Predictive Services Discussion: Hot, dry weather will continue over the Southwest. Arizona and western New Mexico will have lighter winds while eastern NM and West Texas will continue to have breezy conditions. Hot, mostly dry conditions will also continue across the other southern states. Florida will again have fewer afternoon thunderstorms. Showers will be developing in Alaska today.

## RESPONDING TO VEHICLE FIRES

Suppression of vehicle fires is extremely dangerous and poses many health hazards to firefighters. The following procedures are recommended:

Secure the scene and provide or request assistance for traffic control. Provide for your escape route at the scene.

Do not use road flares if fuel is leaking from the vehicle or if wildland fuel is nearby.
Vehicle fires are considered a hazardous materials scene. Suppression action should only be taken if the crew is trained, equipped, and authorized in the use of Self-Contained Breathing Apparatus (SCBA).

If taking suppression action on wildland fuels, firefighters should ensure that they are a safe distance from the burning vehicle (100-feet minimum), and avoid contact with vehicle fire smoke or fumes.

Check vehicle for hazmat placard
Vehicle fires in remote areas are often associated with illegal drug manufacturing request and wait for law enforcement
