texas Forest Service. Four miles north of Kountze, TX. Timber. No further information received.

Camp G, Florida DOF. Twelve miles northeast of Canal Point, FL. Southern rough. Moderate fire activity.

Lamb's Head, Texas Forest Service. Thirteen miles west of Woodson, TX. Grass. Minimal fire activity.

MIS – Michigan DNR

Predictive Services Discussion: There will be a decrease in winds over much of the southwestern United States. However, critical fire weather conditions associated with strong winds of 20 to 40 mph will continue over eastern New Mexico and West Texas. Very dry conditions will continue over the Southwest with minimum humidity below 15%. Hot and dry conditions will continue across most of the Southeast and Mid-Atlantic States, except there will be an increase in shower activity over Florida. Scattered showers and thunderstorms will occur over the northern tier of states from Idaho to the Great Lakes and up through the Northeast. In Alaska, temperatures will continue to cool with an increase in shower activity.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the new
Fireline Leadership Category.

Leading Up

Looking out for our people includes not only those who work for us but also our leaders and peers. Leadership is about influencing others to accomplish tasks that are in the best interest of our organization which often means influencing those above us and leading up. Similarly, we are open to upward leadership – and, in fact, encourage and reward it.

- Fire leaders are expected to lead in many directions, an expectation that increases complexity and risk.
- Summoning the courage needed to intervene and influence peers or leaders above can be difficult, especially if providing unwelcome feedback about behavior or pointing out an alternative to a potentially bad decision.
- In high-risk environments, no one can afford to assume that anyone has all the answers.

To build the kind of healthy and resilient culture required in the wildland fire service, we lead up – holding our leaders accountable, providing unvarnished situational awareness in challenging situations, and offering unbiased and viable alternatives.

Discussion Points

- How can we practice leading up?
- Describe a situation where leading up took place. How was the situation affected?
- Describe a situation where there was opportunity for leading up but it was not done. How was the situation affected?
- Discuss leading “laterally”: influencing peers or those with similar responsibilities.
