

**National Interagency Coordination Center
Incident Management Situation Report
Friday, July 29, 2011 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (129 new fires)
New large fires:	2 (*)
Large fires contained:	0
Uncontained large fires: **	17
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	5

Nationally, there are 24 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires:	26
New large fires:	2
Uncontained large fires:	12
Type 2 IMTs committed:	3

Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Honey Prairie, Okefenokee NWR. Georgia IMT 2 (Floyd). Five miles northeast of Fargo, GA. Southern rough. Smoldering.

Simmons Road, North Carolina DFR. North Carolina IMT 2 (Brandon). IMT is also managing the Juniper Road fire. Fourteen miles southeast of Fayetteville, NC. Minimal fire activity.

Juniper Road, North Carolina DFR. Thirteen miles northeast of Rocky Point, NC. Brush. Creeping and smoldering.

Stegall, Texas Forest Service. Twelve miles north of Sanderson, TX. Brush. Minimal fire behavior.

CR 156, Texas Forest Service. Started on private land three miles northeast of Cisco, TX. Brush. Minimal fire behavior.

Magnolia, Texas Forest Service. Started on private land six miles southwest of Lakeway, TX. Brush. Minimal fire activity. Reduction in acreage due to more accurate mapping.

Bogalie, Oklahoma DOF. Six miles southeast of Broken Bow, OK. Timber. No further information received.

Colcord, Oklahoma DOF. One mile northeast of Colcord, OK. Grass. No further information received.

Diamond Ridge, Oklahoma DOF. Four miles southeast of Cookson, OK. Hardwood litter. No further information received.

Stickcross Mountain, Oklahoma DOF. Two miles southeast of Tahlequah, OK. Hardwood litter. No further information received.

* **Larson Land & Cattle**, Oklahoma DOF. Three miles west of Hart, MO. Hardwood litter. No further information received.

* **Mud Spring**, Oklahoma DOF. Eight miles southeast of Stilwell, OK. Hardwood litter. No further information received.

Predictive Services Discussion: Scattered thunderstorms will develop over the southern and central Rockies. Scattered showers and thunderstorms will dot much of the eastern half of the nation, especially the Gulf Coast states. Tropical Storm Don is expected to make landfall on the lower Texas coast late Friday.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

**Today's discussion is from the
Wildland / Urban Interface Category.**

WILDLAND/URBAN INTERFACE -- STRUCTURE PROTECTION

The primary consideration of any operation is to assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structure.

● Factors that may make an attempt to save a structure hopeless or too dangerous include:

- The fire is making a sustained run and there is little or no clearance between the structure and the fuel.
- The fire behavior is extreme; spot fires are numerous and the spread is outpacing containment.
- Water supply will not last as long as the threat of the fire.
- The fire intensity dictates that you leave the fire area immediately.
- The structure is constructed of wood and has a wood, shake roof.
- The roof of the structure is more than one-quarter involved.
- There is fire inside of the structure or windows are broken and there is no way to quickly repair them.
- You can safely remain at the structure because your escape route could become unusable.

● When implementing a plan to protect structures, consider the following:

- Don't enter a burning structure unless you are trained, equipped, and authorized. Firefighter safety and survival is the number one priority.
- Always stay mobile and wear all of your PPE.
- Back in equipment to allow for a quick escape.
- Coil a short, charged line with fog nozzle on your engine for safety and quick knock down capability.
- Don't make long hose lays. Keep at least 100 gallons of water reserve in your tank.
- Check the road system before the fire approaches. Know bridge limits, alternate access routes, and turnarounds for your vehicle and other support vehicles.
- Determine if residents are home. Leave on the inside and outside lights, regardless of the time of day. Close the garage door.
- Place the owners' ladder at a corner of the home on the side with the least fire threat.
- Coil and charge garden hoses.
- Check and mark hazmat; e.g., LPG, pesticides, and paint storage.
