Southern Area (PL 3)

| | |
|--------------------------|----|
| New fires: | 60 |
| New large fires: | 3 |
| Uncontained large fires: | 11 |
| Type 2 IMTs committed: | 2 |

Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Honey Prairie, Okefenokee NWR. Transfer of command from Georgia IMT 2 (Floyd) back to local unit will occur today. Five miles northeast of Fargo, GA. Southern rough. Minimal fire activity.

Afternoon, Everglades NP. Fifteen miles northwest of Homestead, FL. Grass. Active fire behavior. Structures threatened.

Greenwood, Arkansas Forestry Commission. Two miles north of Greenwood, AR. Timber. No new information. Last report unless new information is received.

Gobbler Creek, Okmulgee Field Office, BIA. Two miles northwest of Lamar, OK. Hardwood litter. No new information.

Whitehead, Texas Forest Service. Ten miles south of Eden, TX. Brush. Residences threatened. Reduction in acreage due to more accurate mapping. No further information received.

* **Wimberly**, Texas Forest Service. Four miles north of Merkle, TX. Grass. Moderate fire activity. Residences threatened.

Overpass, Oklahoma DOF. Three miles north of Blanco, OK. Grass. Residences threatened. No further information received.

Sideways, Oklahoma DOF. Two miles north of Blanco, OK. Grass. No further information received.

* **The Midway Cemetary**, Texas Forest Service. Ten miles southeast of Bogata, TX. Timber. Moderate fire activity. Residences threatened.

Muddy Water, Okmulgee Field Office, BIA. Four miles west of Hanna, OK. Hardwood litter. No new information.

Langley Hill, Oklahoma DOF. Twelve miles south of Stilwell, OK. Hardwood litter. No new information.

Predictive Services Discussion: Widely scattered wet and dry thunderstorms will cross the northern Rockies and the northern Plains. Widely scattered showers and thunderstorms will develop in the southern and central Rockies in the afternoon. Scattered showers and thunderstorms will develop around a stationary front from eastern Colorado to the Southeast. Excessive heat will continue across Texas, Oklahoma and Arkansas.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from
"This Day in History"

"This Day in History" is a brief summary of a powerful learning opportunity. You can use this summary as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, your team and your unit.

The Mann Gulch Fire - August 5th, 1949

Summary: Lightning started many fires on the Helena National Forest August 4th, 1949 including one near the top of a ridge between Meriwether and Mann Gulches. At 12:55pm August 5th, the fire was observed at 6 acres. At 1:30 the call went out for smokejumpers from the Missoula jumpbase. By the time the jump plane flew over at 3pm the fire was 60 acres. The crew jumped and are scattered by a nearby thunder cell. The crew gathers at the bottom of the gulch up-canyon of the fire. Jumper Foreman goes to scout the fire and meets up with a fire guard working alone near the head of the fire. Observing increased fire activity, the decision is made to start from the toe. While hiking to the toe, the foreman noted that there was fire below them in the gulch and that it had crossed to the other side of the canyon blocking their ability to escape to the river. They reversed direction and headed up toward the NW ridge. The fire is 500 feet behind them crowning in timber and doghair thickets. The foreman knows that they will not outrun the fire and starts to burn off some grass for a "refuge". He gives the order for his crew to come into the black with him. The foreman stayed in his black and survived the fire passing over. It is not clear how many of the crew heard the orders over the roar of the fire or understood what the foreman was trying to do (burning out was neither taught nor common practice at this time). The crew continued running up the steep slope for the ridge. Two made it to safety in rocks at the top. 5:56pm marks the time on one firefighter's watch that stopped when the 15 Missoula Smokejumpers and one Meriwether Fire Guard were burned over. Only 5 would survive the blow-up. 2 would die from their burns the next day.

This Day in Wildland Fire History is dedicated to all those at Mann Gulch August 5th, 1949.

Predicted Fire Danger was "low" but readings from a nearby ranger station were RH=22%, fuel sticks = 5%, and wind=16mph indicating more severe fire danger. No weather was recorded at the fire, but steady SW winds were observed at the time of the jump. The Gulch runs SW down to the Missouri River. Also note the thunder cell that was in the area.

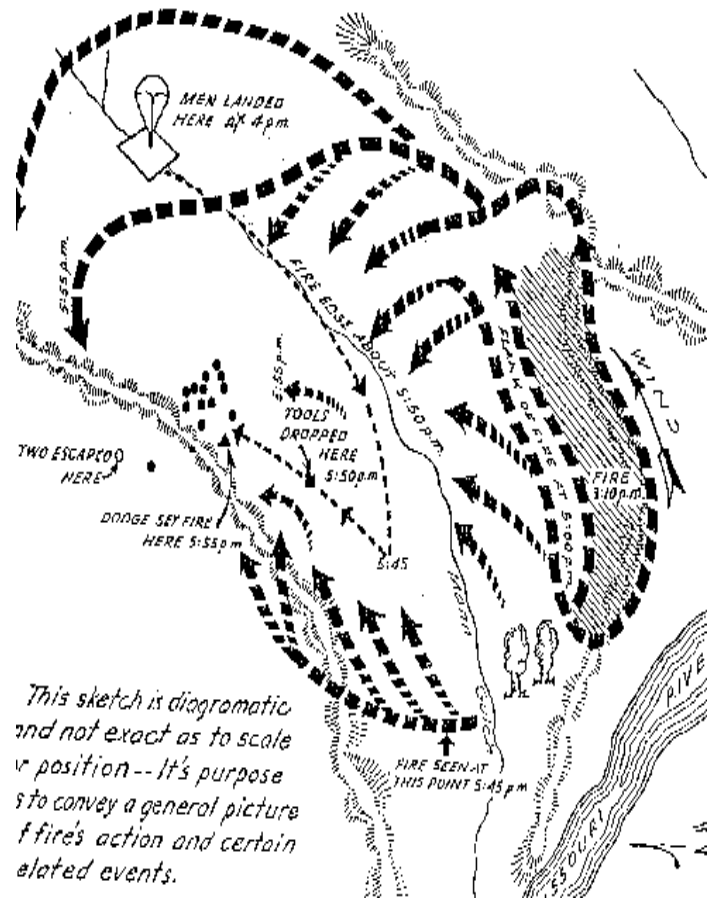

- *Open your IRPG to page 1. Based on the above information coupled with the increase in fire size, use the Risk Management Process and the map (right) to discuss some of the actions you will take to ensure crew safety: as the FFT2, squad boss, crew boss, etc.*

Based on initial aerial size-up, the strategy was to hold the fire on the ridge by anchoring the head of the fire and flanking down both sides to the toe. The fire was noted as "appearing relatively quiet".

- *Discuss other tactics that your crew could use if presented with a similar situation. Look at the different options available at different steps of the initial attack.*

Though his ability as a firefighter was well respected by his peers, the Foreman was not known by this young group of smokejumpers.

- *When we find ourselves in this position (such as a Crew boss assignment) what can we do to create and encourage crew cohesion?*
