

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, July 3, 2011 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (193 new fires)
New large fires:	3 (*)
Large fires contained:	3
Uncontained large fires: **	18
Area Command Teams committed:	2
NIMOs committed:	1
Type 1 IMTs committed:	4
Type 2 IMTs committed:	8

Nationally, there are 18 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Four MAFFS C-130 aircraft and support personnel, two each from the 145th Airlift Wing, North Carolina Air National Guard, Charlotte, NC, and the 302nd Airlift Wing, Air Force Reserve, Colorado Springs, CO, are deployed to Albuquerque, NM. Col. Jay Pittman is the Air Expeditionary Group Commander.

NIMO (Gage) is assigned to the Coronado National Forest to provide strategic planning and large fire support. Area Command Team (Oltrogge) is assigned to manage the Las Conchas and Pacheco fires.

Las Conchas, Bernalillo District, New Mexico DOF. IMT 1 (Reinarz, Hughes and Morcom). Thirteen miles west of Los Alamos, NM. Timber and grass. Active fire behavior. Numerous residences threatened. Evacuations in effect.

Donaldson, Capitan District, New Mexico DOF. IMT 2 (Pierson). Twenty-eight miles northwest of Roswell, NM. Grass. Active fire behavior.

Pacheco, Santa Fe NF. Transfer of command from IMT 2 (Templin) back to local unit will occur today. Nine miles north of Santa Fe, NM. Timber and slash. Minimal fire activity.

Wallow, Apache-Sitgreaves NF. Area Command Team (Waterbury). IMT 1 (Pincha-Tulley). Twenty-three miles southwest of Alpine, AZ. Timber and grass. Minimal fire activity.

Stanley, San Carlos Agency, BIA. IMT 2 (Rapp). Twenty miles east of Globe, AZ. Juniper, brush and grass. Minimal fire activity.

Monument, Coronado National Memorial, NPS. Three miles west of Sierra Vista, AZ. Timber. Minimal fire activity.

Little Lewis, Lincoln NF. Two miles southeast of Sacramento, NM. Timber and grass. No further information received.

Number 3, Mescalero Agency, BIA. Sixteen miles southwest of Hondo, NM. Brush and grass. No further information received.

Predictive Services Discussion: Scattered thunderstorms will develop across Arizona, New Mexico and southern Colorado. A cold front over the eastern U.S. will produce scattered showers and thunderstorms from New England to the Ohio Valley and into the upper Midwest. Temperatures will again soar above 100 degrees in the Southwest.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from
"This Day in History"

"Lessons Learned" serve as brief summaries of powerful learning opportunities. You can use these summaries as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, and your unit.

Part I - South Canyon Fire, Colorado, 1994 (A Four-Part Series)

Incident Summary: On July 2, 1994, seven miles west of Glenwood Springs, Colorado, lightning ignites a Bureau of Land Management fire in piñon-pine and juniper on a ridge at the base of Storm King Mountain. The fire, paralleled by two deep canyons, is initially believed to have "little chance" to spread. The past two days, lightning has started 40 new fires on this BLM District. The entire general area, in a one-year drought, is experiencing low humidities and record-high temperatures. Over the next two days, the South Canyon Fire increases in size. Visible from Interstate 70 and nearby residential areas, the public becomes concerned. Some initial attack resources are assigned. Between July 3-6, the fire grows to approximately 2,000 acres. On July 6, a dry cold front moves into the fire area. As winds and fire activity increases, the fire makes several 100-foot flame-length rapid runs within the existing burn—in dense, highly flammable Gambel oak. Fourteen firefighters perish as they try to outrun the flames. The remaining 35 firefighters survive either by escaping down a deep drainage or by seeking a safety area and deploying their fire shelters.

July 3 – Summary of Activities

The Grand Junction BLM District is in very high to extreme fire danger. Ninety percent of its firefighting resources are committed to more than 40 new fires started in the previous 2 days.

A red flag warning is issued for dry lightning. Strong winds hamper the effective use of fire suppression aircraft.

One load—eight—smokejumpers, an air tanker, and lead plane are requested.

An engine crew arrives on scene. Its foreman's initial size-up informs: fire is inaccessible; two flaming trees visible, low spread potential, steep slopes. Until more resources can be obtained, it is recommended that the fire be observed.

Fire Control Officer requests more South Canyon Fire resources from the Western Slope Fire Coordination Center.

Lessons Learned Discussion Points

Your fire crew is now dispatched to the South Canyon Fire. Given the following circumstances, what would you do to ensure that everyone is safe:

- Extreme fire danger due to condition of the fuels,
- Limited resources,
- Difficult terrain,
- Red flag warning for dry lightning and high winds.
