National Interagency Coordination Center Incident Management Situation Report Tuesday, June 28, 2011 – 0530 MT National Preparedness Level 3

National Fire Activity

| Initial attack activity: | Light (127 new fires) |
|-------------------------------|-----------------------|
| New large fires: | 5 (*) |
| Large fires contained: | 12 |
| Uncontained large fires: ** | 32 |
| Area Command Teams committed: | 1 |
| NIMOs committed: | 1 |
| Type 1 IMTs committed: | 4 |
| Type 2 IMTs committed: | 8 |

Nationally, there are 16 large fires being managed to achieve multiple objectives. ** Uncontained large fires include only fires being managed under a full suppression strategy.

Link to Geographic Area daily reports.

Four MAFFS C-130 aircraft and support personnel, two each from the 146th Airlift Wing, California Air National Guard, Channel Islands, CA, and the 145th Airlift Wing, North Carolina Air National Guard, Charlotte, NC, are deployed to Albuquerque, NM. Col. Jay Pittman is the Air Expeditionary Group Commander.

Southwest (PL 5) New fires: New large fires: Uncontained large fires: Area Command Teams committed: NIMOs committed:

Type 1 IMTs committed: Type 2 IMTs committed:

NIMO (Gage) is assigned to the Coronado National Forest to provide strategic planning and large fire support.

* Las Conchas, Bernalillo District, New Mexico DOF. IMT 1 (Reinarz and Hughes). Thirteen miles west of Los Alamos, NM. Timber and grass. Extreme fire behavior. Numerous residences threatened. Evacuations in effect.

Pacheco, Santa Fe NF. IMT 2 (Templin). Nine miles north of Santa Fe, NM. Timber and slash. Moderate fire activity. Structures threatened.

Monument, Coronado National Memorial, NPS. IMT 2 (Nelson). Three miles west of Sierra Vista, AZ. Timber. Minimal fire activity.

Wallow, Apache-Sitgreaves NF. Area Command Team (Waterbury). IMT 1 (Pincha-Tulley). IMT 2 (Rapp). Twenty-three miles southwest of Alpine, AZ. Timber and grass. Active fire behavior. Numerous residences threatened.

* **Stanley,** San Carlos Agency, BIA. Thirty miles southwest of Phoenix, AZ. Juniper, brush and grass. Extreme fire behavior. Structure threatened.

Track, Cimarron District, New Mexico DOF. One mile north of Raton, NM. Timber and grass. Minimal fire activity.

Wash, Apache-Sitgreaves NF. Eight miles east of Heber, AZ. Timber and grass. Minimal fire activity.

Willow, Apache-Sitgreaves NF. Thirteen miles west of Forest Lakes, AZ. Timber and grass. Minimal fire activity.

* **Rosedale,** Cibola NF. Twenty-five miles south of Magdalena, NM. Timber and grass. No further information received.

Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Juniper Road, North Carolina DFR. North Carolina IMT 2 (Hildreth). Thirteen miles northeast of Rocky Point, NC. Brush. Active fire behavior. Numerous residences threatened.

Honey Prairie, Okefenokee NWR. IMT 1 (Quesinberry). Five miles northeast of Fargo, GA. Southern rough. Minimal fire activity. Numerous residences threatened.

Sweat Farm Again, Georgia DOF. Georgia IMT 2 (Floyd). IMT is also managing the Race Pond fire. Twelve miles west of Waycross, GA. Southern rough. Minimal fire activity. Residences threatened.

Racepond, Georgia DOF. Twelve miles south of Hoboken, GA. Hardwood litter. Minimal fire activity. Numerous residences threatened.

Impassable Bay Complex (2 fires), National Forests in Florida. IMT 2 (Kidd). Fifteen miles northeast of Lake City, FL. Southern rough. Minimal fire activity.

Espanola, Florida DOF. Florida IMT 2 (Graham). Seven miles southeast of Bunnell, FL. Southern rough. No further information received.

Matthews Ranch, Texas Forest Service. Eighteen miles southwest of Throckmorton, TX. Slash and brush. Minimal fire activity. Increase in acreage due to more accurate mapping.

Simmons Road, North Carolina DFR. Nine miles northeast of Tar Heel, NC. Brush. Minimal fire activity. Residences threatened.

