

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, July 5, 2011 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Moderate (203 new fires)
New large fires:	5 (*)
Large fires contained:	3
Uncontained large fires: **	19
Area Command Teams committed:	2
NIMOs committed:	2
Type 1 IMTs committed:	4
Type 2 IMTs committed:	6

Nationally, there are 18 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Type 2 IMTs committed:	1

NIMO (Gage) is assigned to the Coronado National Forest to provide strategic planning and large fire support. Area Command Team (Oltrogge) is assigned to manage the Las Conchas and Pacheco fires.

Las Conchas, Bernalillo District, New Mexico DOF. IMT 1 (Reinarz, Hughes and Morcom). Thirteen miles west of Los Alamos, NM. Timber and grass. Active fire behavior. Numerous residences threatened. Evacuations in effect.

Donaldson, Capitan District, New Mexico DOF. IMT 2 (Pierson). Twenty-eight miles northwest of Roswell, NM. Grass. Moderate fire activity.

Wallow, Apache-Sitgreaves NF. Transfer of command from Area Command Team (Waterbury) and IMT 1 (Pincha-Tulley) back to the local unit will occur today. Twenty-three miles southwest of Alpine, AZ. Timber and grass. Minimal fire activity.

Pacheco, Santa Fe NF. Nine miles north of Santa Fe, NM. Timber and slash. Minimal fire activity.

Stanley, San Carlos Agency, BIA. Twenty miles east of Globe, AZ. Juniper, brush and grass. Moderate fire activity.

Monument, Coronado National Memorial, NPS. Three miles west of Sierra Vista, AZ. Timber. Minimal fire activity.

Little Lewis, Lincoln NF. Two miles southeast of Sacramento, NM. Timber and grass. Minimal fire activity. Precipitation was received in the fire area.

Southern Area (PL 4)

New fires: 49
 New large fires: 4
 Uncontained large fires: 10
 NIMOs committed: 1
 Type 2 IMTs committed: 5

NIMO (Houseman) and Texas IMT 2 (Hannemann) are managing existing and new fires located in Texas state initial attack zones.

Juniper Road, North Carolina DFR. North Carolina IMT 2 (Hildreth). Thirteen miles northeast of Rocky Point, NC. Brush. Minimal fire activity. Numerous residences threatened.

Honey Prairie, Okefenokee NWR. IMT 2 (Wilde). Five miles northeast of Fargo, GA. Southern rough. Active fire behavior. Numerous residences threatened.

Sweat Farm Again, Georgia DOF. Northeast Compact IMT 2 (Schenk). IMT is also managing the Racepond fire. Twelve miles west of Waycross, GA. Southern rough. Moderate fire activity. Residences threatened.

Racepond, Georgia DOF. Twelve miles south of Hoboken, GA. Hardwood litter. Moderate fire activity. Structures threatened.

Espanola, Florida DOF. Florida IMT 2 (Brady). Seven miles northwest of Bunnell, FL. Southern rough. No further information received.

Simmons Road, North Carolina DFR. Nine miles northeast of Tar Heel, NC. Brush. Active fire behavior. Residences threatened. Evacuations in effect.

Grand Fue, Sabine NWR. Twenty miles southwest of Lake Charles, LA. Grass. Active fire behavior. Last report unless significant activity occurs.

* **Brite Ranch**, Texas Forest Service. Thirty miles west of Marfa, TX. Grass. No further information received.

* **CR 337**, Texas Forest Service. Five miles northwest of Mineral Wells, TX. Brush. Residences threatened. Evacuations in effect. No further information received.

* **Burnett**, Texas Forest Service. Twelve miles northeast of Benjamin, TX. Brush. Residences threatened. No further information received.

* **Ward Ranch**, Texas Forest Service. Eighteen miles south of Sonora, TX. Brush. Residence threatened. No further information received.

Fishermans Paradise, Texas Forest Service. Seven miles southwest of Rio Vista, TX. Brush. Reduction in acreage due to more accurate mapping. No further information received. Last report unless significant activity occurs.

Predictive Services Discussion: Scattered thunderstorms will develop in the afternoon across the Southwest from Arizona into Utah and eastern Nevada. Showers and thunderstorms will move across Wyoming, Colorado and the upper Midwest along a cold front moving through the Plains. Scattered showers and thunderstorms will occur in the Southeast.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from
"This Day in History"

"Lessons Learned" serve as brief summaries of powerful learning opportunities. You can use these summaries as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, and your unit.

Part III - South Canyon Fire, Colorado, 1994 (A Four-Part Series)

Incident Summary: On July 2, 1994, seven miles west of Glenwood Springs, Colo., lightning ignites a fire in piñon-pine and juniper on a ridge at the base of Storm King Mountain. The entire general area, in a one-year drought, is experiencing low humidities and record-high temperatures. Over the next two days, the South Canyon Fire increases in size. Initial attack resources are assigned. Four days later, on July 6, a dry cold front moves into the fire area. As winds and fire activity increases, the fire makes several rapid runs. Fourteen firefighters perish as they try to outrun the flames.

July 5 – Summary of Activities

Red Flag warnings and *very high* to *extreme* fire danger are predicted again today.

A crew of seven firefighters hikes up into the South Canyon Fire at the base of Storm King Mountain. They cut Helispot 1 and begin direct fireline construction downhill along the fire's edge below this helispot.

The IC orders another district engine crew, one helicopter, and one 20-person hand crew. A load of eight smokejumpers is then substituted for the hand crew.

To support fireline construction, an air tanker retardant drop is requested. After the first load is dropped, due to steep terrain and gusty winds, the IC and pilot agree that more drops would be ineffective.

At 5:30 p.m. the IC and engine crew leave the fire to refurbish equipment. Fifteen minutes later, 8 smokejumpers are dropped at the top of the fire. The IC directs them to work on the fireline from the helispot downhill toward the west drainage.

The Jumper-in-Charge informs the IC that the fire has crossed their fireline and is burning actively. The jumpers begin building fireline on the east side of the ridge. After sizing-up the current fire, the Jumper-in-Charge orders two Type 1 hand crews. By 10 p.m., the fire has grown 20 acres today. It now covers 50 acres.

Lessons Learned Discussion Points

Downhill fireline construction is hazardous in steep terrain, fast-burning fuels, and rapidly changing weather.

Downhill fireline construction should not be attempted unless there is no tactical alternative.

If your fire crew was assigned to construct fireline downhill on Storm King, what would your concerns be? Could you perform this operation safely? (Reference page 1, 6 and 8 in your IRPG for this discussion.)
