

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, July 22, 2011 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (174 new fires)
New large fires:	8 (*)
Large fires contained:	4
Uncontained large fires: **	23
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	5

Nationally, there are 27 large fires being managed to achieve multiple objectives.

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

**Southern Area (PL 3)**

New fires:	50
New large fires:	3
Uncontained large fires:	11
Type 2 IMTs committed:	3

Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

**Honey Prairie**, Okfenokee NWR. Florida IMT 2 (West). Five miles northeast of Fargo, GA. Southern rough. Minimal fire activity. Numerous residences threatened.

**Simmons Road**, North Carolina DFR. North Carolina IMT 2 (Brandon). IMT is also managing the Juniper Road fire. Nine miles northeast of Tar Heel, NC. Brush. Moderate fire activity.

**Juniper Road**, North Carolina DFR. Thirteen miles northeast of Rocky Point, NC. Brush. Minimal fire activity. Precipitation occurred over the fire area yesterday.

**Racepond**, Georgia DOF. Twelve miles south of Hoboken, GA. Hardwood litter. No new information. Last report unless new information is received.

**Sweat Farm Again**, Georgia DOF. Twelve miles west of Waycross, GA. Southern rough. No new information. Last report unless new information is received.

**Williams**, Texas Forest Service. Started on private land thirteen miles south of Kent, TX. Brush. No further information received.

\* **Crowley**, Texas Forest Service. Started on private land four miles southwest of Marfa, TX. Grass. Moderate fire activity.

\* **NE Marfa**, Texas Forest Service. Eight miles northeast of Marfa, TX. Grass and brush. Active fire behavior.

**Adamsville**, Texas Forest Service. Started on private land eight miles southwest of Evant, TX. Juniper and grass. No new information.

**Grasshopper**, Wewoka Agency, BIA. Five miles southwest of Cromwell, OK. Hardwood litter. No further information received.

**314**, Texas Forest Service. Started on private land three miles northwest of Brookston, TX. Timber and brush. No new information. Last report unless new information received.

### **Southwest (PL 3)**

New fires: 24  
 New large fires: 4  
 Uncontained large fires: 9

**Las Conchas**, Bernalillo District, New Mexico State Forestry. Thirteen miles southwest of Los Alamos, NM. Timber and grass. Minimal fire activity. Precipitation occurred over portions of the fire area yesterday.

**Pacheco**, Santa Fe NF. Nine miles north of Santa Fe, NM. Timber and slash. Minimal fire activity.

**Jack Complex** (3 fires), Gila NF. Twenty-two miles east of Glenwood, NM. Timber and grass. No new information.

\* **Lookout Complex** (2 fires), Lincoln NF. Eight miles southwest of Queen, NM. Brush. Active fire behavior. Structures threatened.

\* **Deep Well**, Roswell Field Office, BLM. Thirty-one miles northwest of Roswell, NM. Brush. Moderate fire activity.

\* **Parallel**, Kaibab NF. Thirty-four miles west of Cameron, AZ. Timber. Moderate fire activity. Last report unless significant activity occurs.

**Eagle**, Gila NF. Ten miles east of Reserve, NM. Timber. No further information received.

**Predictive Services Discussion:** Scattered wet and dry thunderstorms will develop across the southern and south central Rockies and the central Plains. Scattered showers and wet thunderstorms will again form across the Southeast. Chance of some isolated afternoon wet and dry thunderstorms in the northern Rockies and adjacent High Plains. Windy in the central and northern High Plains. Continued very hot over the central Plains and the Midwest.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the **LCES (Lookouts, Communication, Escape Routes, Safety Zones) Category.**

### Subjective vs. Objective Hazards

A popular mountaineering test divides the alpinists' hazards into two distinct types: subjective, which one has direct control over (e.g., condition of the equipment, the decision to turn back) and objective hazards which are inherent to the alpine environment (e.g., avalanches, rock fall).

Objective hazards are a natural part of the environment. They cannot be eliminated and either one must not go into the environment where they exist or adhere to a procedure where safety from the hazard is assured.

Similarly, the wildland firefighter's hazards are either subjective or objective. Examples of subjective hazards would be working below a dozer constructing fireline or the use of improper techniques while felling a tree. The fireline supervisor has direct control over these types of hazards.

The wildland fire environment has four basic objective hazards; lightning, fire-weakened timber (standing and lying), rolling rocks and entrapment by running fires. When these hazards exist the options are to not enter the environment or to adhere to a safe procedure. The key to this safe procedure is LCES.

Although, the following discussion applies to all objective hazards, we will directly address fire entrapments.

● Identify subjective or objective hazards of working in the vicinity of:

- Dozer(s) or Tractor Plows
- Snags
- Helicopters
- Fixed Wing Aircraft
- Other Engines and Vehicles
- ATVs
- Oil and Gas Wells and Pipelines
- Power lines