White Hat, Texas Forest Service. Eight miles west of Blackwell, TX. Grass. Minimal fire activity.

East Texas Complex (3 fires), Texas Forest Service. Three miles south of Apple Springs, TX. Timber. No new information.

McDonald II, Texas Forest Service. Three miles southwest of Bellevue, TX. Grass. No further information received.

Trent Mesa, Texas Forest Service. Nine miles southwest of Merkel, TX. Brush. No further information received.

FM1166, Texas Forest Service. Fire previously reported as FM 166. Seven miles northwest of Quanah, TX. Grass. Minimal fire activity. Reduction in acreage due to more accurate mapping.

6 Mile Cutoff, Texas Forest Service. Fourteen miles west of Wichita Falls, TX. Grass. Residences threatened. No further information received.

Grits, St. Marks NWR. Four miles south of Sopchoppy, FL. Southern Rough. Minimal fire activity.

Ranch Road, Concho Field Office, BIA. Four miles south of Jet, OK. Hardwood litter. No new information.

Willingham, Texas Forest Service. Twelve miles west of Graford, TX. Slash, juniper and brush. No further information received.

Predictive Services Discussion: A strong trough moving into the West will produce critical fire weather conditions associated with strong winds and low RH over parts of southern California, the southern Great Basin and northern Arizona. Scattered showers will move into the Pacific Northwest, while showers and thunderstorms develop along a front in the East stretching from the Great Lakes to the central Gulf states. Hot and dry conditions will persist across much of the Southwest, with increasing temperatures through the Great Basin.

Predictive Services Outlook products: <u>http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm</u>

Today's discussion is from the Miscellaneous Category.

"This was a tragic accident and our hearts go out to the Palmer family, his [Andy's] friends and his colleagues. Our intent in releasing this report is for all of us to learn from this incident in order to help prevent reoccurrences of this type of event in the future. This is how we will honor Andy, by remembering his commitment to self and colleagues. His passing should serve as a constant reminder to honor your fellow employees by watching out for their safety." NPS Director Jon Jarvis

The Dutch Creek Protocol - Pink Sticker for your IRPG

Between 1340 and 1350 hours on July 25, 2008, the following radio transmission comes into the Iron Complex dispatch center:

"Man Down; Man Down. We need help. Medical emergency. Dozer pad. Broken leg. Bleeding. Drop Point 72 and dozer line. Call 911, we need help."

Firefighter Andy Palmer had been hit by an eight-foot-long by 20-inch diameter section of a sugar pine tree during falling operations on a nearby hazard tree. Approximately three hours later Andy is hoisted into a medevac helicopter. 3 hours 26 minutes pass from the time of the accident to the 18 year old firefighter being pronounced dead due to loss of blood from a shattered femur and severed blood vessels. This tragedy, known as the "Dutch Creek Incident", becomes a red flag that we need to better plan and prepare for injuries on the fireline.

- The emergency medical procedures outlined on this sticker are part of the Dutch Creek Serious Accident Investigation Report Response and were developed by a team created by NWCG.
- To help you effectively report a medical incident from the field, the pink-colored box below should be printed and placed on page 49 of your 2010 Incident Response Pocket Guide (IRPG).
 This straightforward nine-step process provides a standardized checklist to follow during a rapidly emerging medical incident. Review & Practice this process with your crew/team.

| Cut & Paste This Into Your IRPG Dr Order one from the Lessons Learned Center at: Iessonslearnedcenter@gmail.com | In the event of a medical emergency provide the following information to the Communications Unit. 1. Declare the nature of the emergency. a. Medical injury/illness? If injury/illness is it Life Threatening? 2. If Life Threatening, then request that the designated frequency be cleared for emergency traffic. 3. Identify the on-scene Point of Contact (POC) by Smith). 4. Identify nature of incident, number injured, patient assessment(s) and location (geographic and GPS coordinates). 5. Identify on-scene medical personnel by position and name (i.e. EMT Jones). 6. Identify preferred method of patient transport. 7. Request any additional resources and/or equipment needed. 8. Document all information received and transmitted on the radio or phone. 9. Identify any changes in the on-scene Point of Contact or medical personnel as they occur. |
|---|---|
| | nergency provide the communications mergency. hreatening? quest that the cared for emergency of Contact (POC) by c. POC is TFLD by c. POC |
